Facing trouble connecting BLU C5L (2021) to a computer using a USB cable? Computer not recognizing USB when BLU C5L (2021) is connected to PC? It might be because of the missing **BLU C5L (2021) USB drivers** or bad or corrupted drivers. To fix the BLU C5L (2021) not showing up on the computer, **download BLU C5L (2021) USB Drivers** and install them on your Windows computer.

Most computers don't have proper Google Android USB Drivers installed, so it is required to download BLU USB Drivers (<https://www.androidusbdrivers.com/device/blu/>) and install them on your computer. Once the BLU drivers (<https://www.androidusbdrivers.com/device/blu/>) are installed, we can adequately connect BLU C5L (2021) to the Computer or Laptop using a USB data cable. You can download **official USB Drivers for BLU C5L (2021)** along with ADB interface drivers and fastboot drivers on this page.

With **BLU C5L (2021) Android USB Drivers** installed, we can establish a secure connection between a computer and a smartphone. It helps transfer files and data like images, videos, and documents between the computer and the mobile phone through MTP (Media Transfer Protocol).

With the **BLU C5L (2021) ADB driver and Fastboot driver**, we can pass ADB commands and Fastboot commands to the phone from the computer via Command Prompt (CMD) and perform certain operations.

Download BLU C5L (2021) USB Driver

The BLU Mobile Phone drivers (<https://www.androidusbdrivers.com/device/blu/>) provided here can be used to flash stock firmware, stock recovery, TWRP recovery, CWM recovery, Unlocking Bootloader, etc. They can also be used for common purposes like transferring media, files, and documents to and from phone to computer.

How to Install BLU C5L (2021) CDC Drivers

1. Download and extract the **android-cdc-driver.zip** to Desktop on your computer.

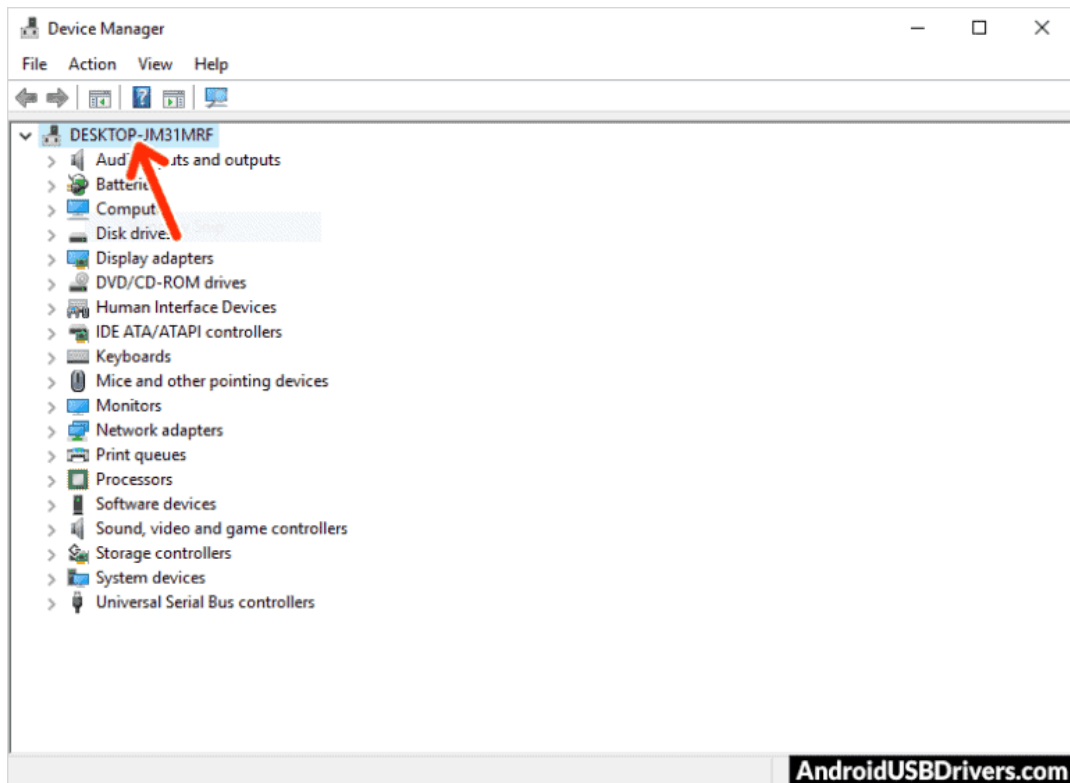

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Android-CDC-Driver.png>)

2. **Open the Device Manager** on your computer by searching **device manager (devmgmt.msc)** from Windows Start Menu.

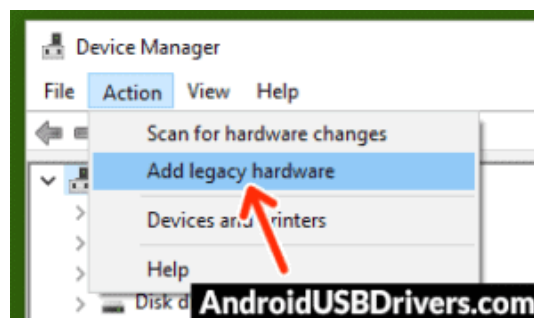

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Device-Manager-Windows-Start-Menu-Search.png>)

3. When the Device Manager window opens, click on your **Computer name**.

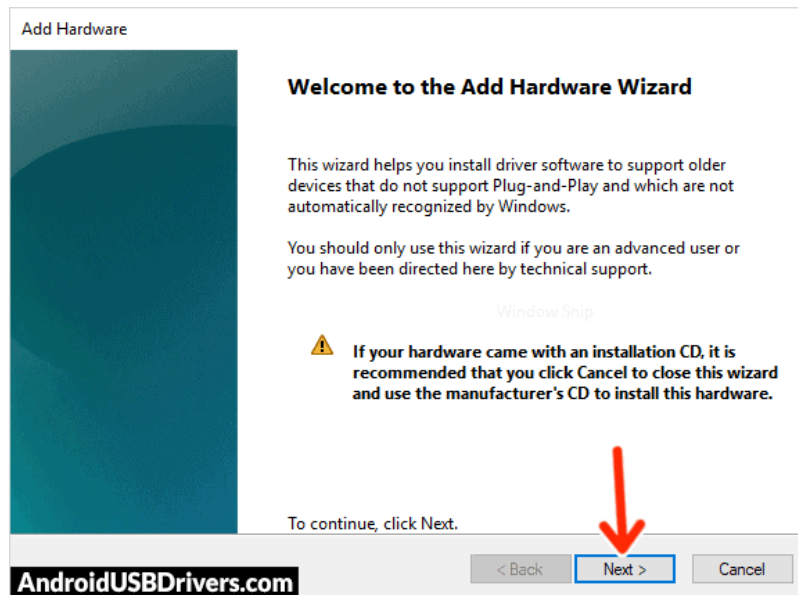

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Device-Manager-Computer-Name.png>)

4. Now click on **Action** and then click on **Add legacy hardware**.

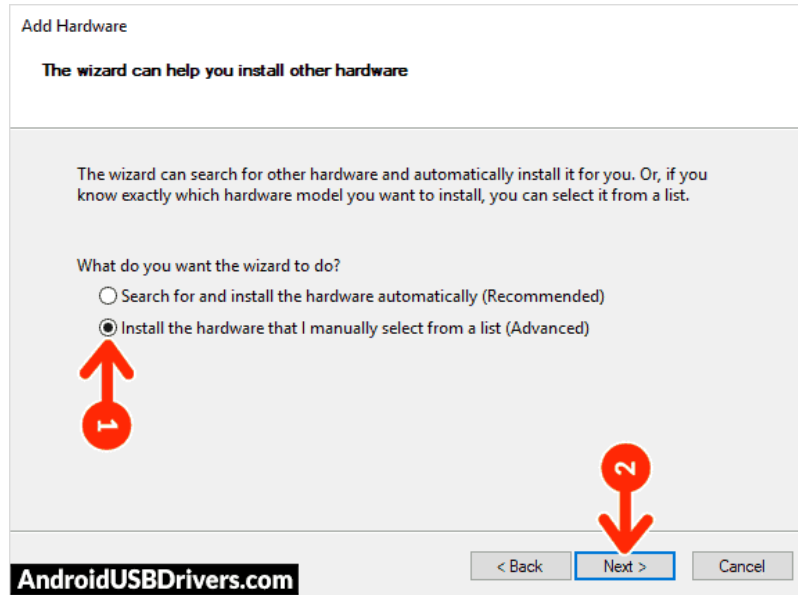

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Device-Manager-Add-legacy-hardware.png>)

5. Now **Add Hardware Wizard** window should open. Click on **Next** to continue.

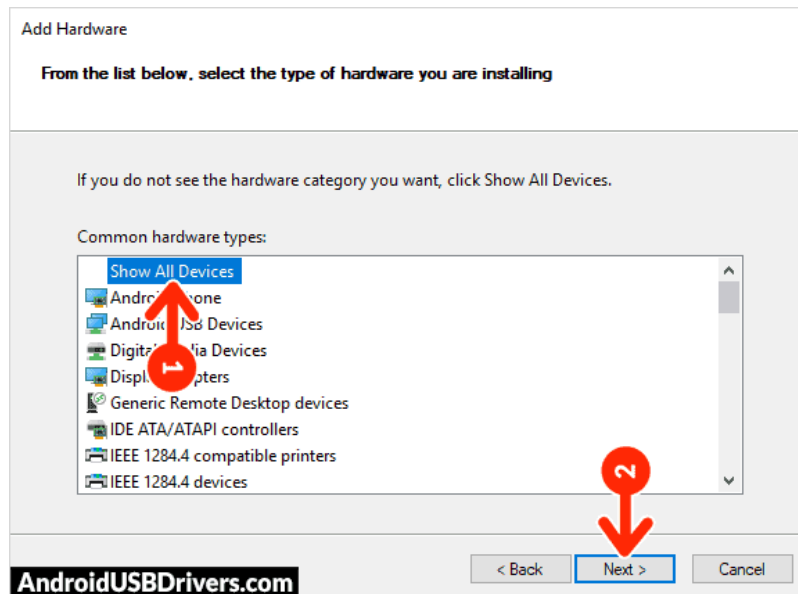

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Add-Hardware-Wizard.png>)

6. Now select **Install the hardware that I manually select from a list (Advanced)** option and click on **Next**.

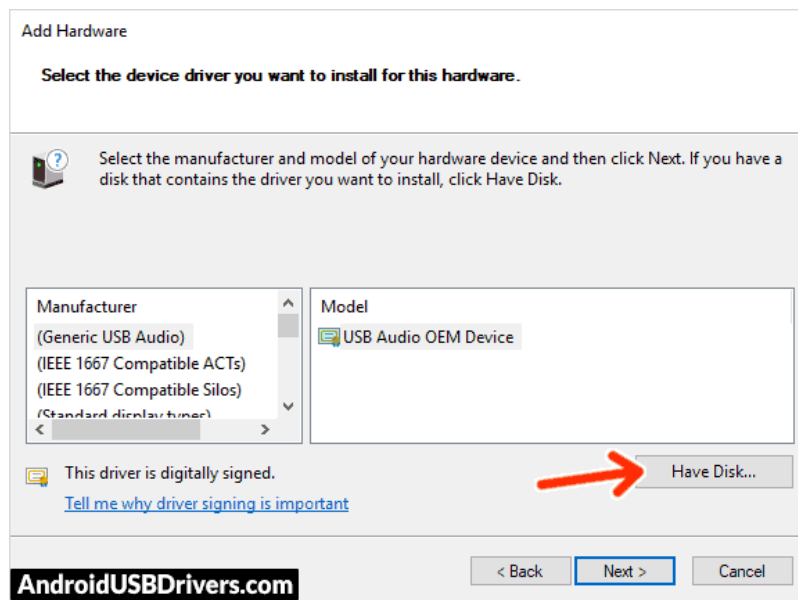

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Install-Hardware-Manually.png>)

7. Now click on **Show All Devices** from the list and click on **Next**.

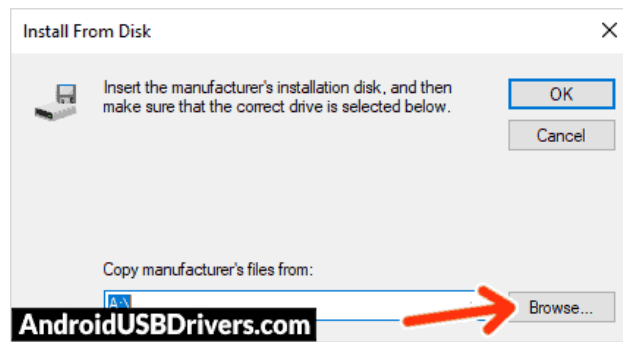

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Show-all-Hardware-Devices.png>)

8. Now click on **Have Disk...** to open the **Install From Disk** window.

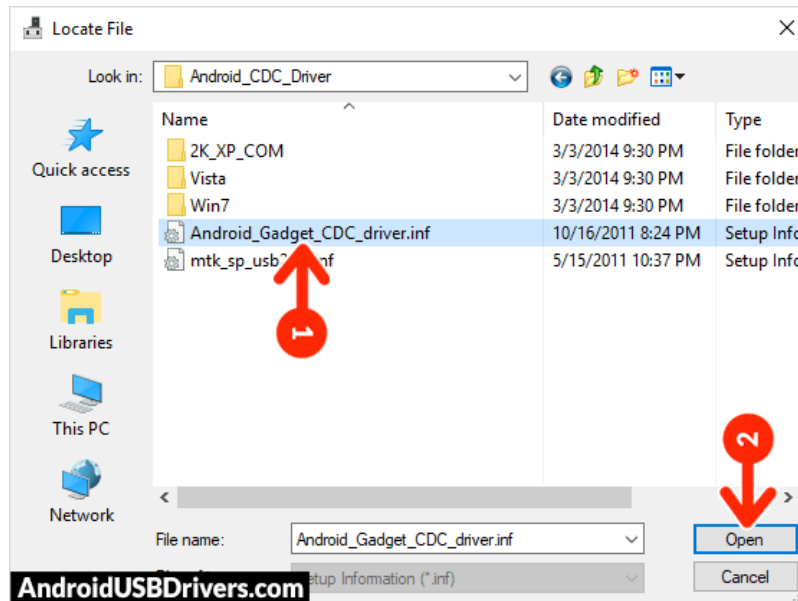

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Add-Hardware-Have-Disk.png>)

9. In the Install From Disk window, click on **Browse...** and navigate to the folder where you have extracted the drivers in **Step #1**.

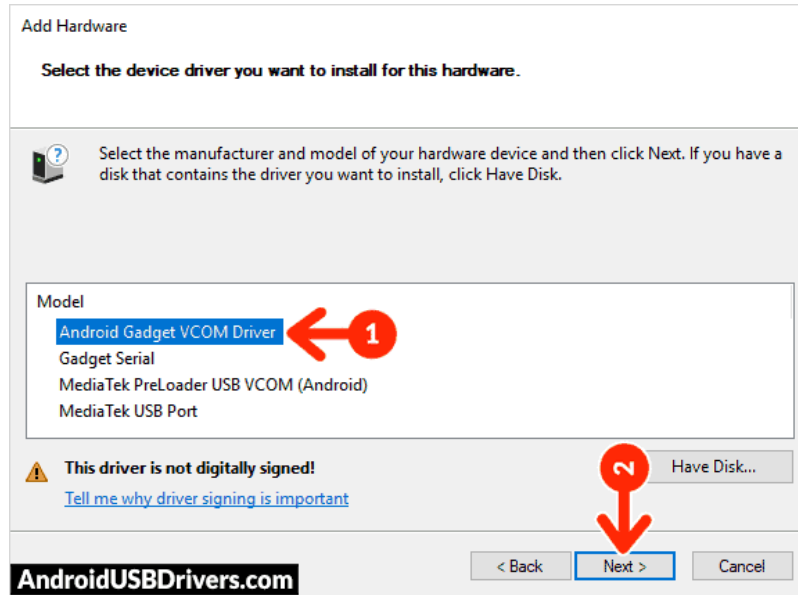

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Install-From-Disk-Browse.png>)

10. Now select **Android_Gadget_CDC_driver.inf** driver file and click on **Open** and then on **OK**.

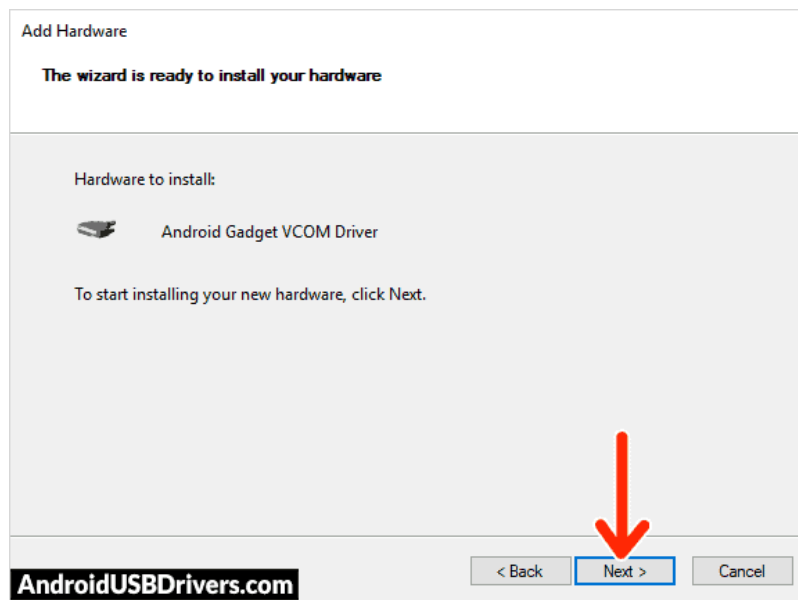

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Android-Gadget-CDC-driver-inf.png>)

11. Now select the **Android Gadget VCOM Driver** from the list and click on **Next**.

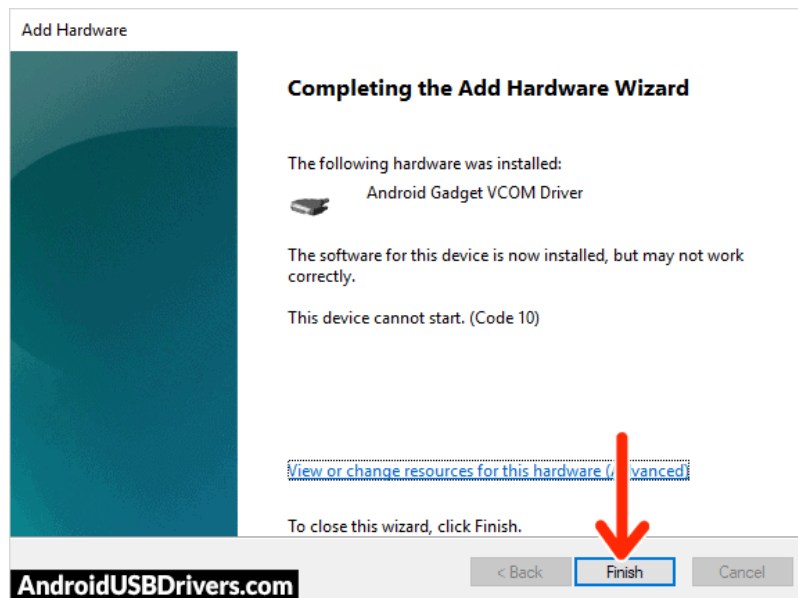

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Install-Android-Gadget-CDC-VCOM-Driver.png>)

12. In the next screen, confirm the Hardware driver to install and click on **Next** to begin the installation process.

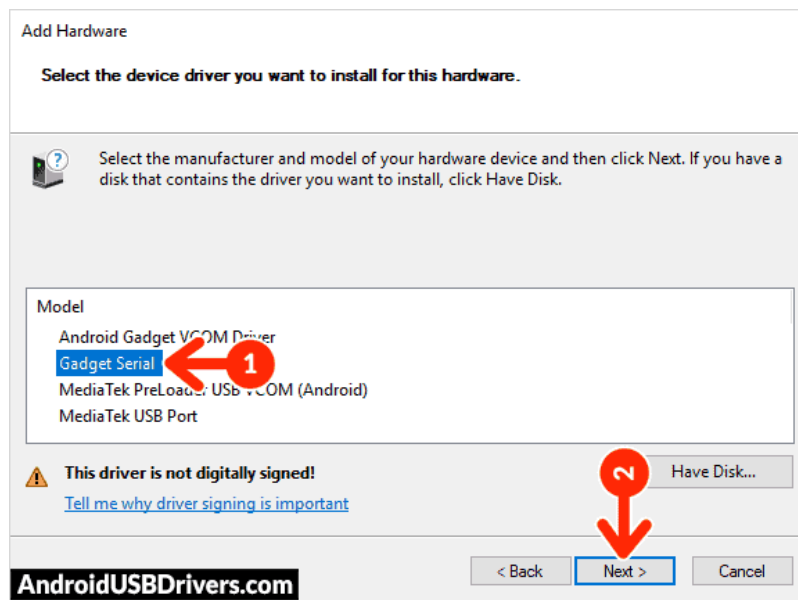

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Install-Android-CDC-Driver.png>)

13. Once installed, click on **Finish**.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Android-CDC-VCOM-Driver-Installed.png>)

14. Follow **Steps #3 to #13** again and install the **Gadget Serial, MediaTek PreLoader USB VCOM (Android),** and **MediaTek USB Port** drivers.

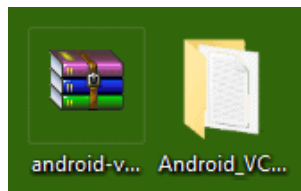

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Install-Android-CDC-Gadget-Serial-driver.png>)

15. Once all the listed drivers are installed, **reboot** your computer.

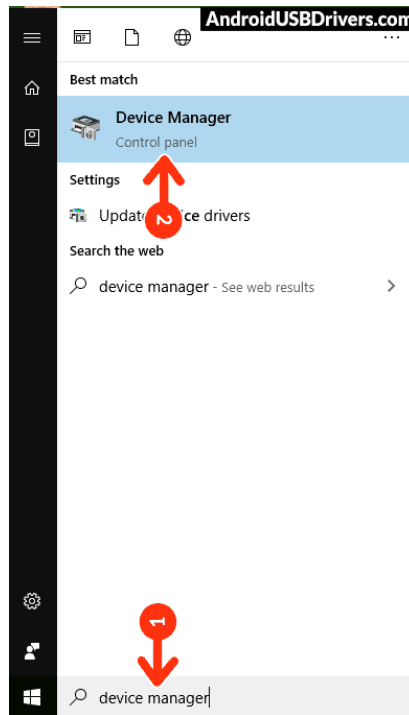

How to Install BLU C5L (2021) VCOM Drivers

1. Download the **android-vcom-driver.zip** file on your computer and extract it on Desktop.

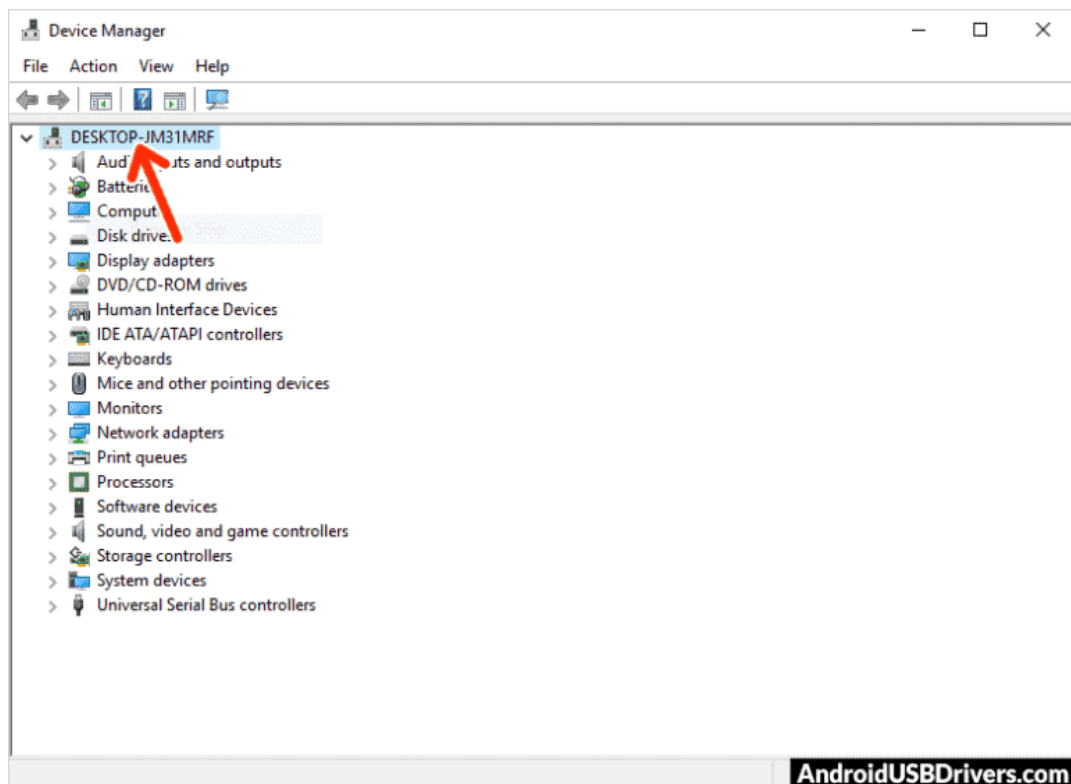

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Android-VCOM-Drivers.png>)

2. Open the **Device Manager** on your computer by searching **device manager** from Windows Start Menu.

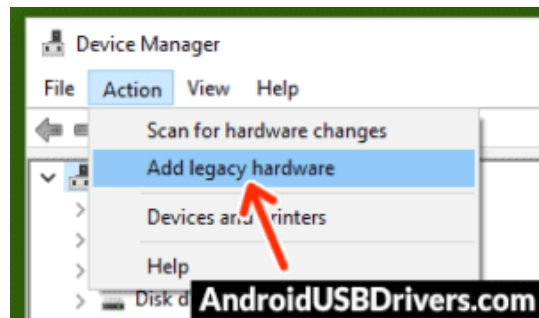

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Device-Manager-Windows-Start-Menu-Search.png>)

3. Now click on your **Computer name** in the Device Manager window.

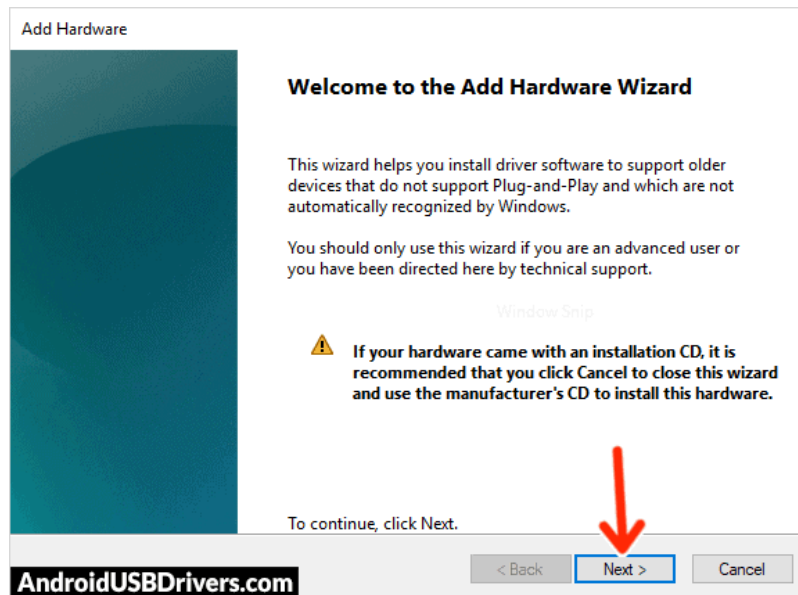

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Device-Manager-Computer-Name.png>)

4. Now click on **Action** and then select **Add legacy hardware**.

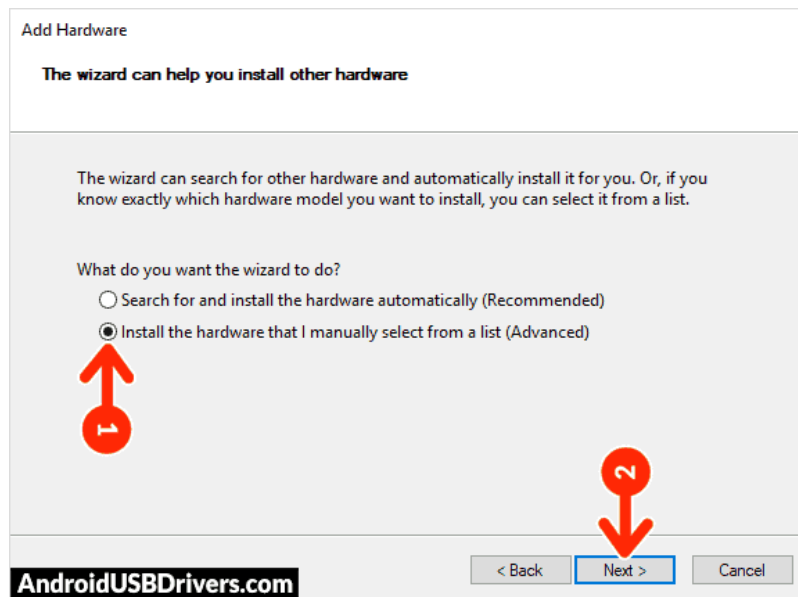

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Device-Manager-Add-legacy-hardware.png>)

5. **Add Hardware Wizard** window should open, click on **Next** to continue.

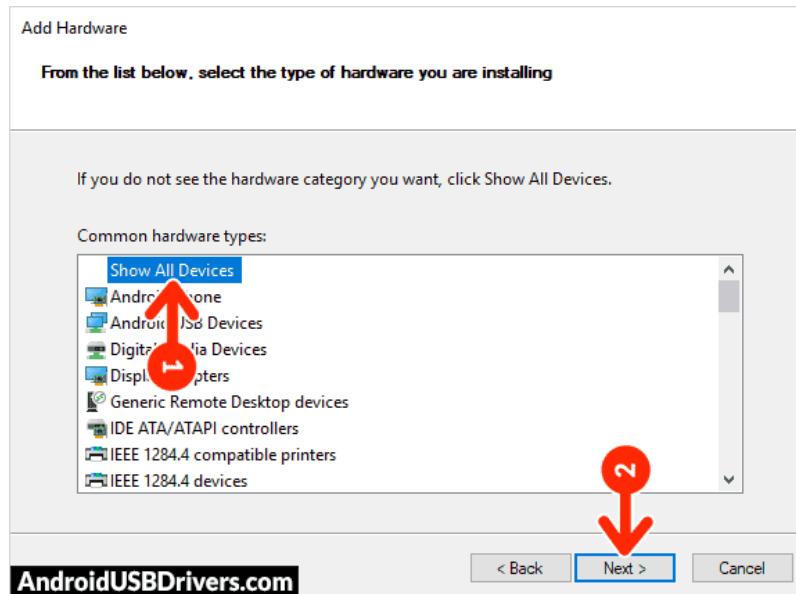

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Add-Hardware-Wizard.png>)

6. Now select **Install the hardware that I manually select from a list (Advanced)** option and click on **Next**.

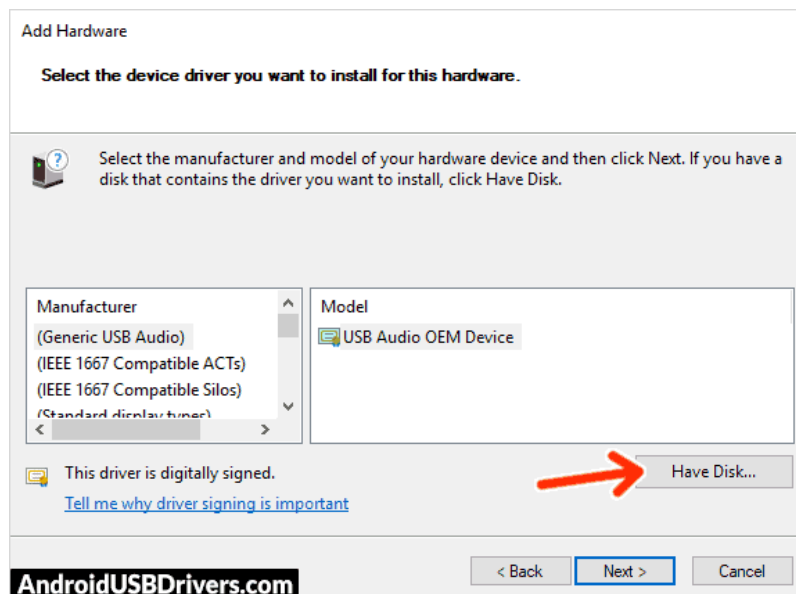

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Install-Hardware-Manually.png>)

7. Select **Show All Devices** from the list and click on **Next**.

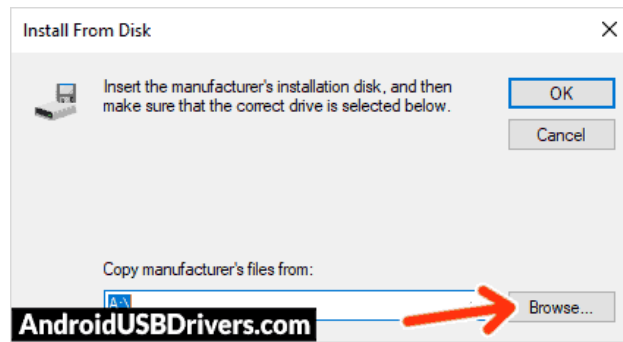

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Show-all-Hardware-Devices.png>)

8. On the next screen, click on **Have Disk...** to open the **Install From Disk** window.

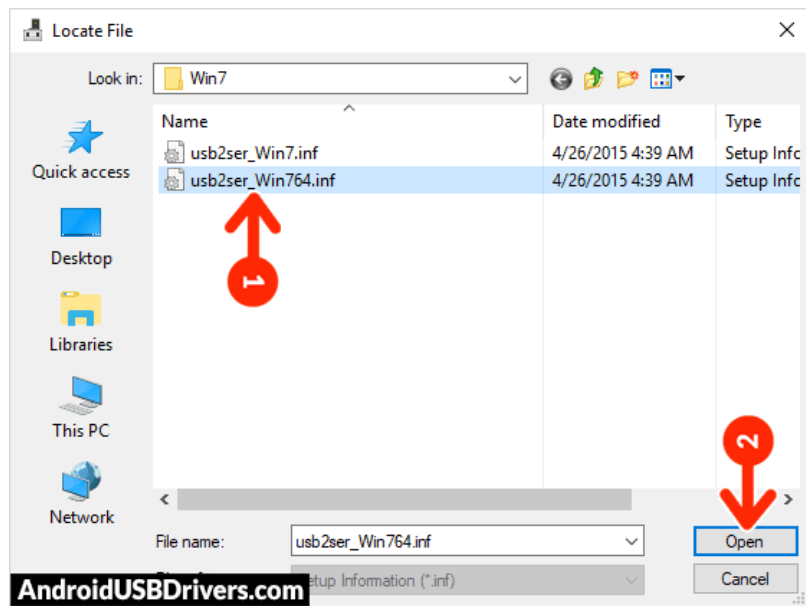

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Add-Hardware-Have-Disk.png>)

9. Click on **Browse...** and navigate to the folder where you have extracted the drivers in **Step #1**.

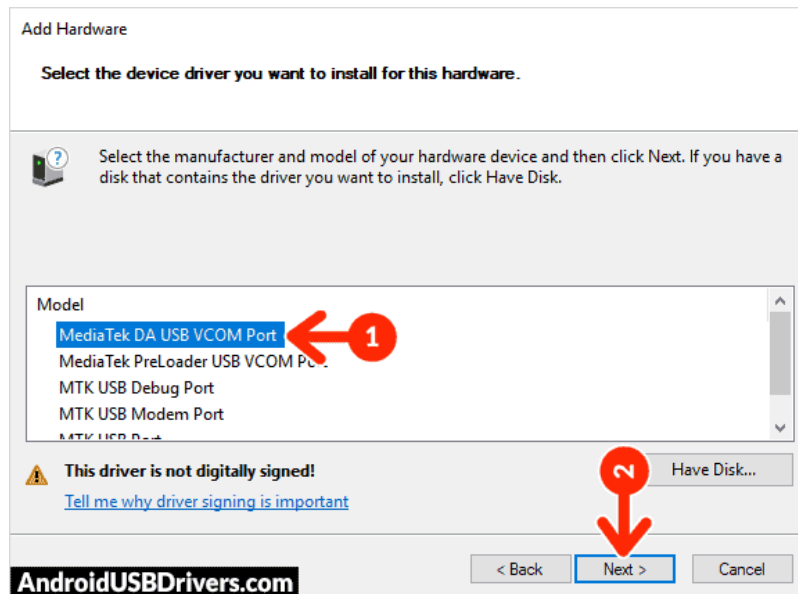

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Install-From-Disk-Browse.png>)

10. Now open **Win 7** folder and select **usb2ser_Win764.inf** driver file if you have the **64-bit version of Windows**, otherwise choose **usb2ser_Win7.inf** file if you have the **32-bit version of Windows**. When selected, click on **Open** and then on **OK**.

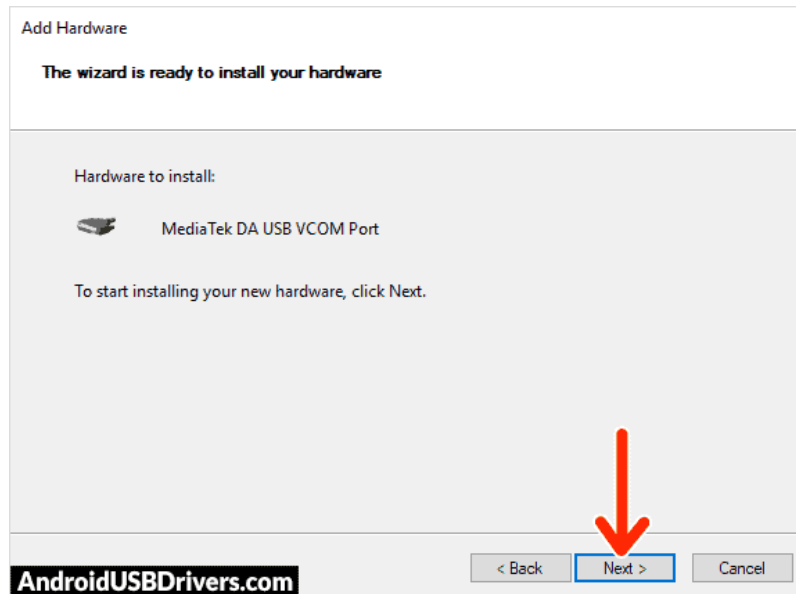

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Android-VCOM-Driver-inf.png>)

11. Select the **MediaTek DA USB VCOM Port** driver from the list and click on **Next**.

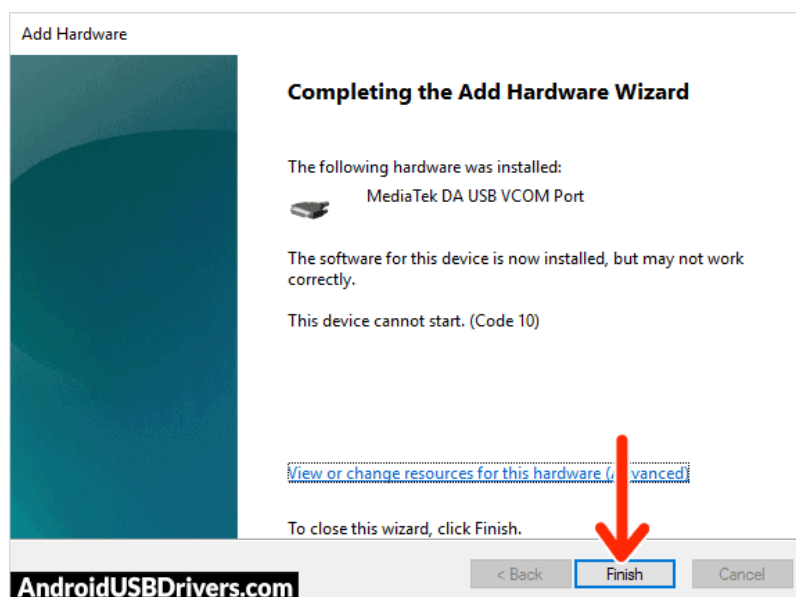

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Install-MediaTek-DA-USB-VCOM-Port.png>)

12. Confirm the Hardware driver to install and click on **Next** to begin the installation process.

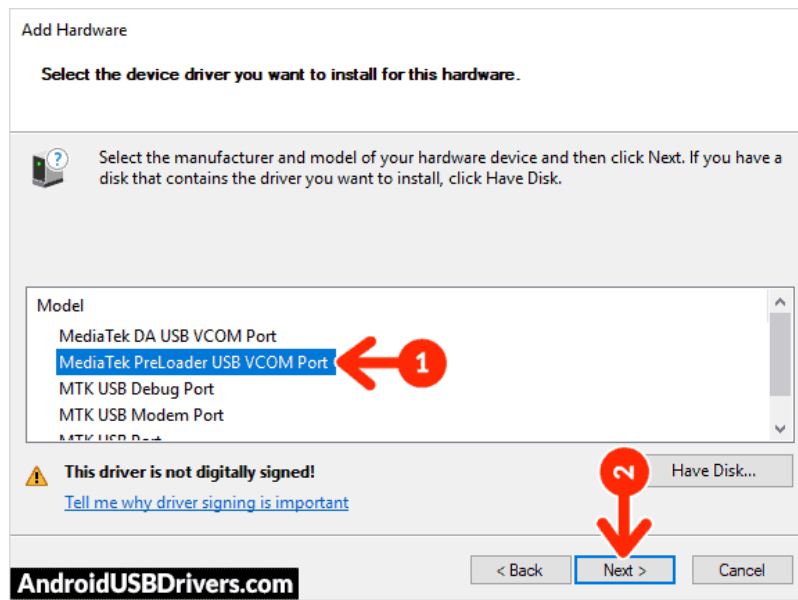

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Install-Android-VCOM-Driver.png>)

13. Once installed, click on **Finish**.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Android-VCOM-Driver-installed.png>)

14. Follow **Steps #3 to #13** again and install the **MediaTek PreLoader USB VCOM Port**, **MTK USB Debug Port**, **MTK USB Modem Port**, and **MTK USB Port** drivers.

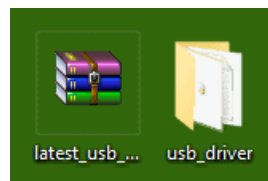

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Install-MediaTek-PreLoader-USB-VCOM-Port.png>)

15. Once all the listed drivers are installed, **restart** your computer.

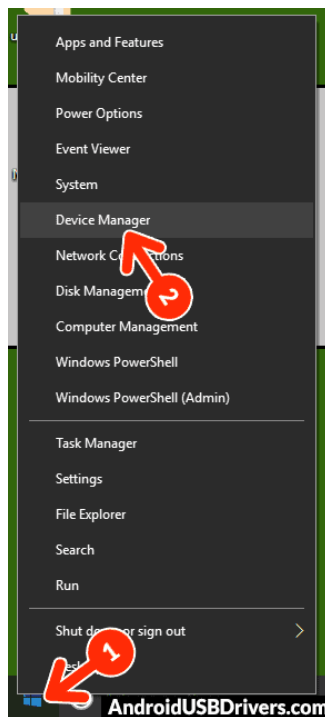

How to Install BLU C5L (2021) USB Drivers Manually

1. Download and extract the latest **Google Android USB Driver (latest_usb_driver_windows.zip)** on your computer.

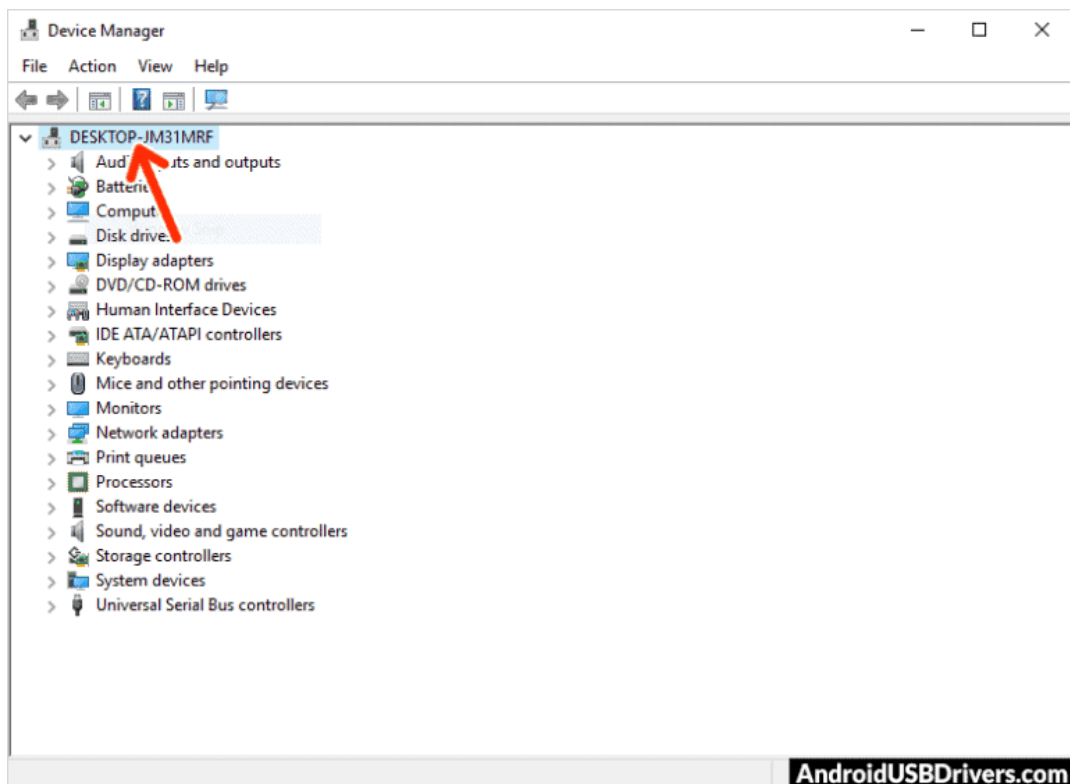

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Google-Android-USB-Driver-extracted.png>)

2. **Launch Device Manager** on your computer by right-clicking **Windows Start Button** and selecting **Device Manager**.

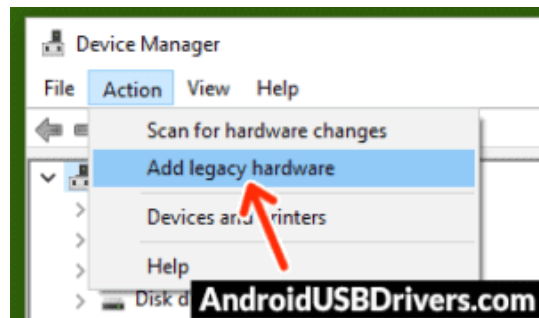

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Windows-Start-Button-Device-Manager.png>)

3. Once the Device Manager window loads, click on your **Computer name**.

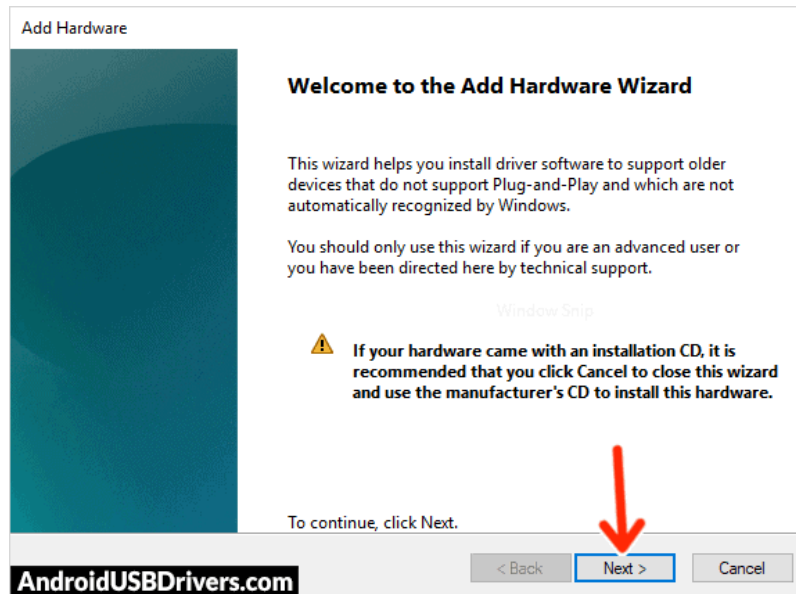

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Device-Manager-Computer-Name.png>)

4. Now click on **Action** and then select **Add legacy hardware**.

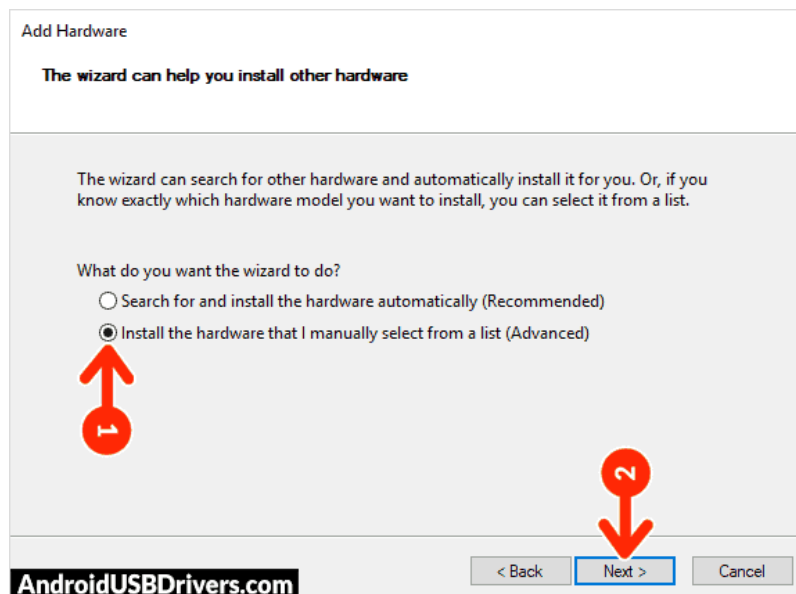

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Device-Manager-Add-legacy-hardware.png>)

5. Now **Add Hardware Wizard** window should open. Click on **Next** to continue.

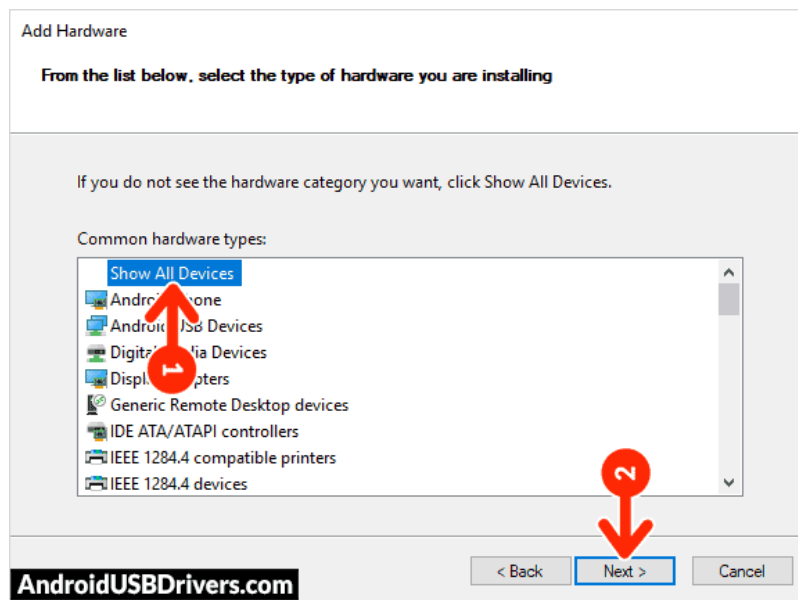

(<https://www.androidusbdriivers.com/wp-content/uploads/2021/01/Add-Hardware-Wizard.png>)

6. Select **Install the hardware that I manually select from a list (Advanced)** option and click on **Next**.

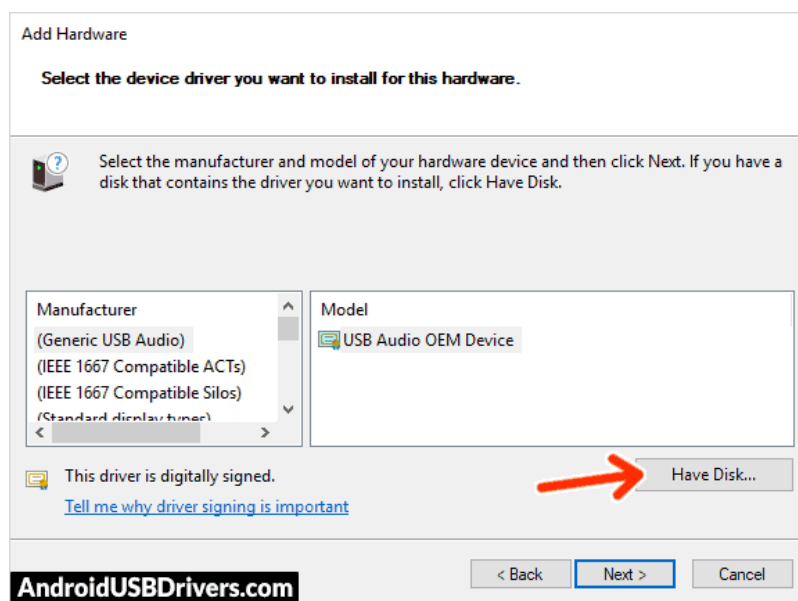

(<https://www.androidusbdriivers.com/wp-content/uploads/2021/01/Install-Hardware-Manually.png>)

7. Now select **Show All Devices** and click on **Next**.

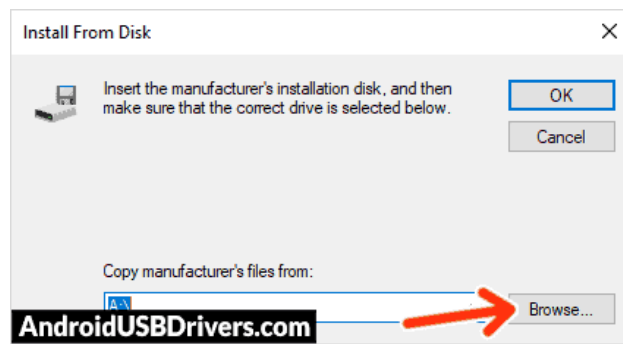

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Show-all-Hardware-Devices.png>)

8. Now click on **Have Disk...** to launch the **Install From Disk** window.

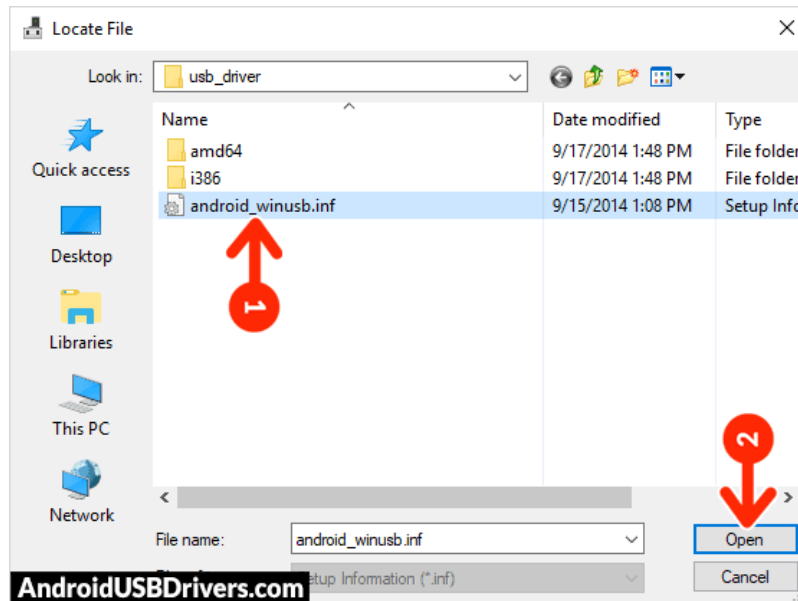

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Add-Hardware-Have-Disk.png>)

9. Now click on **Browse...** from the Install From Disk window and navigate to the folder where you have extracted the drivers in **Step #1**.

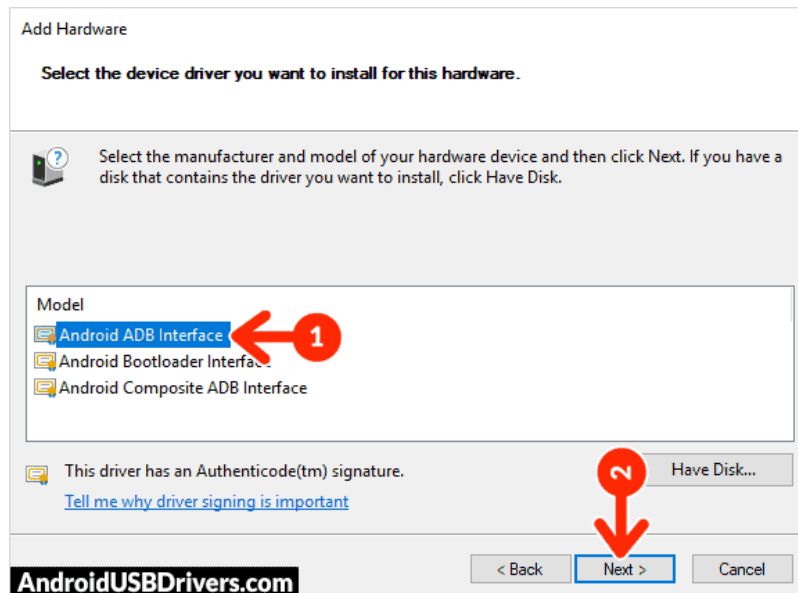

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Install-From-Disk-Browse.png>)

10. Now select **android_winusb.inf** driver file and click on **Open** and then on **OK**.

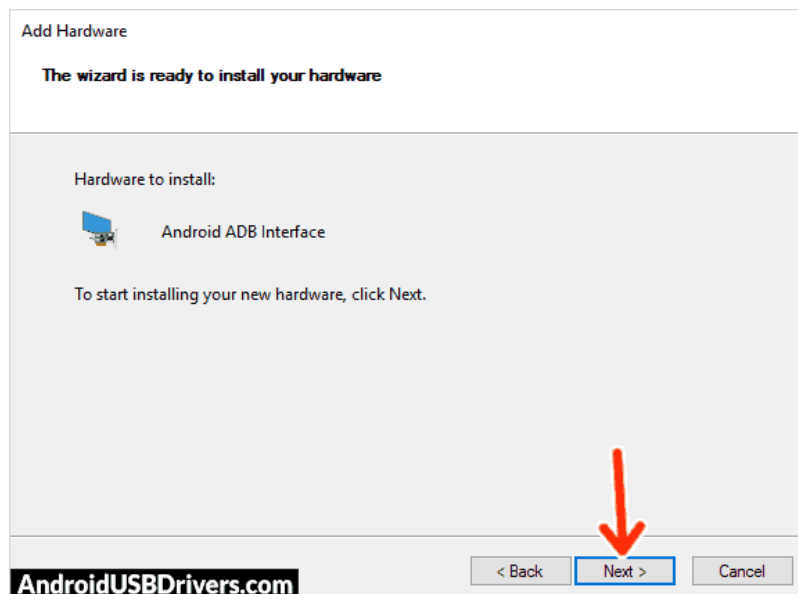

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Google-Android-USB-Driver-inf.png>)

11. Select the **Android ADB Interface** driver from the list and click on **Next**.

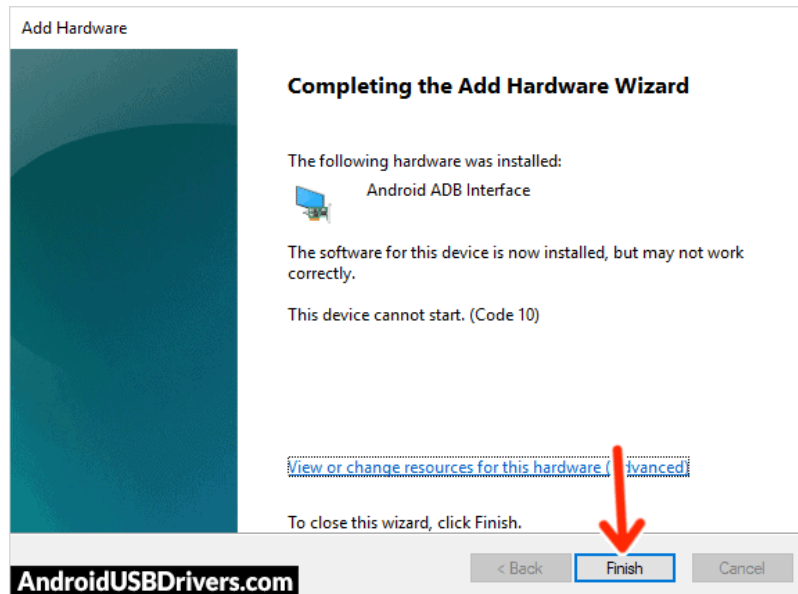

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Install-Android-ADB-Interface-Driver.png>)

12. Confirm the Hardware driver to install and click on **Next** to begin the installation process.

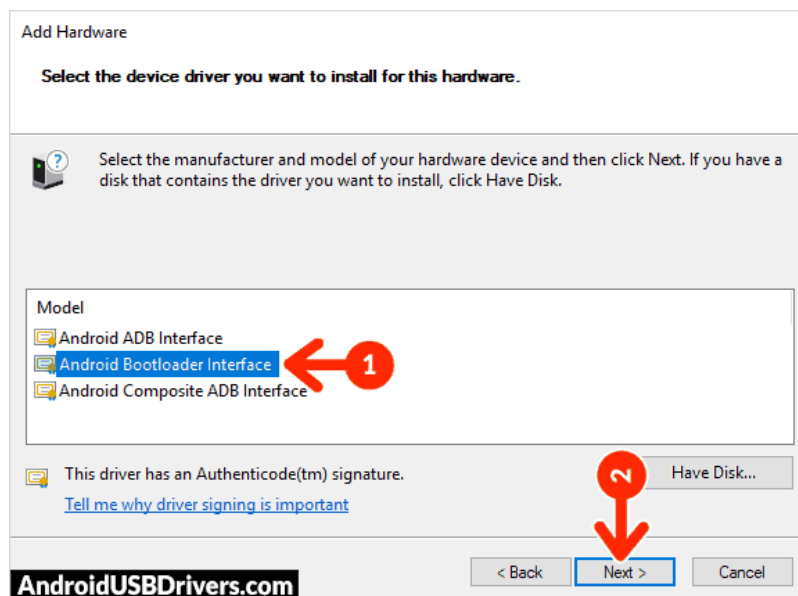

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Android-ADB-Interface-Driver-Install.png>)

13. Once installed, click on **Finish**.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Android-ADB-Interface-Driver-Installed.png>)

14. Follow **Steps #3 to #13** again and install the **Android Bootloader Interface** driver and **Android Composite ADB Interface** driver.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Install-Android-Bootloader-Interface-Driver.png>)

15. Once all the listed drivers are installed, **restart** your computer.

How to Install BLU C5L (2021) ADB and Fastboot Drivers

1. Download the **15 Seconds ADB installer** on your computer. Once downloaded, extract the zip file to obtain the **ADB installer** setup file.

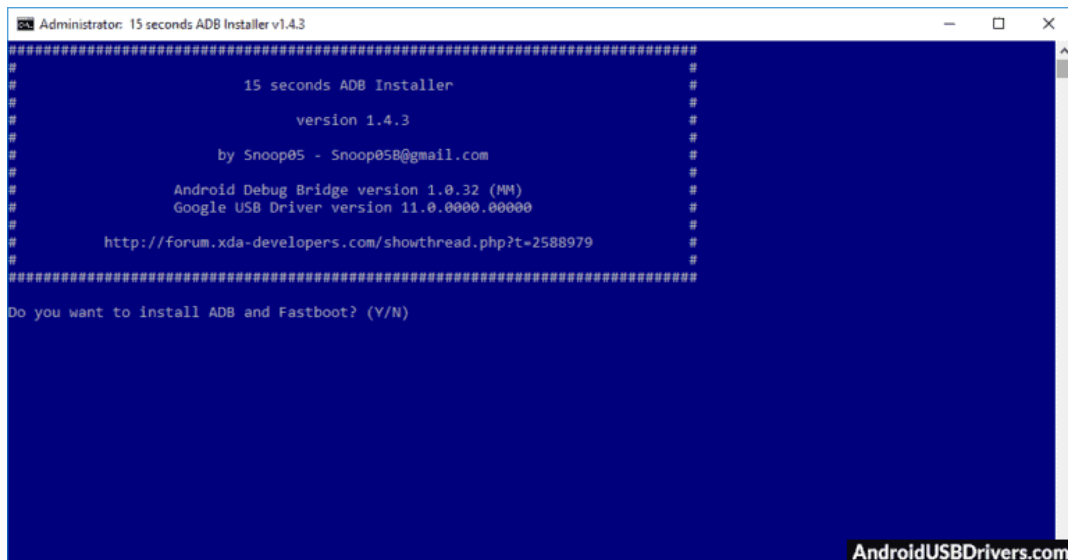

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/15-Seconds-ADB-Installer.png>)

2. Now, right-click on the **ADB driver installer** setup file and select **Run as administrator**.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Open-ADB-and-Fastboot-Installer.png>)

3. Now a **command prompt** window should load on your computer.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/ADB-and-Fastboot-installer.png>)

4. It should ask whether you want to **install ADB and Fastboot driver** on your computer. Press the **Y** key and then press **Enter**.
