Reddit (<https://www.reddit.com/submit?url=https%3A%2F%2Fwww.androidusbdrivers.com%2Fblu-c5l-usb-drivers%2F>)

Does your BLU C5L phone not connecting to a PC? or a Computer is not recognizing BLU C5L when connected using a USB cable? It can be because of the missing **BLU C5L USB Driver** or corrupted Android USB Driver. To fix the problem, **download BLU C5L USB Drivers** and install them on your Windows computer.

BLU USB Drivers (<https://www.androidusbdrivers.com/device/blu/>) are necessary to connect BLU C5L to a Computer or Laptop via USB data cable. On this page, you can download **official BLU C5L USB Drivers** for Windows 11, Windows 10, Windows 7, Windows 8.1, and Windows 8. Along with the **official USB Driver for BLU C5L**, we have also shared **BLU C5L ADB interface drivers and Fastboot drivers**.

BLU C5L Android USB Drivers helps in establishing a secure connection between your computer and mobile phone. It helps to transfer data like images, videos, documents, and other files to and from your mobile to computer through MTP (Media Transfer Protocol).

The **BLU C5L ADB driver and Fastboot driver** allow you to pass ADB commands and Fastboot commands from your computer to your phone and perform certain operations.

Download BLU C5L USB Driver

The BLU Mobile drivers (<https://www.androidusbdrivers.com/device/blu/>) shared here can be used to flash stock firmware, stock recovery, TWRP recovery, CWM recovery, unlock the bootloader, etc. They can also be used for general purposes like transferring media, documents, and other files to and from phone to computer.

How to Install BLU C5L USB Drivers Manually

1. Download the **latest_usb_driver_windows.zip** file on your computer and extract it on Desktop.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Google-Android-USB-Driver-extracted.png>)

2. **Open the Device Manager** on your computer by searching **device manager** from Windows Start Menu.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Device-Manager-Windows-Start-Menu-Search.png>)

3. Now click on your **Computer name** in the Device Manager window.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Device-Manager-Computer-Name.png>)

4. Now click on **Action** and then select **Add legacy hardware**.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Device-Manager-Add-legacy-hardware.png>)

5. **Add Hardware Wizard** window should open, click on **Next** to continue.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Add-Hardware-Wizard.png>)

6. Now select **Install the hardware that I manually select from a list (Advanced)** option and click on **Next**.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Install-Hardware-Manually.png>)

7. Select **Show All Devices** from the list and click on **Next**.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Show-all-Hardware-Devices.png>)

8. On the next screen, click on **Have Disk...** to open the **Install From Disk** window.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Add-Hardware-Have-Disk.png>)

9. Click on **Browse...** and navigate to the folder where you have extracted the drivers in **Step #1**.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Install-From-Disk-Browse.png>)

10. Now select **android_winusb.inf** file and click on **Open** and then on **OK**.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Google-Android-USB-Driver-inf.png>)

11. Select the **Android ADB Interface** driver from the list and click on **Next**.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Install-Android-ADB-Interface-Driver.png>)

12. Confirm the Hardware driver to install and click on **Next** to begin the installation process.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Android-ADB-Interface-Driver-Install.png>)

13. Once installed, click on **Finish**.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Android-ADB-Interface-Driver-Installed.png>)

14. Follow **Steps #3 to #13** again and install the **Android Bootloader Interface** driver and **Android Composite ADB Interface** driver.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Install-Android-Bootloader-Interface-Driver.png>)

15. Once all the listed drivers are installed, **restart** your computer.

How to Install BLU C5L ADB and Fastboot Drivers

1. Download and extract **15 seconds ADB installer** on your computer.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/15-Seconds-ADB-Installer.png>)

2. Now right click on the **adb driver installer** setup file (**adb-setup.exe**) and click on **Run as administrator**.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Open-ADB-and-Fastboot-Installer.png>)

3. Now a **command prompt** window with a blue background and white text should open.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/ADB-and-Fastboot-installer.png>)

4. It should ask whether you want to **install ADB and Fastboot**? Press the **Y** key on your keyboard and hit **Enter**.
