Reddit (<https://www.reddit.com/submit?url=https%3A%2F%2Fwww.androidusbdrivers.com%2Fblu-tank-extreme-4-0-usb-drivers%2F>)

Does your BLU Tank Extreme 4.0 phone not connecting to a PC? or a Computer is not recognizing BLU Tank Extreme 4.0 when connected using a USB cable? It can be because of the missing **BLU Tank Extreme 4.0 USB Driver** or corrupted Android USB Driver. To fix the problem, **download BLU Tank Extreme 4.0 USB Drivers** and install them on your Windows computer.

BLU USB Drivers (<https://www.androidusbdrivers.com/device/blu/>) are necessary to connect BLU Tank Extreme 4.0 to a Computer or Laptop via USB data cable. On this page, you can download **official BLU Tank Extreme 4.0 USB Drivers** for Windows 11, Windows 10, Windows 7, Windows 8.1, and Windows 8. Along with the **official USB Driver for BLU Tank Extreme 4.0**, we have also shared **BLU Tank Extreme 4.0 ADB interface drivers and Fastboot drivers**.

BLU Tank Extreme 4.0 Android USB Drivers helps in establishing a secure connection between your computer and mobile phone. It helps to transfer data like images, videos, documents, and other files to and from your mobile to computer through MTP (Media Transfer Protocol).

The **BLU Tank Extreme 4.0 ADB driver and Fastboot driver** allow you to pass ADB commands and Fastboot commands from your computer to your phone and perform certain operations.

Download BLU Tank Extreme 4.0 USB Driver

The BLU Mobile drivers (<https://www.androidusbdrivers.com/device/blu/>) shared here can be used to flash stock firmware, stock recovery, TWRP recovery, CWM recovery, unlock the bootloader, etc. They can also be used for general purposes like transferring media, documents, and other files to and from phone to computer.

How to Install BLU Tank Extreme 4.0 CDC Drivers

1. Download and extract the **android-cdc-driver.zip** file on your computer.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Android-CDC-Driver.png>)

2. **Open Device Manager** on your computer by right-clicking the **Windows Start Button** and selecting **Device Manager**.

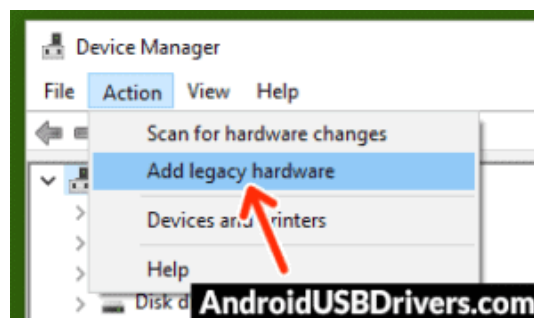

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Windows-Start-Button-Device-Manager.png>)

3. Once the Device Manager loads, click on your **Computer name**.

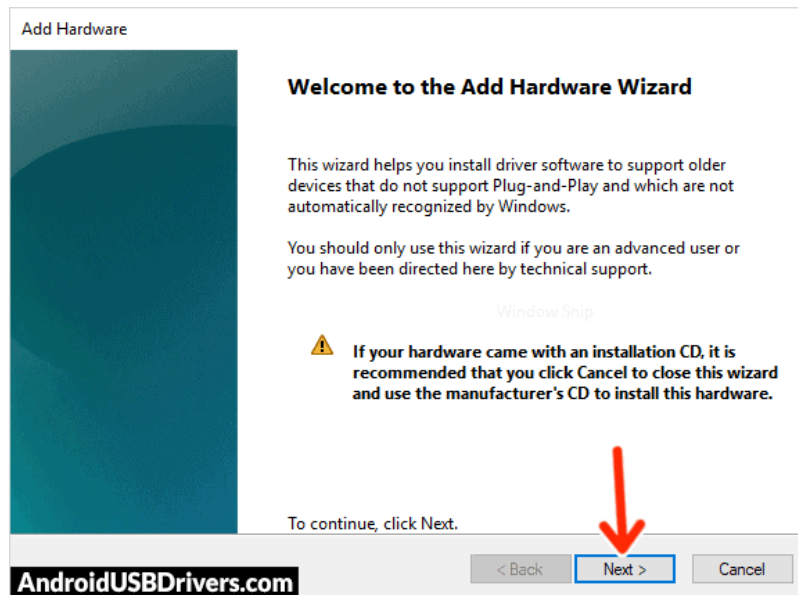

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Device-Manager-Computer-Name.png>)

4. Now click on **Action** and then on **Add legacy hardware**.

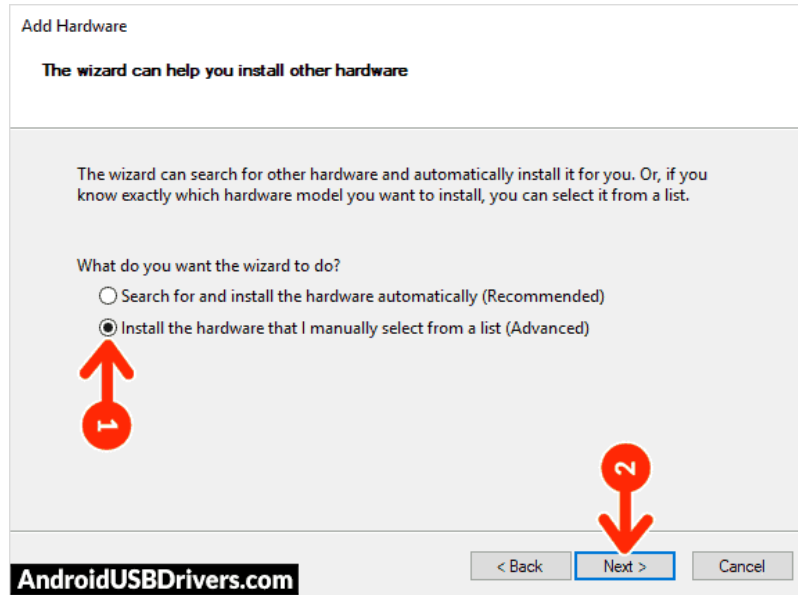

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Device-Manager-Add-legacy-hardware.png>)

5. Now **Add Hardware Wizard** window should open. Click **Next** to continue.

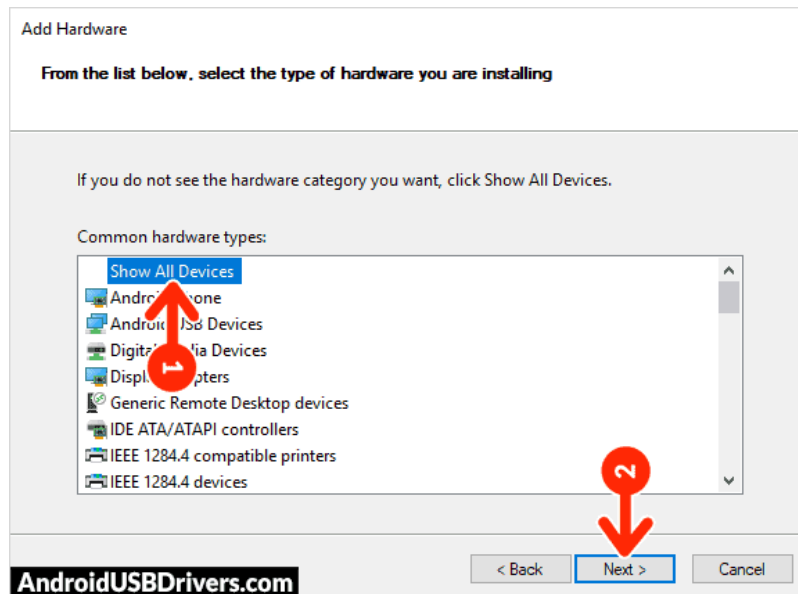

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Add-Hardware-Wizard.png>)

6. Now select **Install the hardware that I manually select from a list (Advanced)** option and click on **Next**.

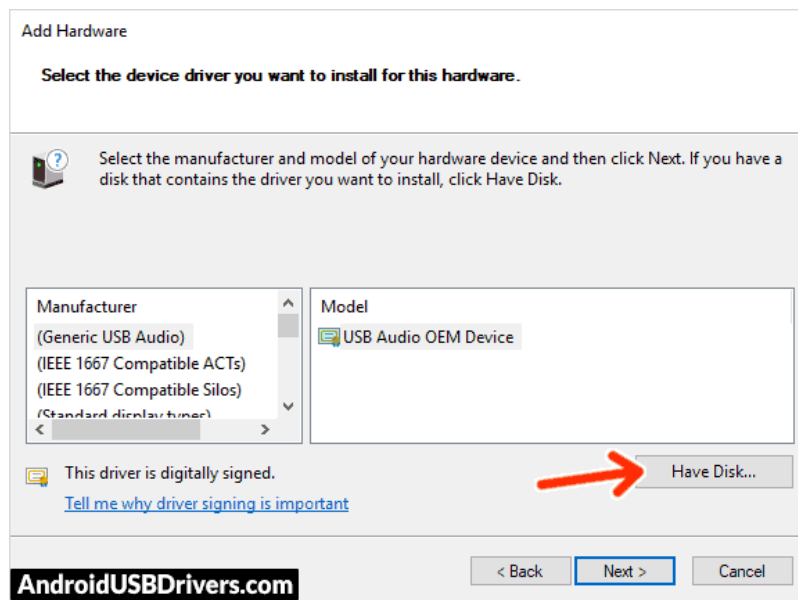

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Install-Hardware-Manually.png>)

7. In the next screen, select **Show All Devices** from the list and click on **Next**.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Show-all-Hardware-Devices.png>)

8. Now click on **Have Disk...** to launch **Install From Disk** window.

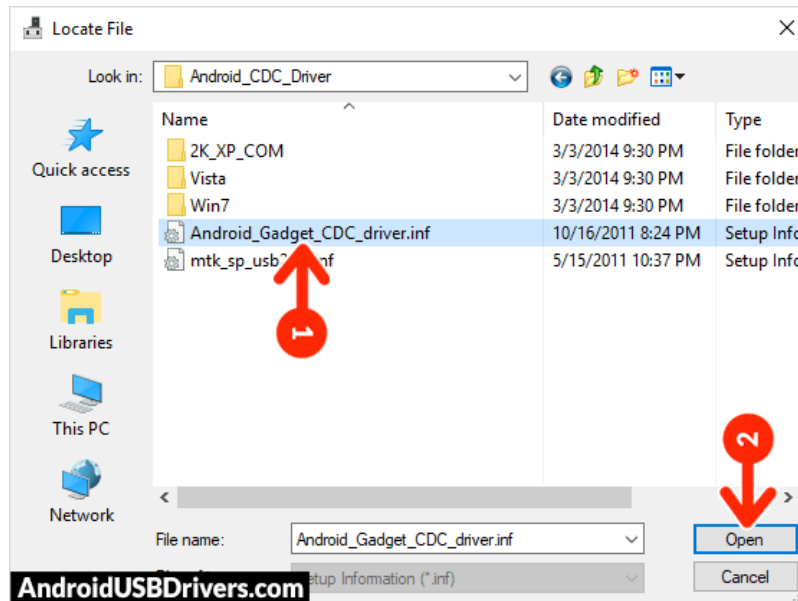

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Add-Hardware-Have-Disk.png>)

9. Click on **Browse...** and navigate to the folder where you have extracted the Android CDC drivers in **Step #1**.

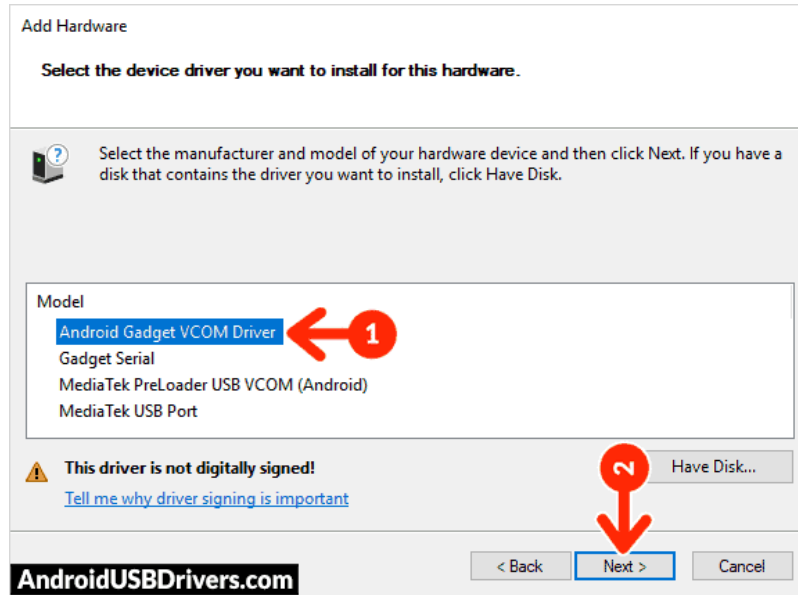

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Install-From-Disk-Browse.png>)

10. Now select **Android_Gadget_CDC_driver.inf** file and click on **Open** and then on **OK**.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Android-Gadget-CDC-driver-inf.png>)

11. Select **Android Gadget VCOM Driver** from the list and click on Next.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Install-Android-Gadget-CDC-VCOM-Driver.png>)

12. Confirm the Hardware driver to install and click on **Next** to begin the installation process.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Install-Android-CDC-Driver.png>)

13. Once installed, click on **Finish**.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Android-CDC-VCOM-Driver-Installed.png>)

14. Follow **Steps #3 to #13** again and install the **Gadget Serial, MediaTek PreLoader USB VCOM (Android),** and **MediaTek USB Port** drivers.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Install-Android-CDC-Gadget-Serial-driver.png>)

15. Once all the listed drivers are installed, **reboot** your computer.

How to Install BLU Tank Extreme 4.0 VCOM Drivers

1. Download and extract the latest **Android VCOM Driver (android-vcom-driver.zip)** file to Desktop on your computer.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Android-VCOM-Drivers.png>)

2. Now **open the Device Manager** on your computer by right-clicking **Windows Start Button** and selecting **Device Manager**.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Windows-Start-Button-Device-Manager.png>)

3. Now click on your **Computer name** in the Device Manager window.

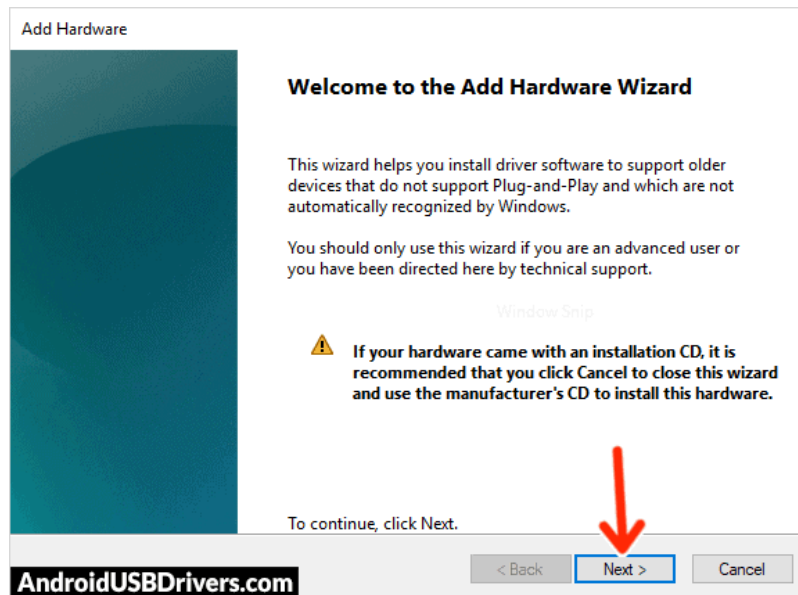

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Device-Manager-Computer-Name.png>)

4. Now click on **Action** and then click on **Add legacy hardware**.

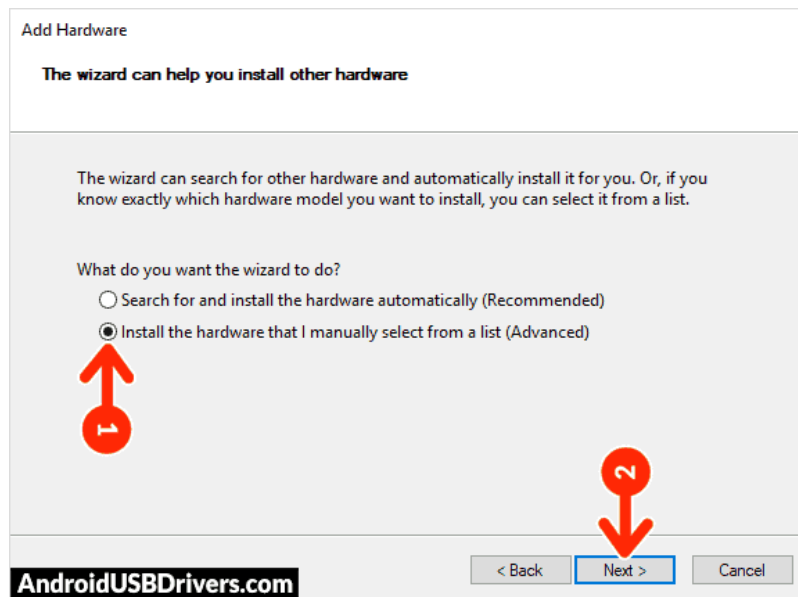

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Device-Manager-Add-legacy-hardware.png>)

5. Now **Add Hardware Wizard** window should open. Click on **Next** to continue.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Add-Hardware-Wizard.png>)

6. Select **Install the hardware that I manually select from a list (Advanced)** option and click on **Next**.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Install-Hardware-Manually.png>)

7. Select **Show All Devices** from the list and click on **Next**.

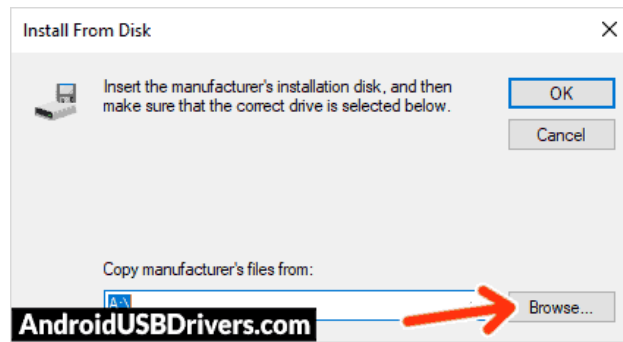

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Show-all-Hardware-Devices.png>)

8. In the next screen, click on **Have Disk...** to open the **Install From Disk** window.

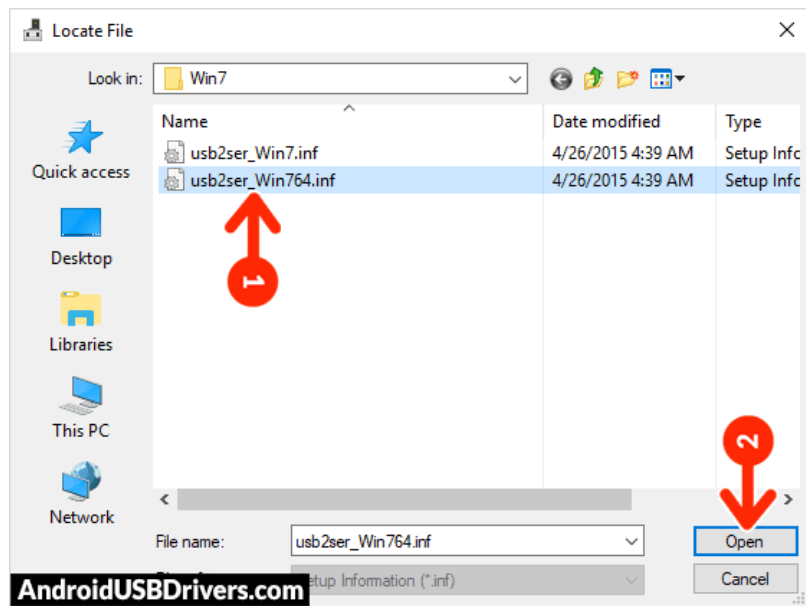

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Add-Hardware-Have-Disk.png>)

9. In the Install From Disk window, click on **Browse...** and navigate to the folder where you have extracted the drivers in **Step #1**.

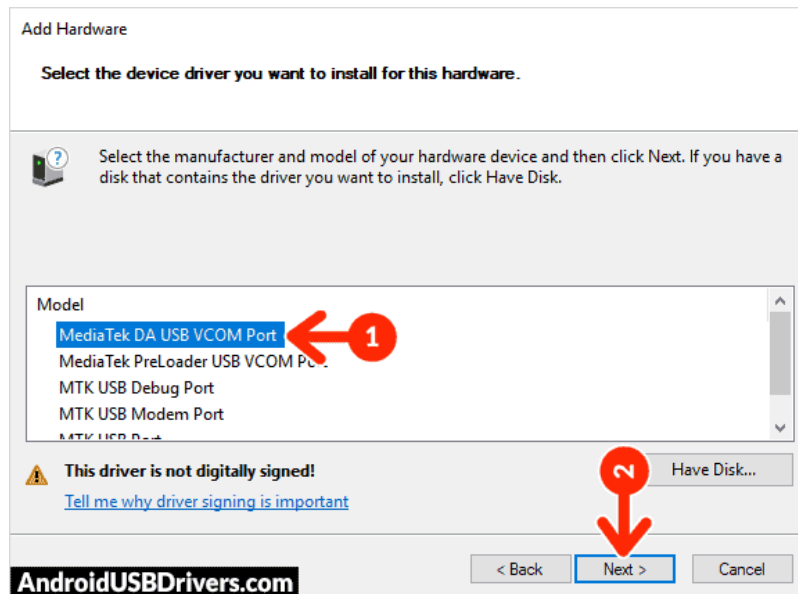

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Install-From-Disk-Browse.png>)

10. Now open **Win 7** folder and select **usb2ser_Win764.inf** driver file if you have the **64-bit version of Windows**, otherwise choose **usb2ser_Win7.inf** file if you have the **32-bit version of Windows**. When selected, click on **Open** and then on **OK**.

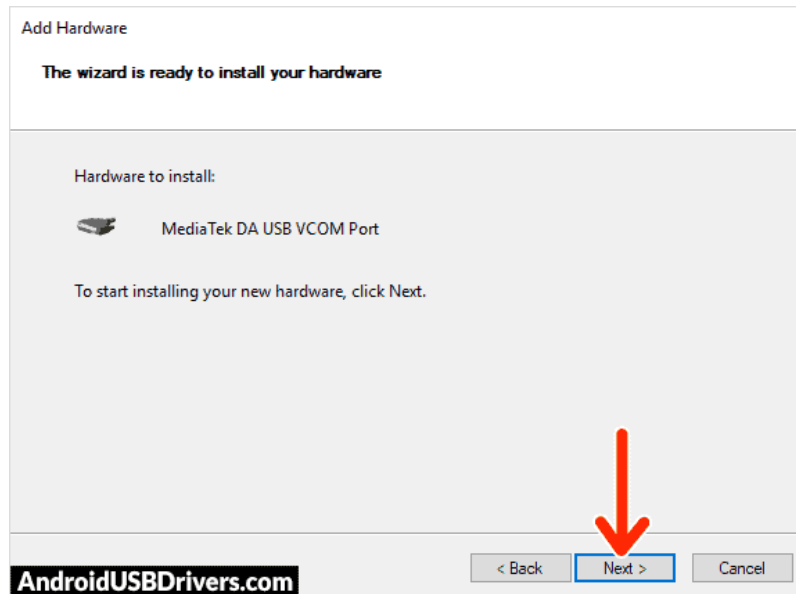

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Android-VCOM-Driver-inf.png>)

11. Now select the **MediaTek DA USB VCOM Port** from the list and click on **Next**.

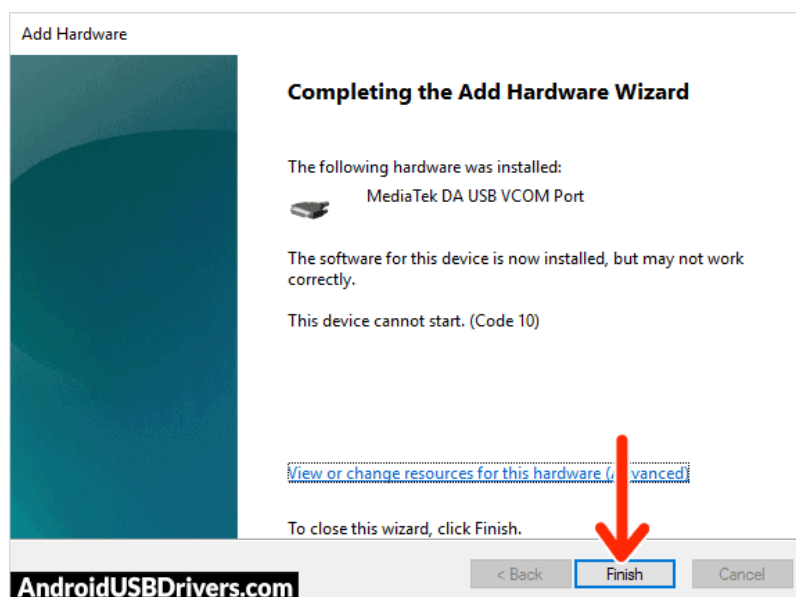

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Install-MediaTek-DA-USB-VCOM-Port.png>)

12. Confirm the Hardware driver to install and click on **Next** to begin the installation process.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Install-Android-VCOM-Driver.png>)

13. Once installed, click on **Finish**.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Android-VCOM-Driver-installed.png>)

14. Follow **Steps #3 to #13** again and install the **MediaTek PreLoader USB VCOM Port**, **MTK USB Debug Port**, **MTK USB Modem Port**, and **MTK USB Port** drivers.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Install-MediaTek-PreLoader-USB-VCOM-Port.png>)

15. Once all the listed drivers are installed, **restart** your computer.

How to Install BLU Tank Extreme 4.0 USB Drivers Manually

1. Download the **latest_usb_driver_windows.zip** file on your computer and extract it on Desktop.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Google-Android-USB-Driver-extracted.png>)

2. **Open the Device Manager** on your computer by searching **device manager** from Windows Start Menu.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Device-Manager-Windows-Start-Menu-Search.png>)

3. Now click on your **Computer name** in the Device Manager window.

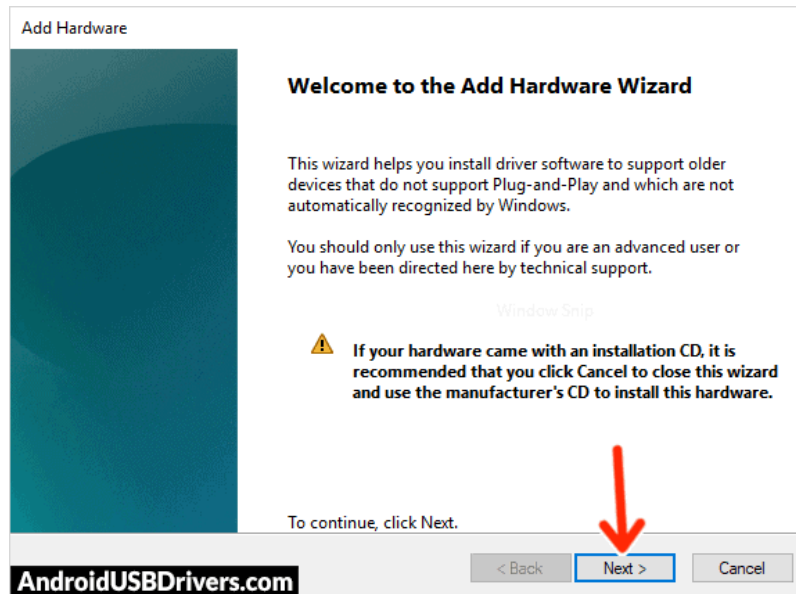

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Device-Manager-Computer-Name.png>)

4. Now click on **Action** and then select **Add legacy hardware**.

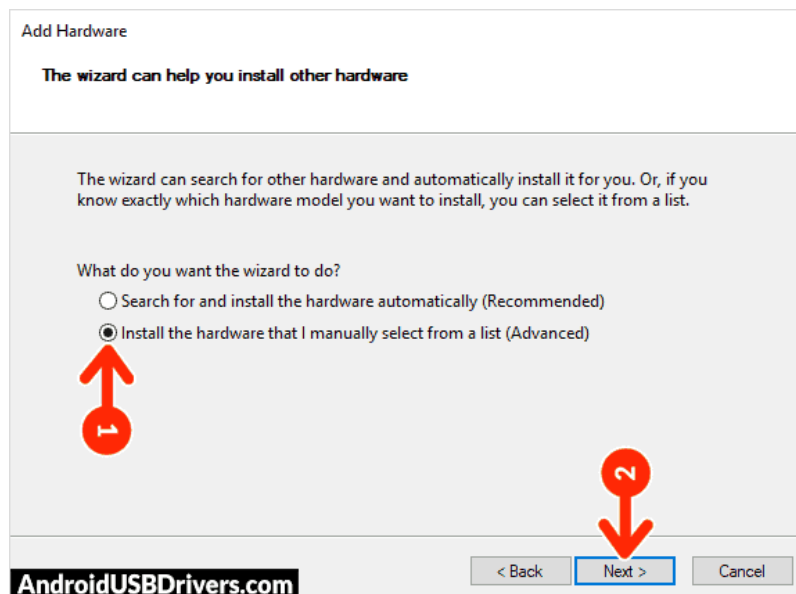

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Device-Manager-Add-legacy-hardware.png>)

5. **Add Hardware Wizard** window should open, click on **Next** to continue.

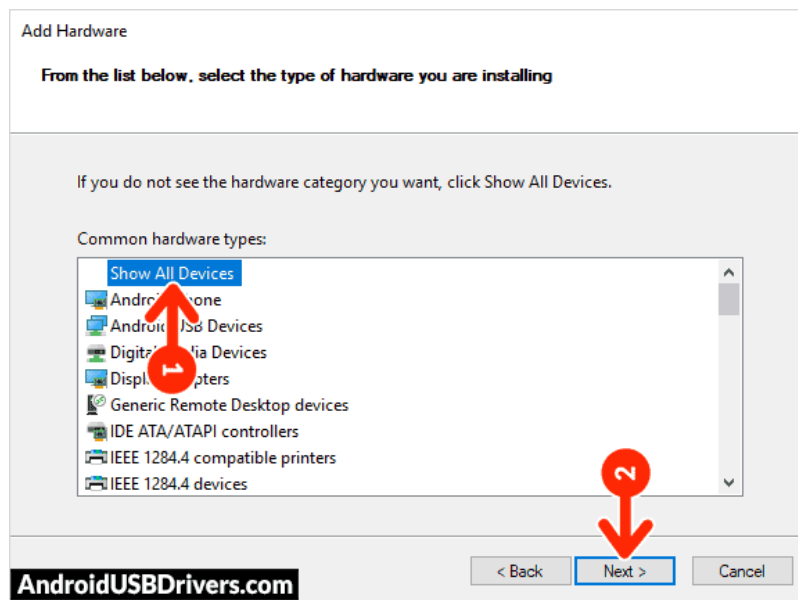

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Add-Hardware-Wizard.png>)

6. Now select **Install the hardware that I manually select from a list (Advanced)** option and click on **Next**.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Install-Hardware-Manually.png>)

7. Select **Show All Devices** from the list and click on **Next**.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Show-all-Hardware-Devices.png>)

8. On the next screen, click on **Have Disk...** to open the **Install From Disk** window.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Add-Hardware-Have-Disk.png>)

9. Click on **Browse...** and navigate to the folder where you have extracted the drivers in **Step #1**.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Install-From-Disk-Browse.png>)

10. Now select **android_winusb.inf** file and click on **Open** and then on **OK**.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Google-Android-USB-Driver-inf.png>)

11. Select the **Android ADB Interface** driver from the list and click on **Next**.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Install-Android-ADB-Interface-Driver.png>)

12. Confirm the Hardware driver to install and click on **Next** to begin the installation process.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Android-ADB-Interface-Driver-Install.png>)

13. Once installed, click on **Finish**.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Android-ADB-Interface-Driver-Installed.png>)

14. Follow **Steps #3 to #13** again and install the **Android Bootloader Interface** driver and **Android Composite ADB Interface** driver.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Install-Android-Bootloader-Interface-Driver.png>)

15. Once all the listed drivers are installed, **restart** your computer.
