Windows computer not recognizing Blu C5L Max Phone? Or Blu C5L Max android phone won't connect to the PC? It can be the result of missing **Blu C5L Max USB drivers** or bad or corrupted drivers. To fix Blu C5L Max Android phone not showing up on PC, **download the Blu C5L Max USB driver** and install it on your computer.

BLU USB drivers (<https://www.androidusbdrivers.com/device/blu/>) are essential to efficiently connect Blu C5L Max to Computer and Laptop using a USB cable. On this page, we have managed to share the **official Blu C5L Max USB driver** for Windows 11, Windows 10, Windows 7, Windows 8.1, and Windows 8. Apart from the **official USB Driver for Blu C5L Max**, we have also shared **Blu C5L Max ADB interface drivers and Fastboot drivers**.

The **Blu C5L Max Android USB driver** allows you to connect your phone as an MTP USB device (Media Transfer Protocol) to the computer so that you can transfer images, videos, documents, and other files between the phone and computer. Thus it will fix the android file transfer not working issue.

The **Blu C5L Max ADB driver and Fastboot driver** allow you to pass ADB and Fastboot commands from the PC to perform certain operations on your phone.

Download Blu C5L Max USB Driver

The BLU mobile drivers (<https://www.androidusbdrivers.com/device/blu/>) offered here can be used to flash stock firmware, stock recovery, TWRP recovery, CWM Recovery, Unlocking Bootloader, etc. It can also be used for general purposes like transferring media and files to and from mobile to PC.

How to Install Blu C5L Max SPD Unisoc Drivers

1. Download the **Spreadtrum SPD Unisoc USB Driver** package and extract it on your computer.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/11/SPD-UNISOC-Driver-extracted.png>)

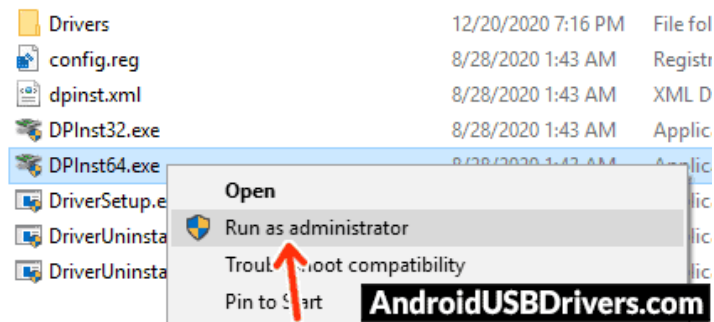

2. Once the **SPD Unisoc Driver** package is extracted, open the **Win7**, **Win8**, or **Win10** folder, depending on your **Windows OS version**.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/11/Win-7-Win-8-Win-10-driver-folders.png>)

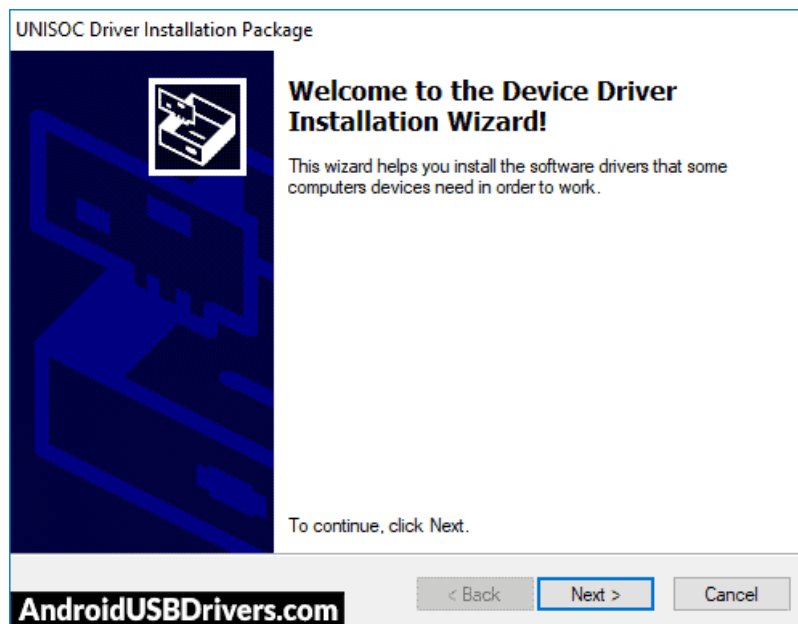

3. Run **DPIInst64.exe** as administrator if you have a **64-bit** system; otherwise, run **DPIInst32.exe** as administrator if you have a **32-bit** system. You can check your **System Type** by pressing **Windows** and

Pause keys together.

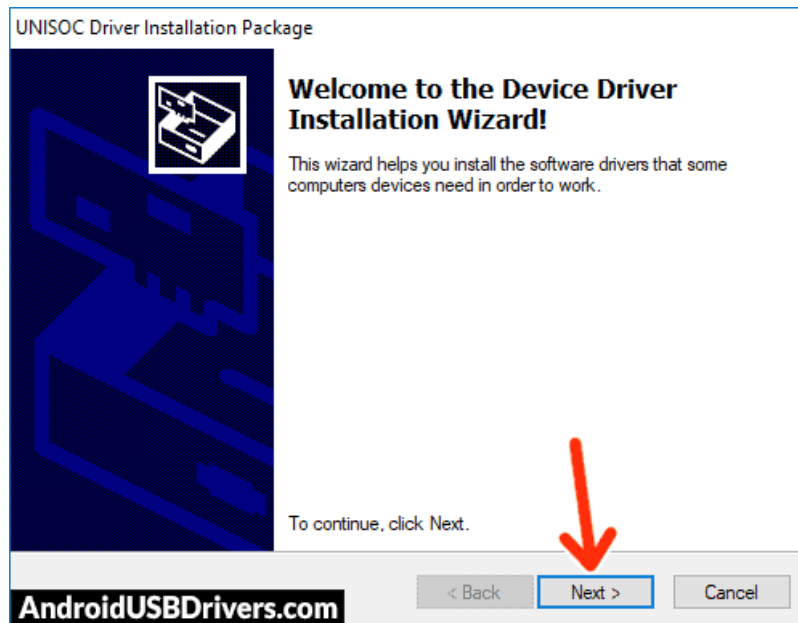

(<https://www.androidusbdriivers.com/wp-content/uploads/2021/11/Run-Driver-Package-Installer-DPIInst64.png>)

4. Now, the **UNISOC Driver Installation Package** installer should launch on your computer.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/11/UNISOC-Driver-Installation-Package-Wizard-window.png>)

5. Click on **Next** to proceed with the **SPD Unisoc Driver** installation process.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/11/UNISOC-Driver-Installation-Package-Wizard-window-Next.png>)

6. Click on **Finish** when the driver installation process is completed.

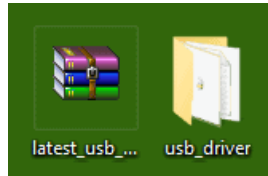

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/11/SPD-UNISOC-Drivers-Installed-Successfully.png>)

7. Finally, **reboot your computer**.

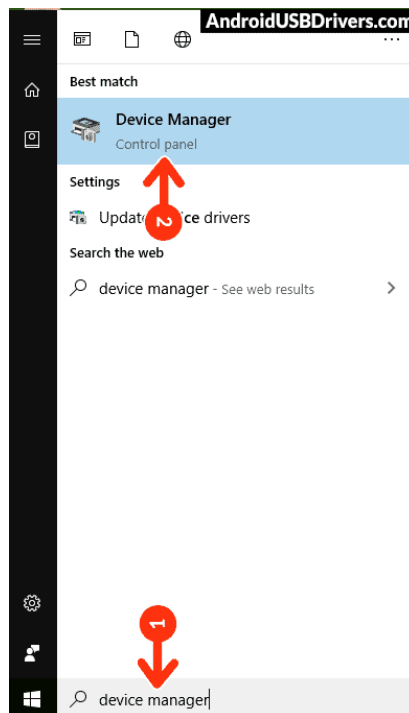

How to Install Blu C5L Max USB Drivers Manually

1. Download and extract the **latest_usb_driver_windows.zip** to Desktop on your computer.

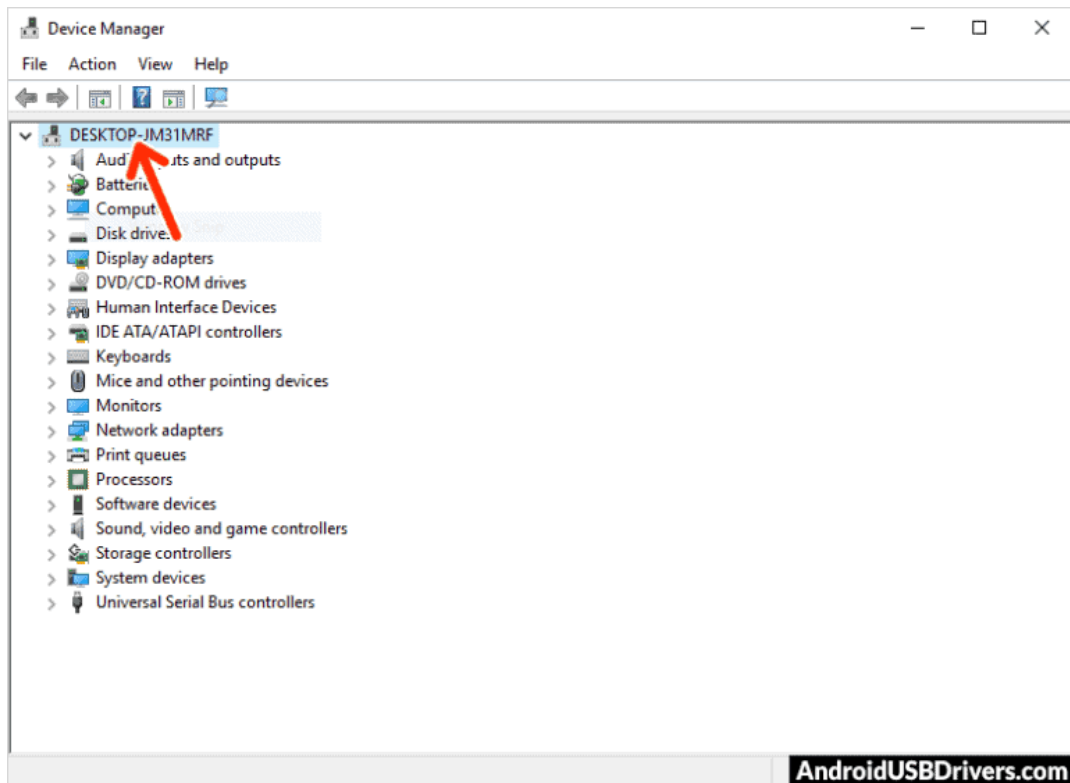

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Google-Android-USB-Driver-extracted.png>)

2. **Open the Device Manager** on your computer by searching **device manager (devmgmt.msc)** from Windows Start Menu.

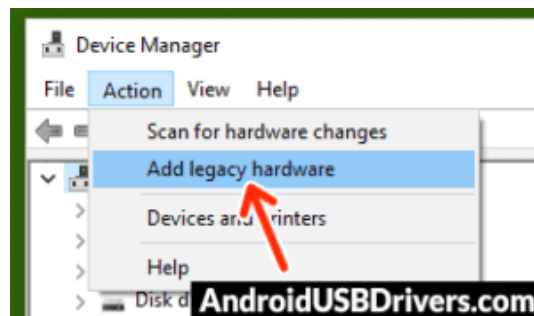

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Device-Manager-Windows-Start-Menu-Search.png>)

3. When the Device Manager window opens, click on your **Computer name**.

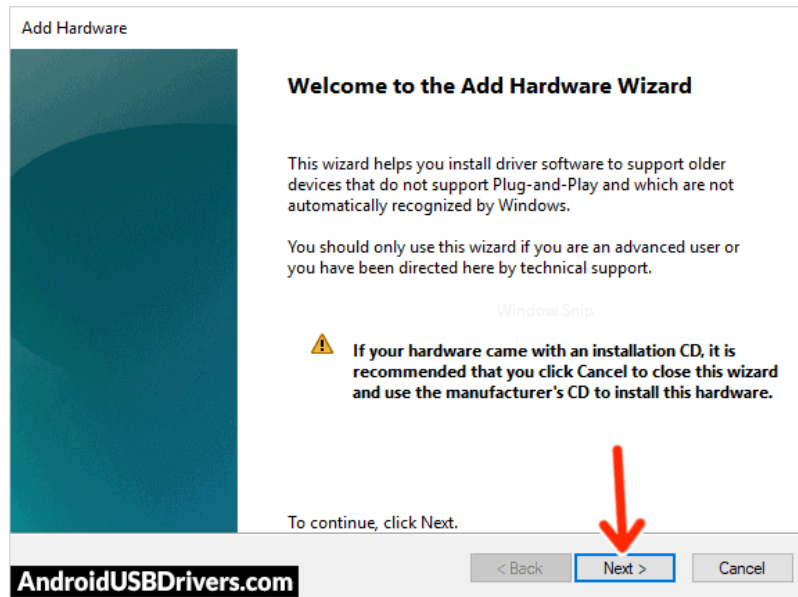

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Device-Manager-Computer-Name.png>)

4. Now click on **Action** and then click on **Add legacy hardware**.

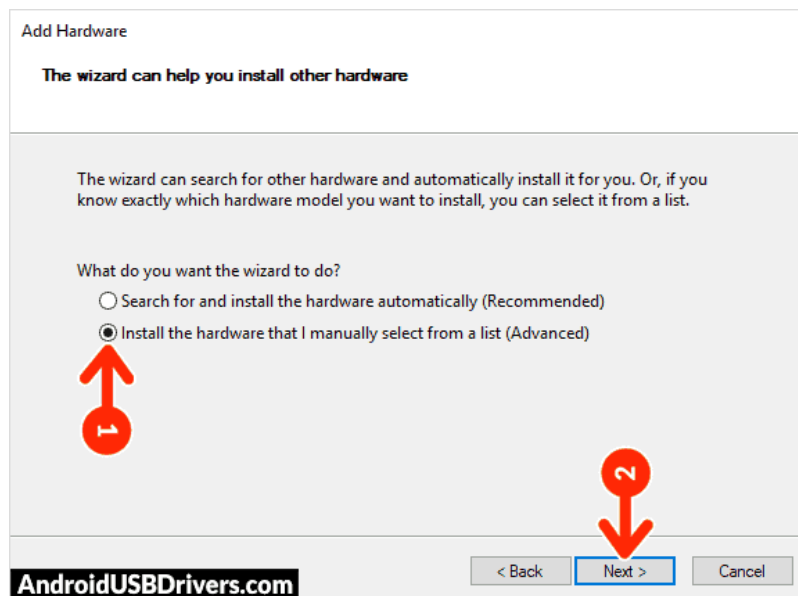

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Device-Manager-Add-legacy-hardware.png>)

5. Now **Add Hardware Wizard** window should open. Click on **Next** to continue.

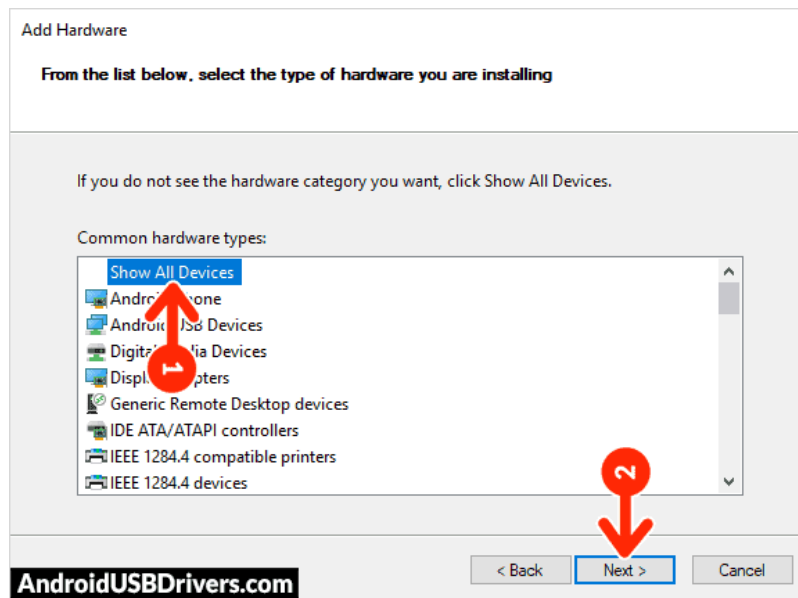

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Add-Hardware-Wizard.png>)

6. Now select **Install the hardware that I manually select from a list (Advanced)** option and click on **Next**.

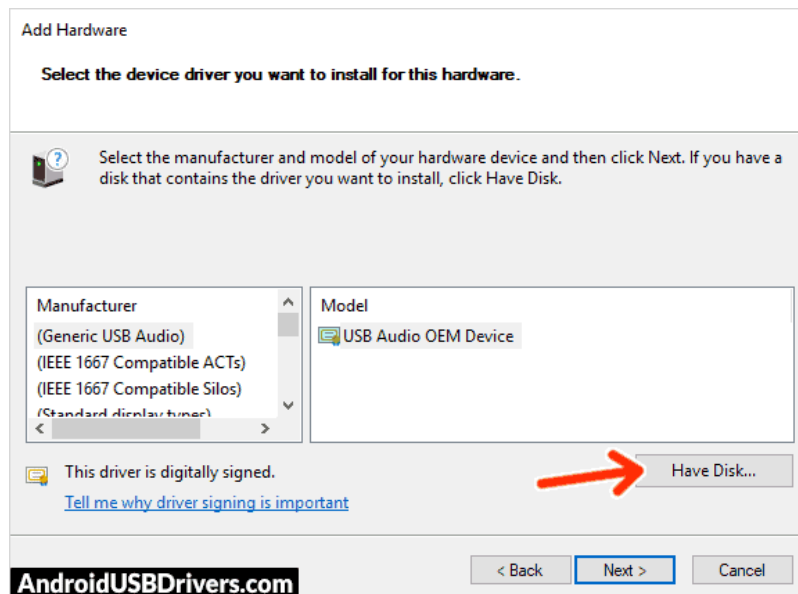

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Install-Hardware-Manually.png>)

7. Now click on **Show All Devices** from the list and click on **Next**.

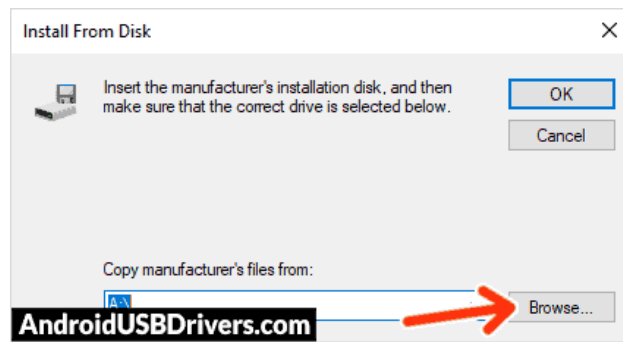

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Show-all-Hardware-Devices.png>)

8. Now click on **Have Disk...** to open the **Install From Disk** window.

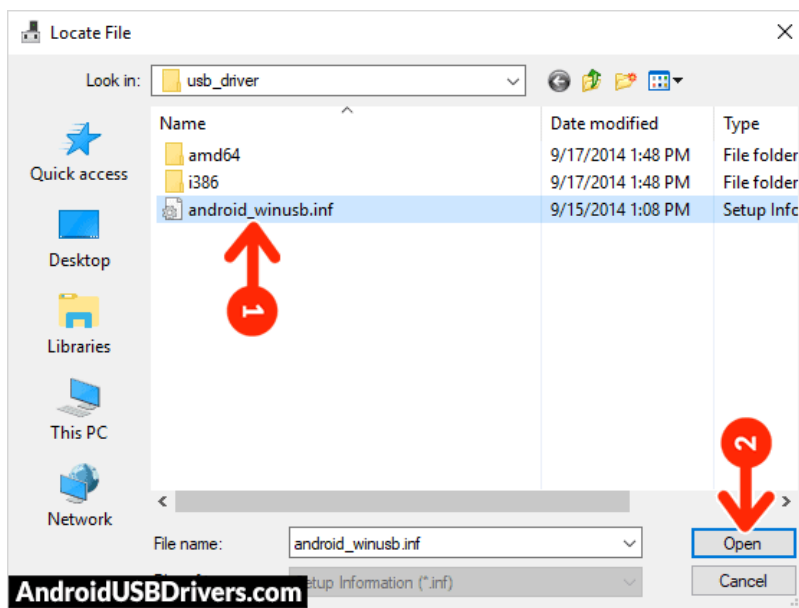

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Add-Hardware-Have-Disk.png>)

9. In the Install From Disk window, click on **Browse...** and navigate to the folder where you have extracted the drivers in **Step #1**.

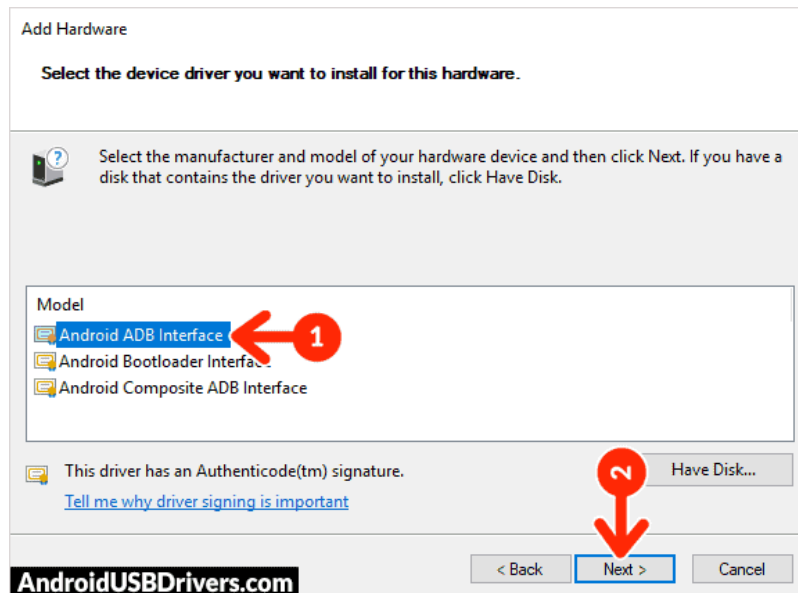

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Install-From-Disk-Browse.png>)

10. Now select **android_winusb.inf** driver file and click on **Open** and then on **OK**.

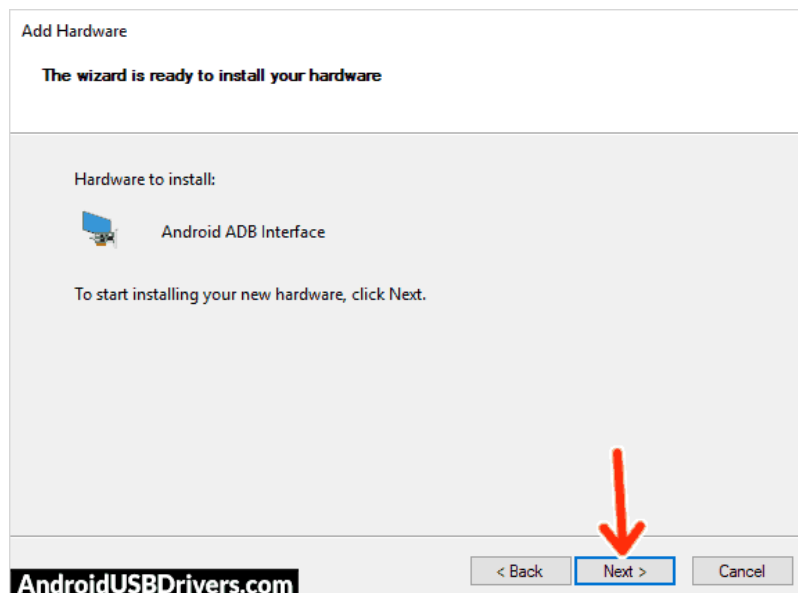

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Google-Android-USB-Driver-inf.png>)

11. Now select the **Android ADB Interface** driver from the list and click on **Next**.

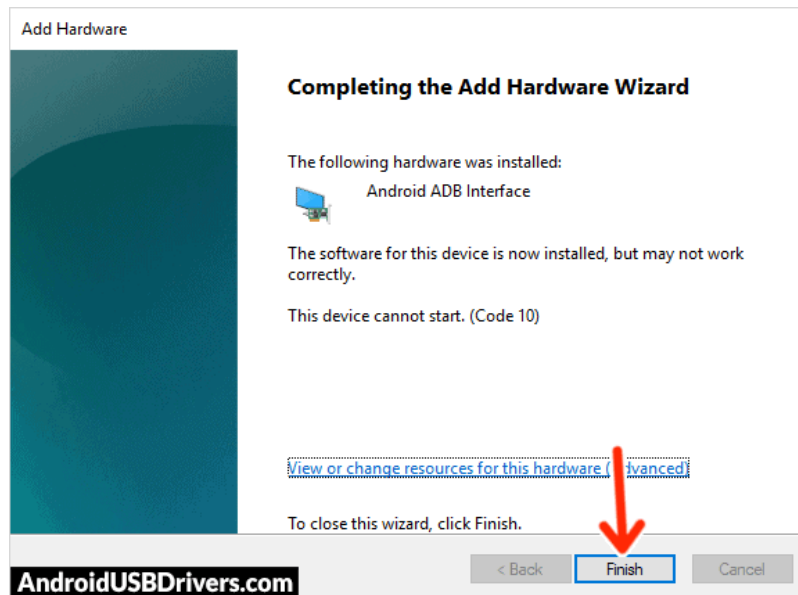

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Install-Android-ADB-Interface-Driver.png>)

12. In the next screen, confirm the Hardware driver to install and click on **Next** to begin the installation process.

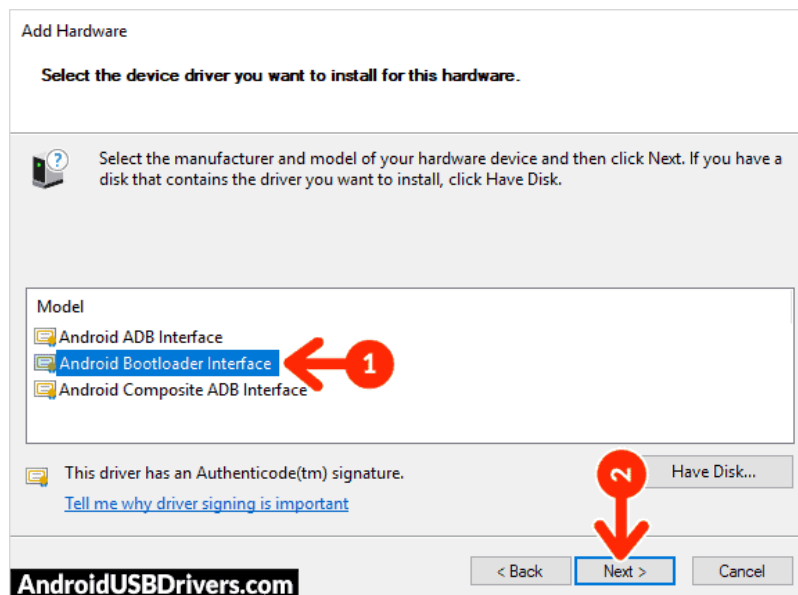

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Android-ADB-Interface-Driver-Install.png>)

13. Once installed, click on **Finish**.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Android-ADB-Interface-Driver-Installed.png>)

14. Follow **Steps #3 to #13** again and install the **Android Bootloader Interface** driver and **Android Composite ADB Interface** driver.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Install-Android-Bootloader-Interface-Driver.png>)

15. Once all the listed drivers are installed, **reboot** your computer.
