AI Overview

If you are experiencing difficulty breathing, seek immediate medical attention by calling 911 or visiting the nearest emergency room. Breathing issues can be a medical emergency.

For non-emergency shortness of breath or COVID-19 health concerns in the Hyde Park area, please consider the following immediate healthcare resources:

- **Urgent Care:** Visit the University of Chicago Medicine urgent care center.
- **Telehealth:** Access 24/7 care or request a primary care appointment through the [Northwestern Medicine](#) patient portal.

If you are dealing with a severe allergic reaction from an insect sting, use an epinephrine auto-injector (EpiPen) if you have one prescribed and seek emergency help immediately.

This is for informational purposes only. For medical advice or diagnosis, consult a professional. AI responses may include mistakes. [Learn more](#)
