Factory Hard Reset is the process used to wipe all the data and settings on the phone and revert it back to factory defaults. It comes in handy during the situations when your device is working too slowly, facing software related issues, bypass the forgotten Pattern/PIN or Pass Code, etc. Here we have listed step by step instructions on how to Soft Reset and Factory Reset SKY Black.

Soft Reset is the process where there is no loss of data. The simple term for Soft Reset is *Reboot*. While on the other hand, Hard Reset deals with the loss of data as it wipes and cleans all the personal data and makes the device 100% clean. It is recommended to [backup data](http://bit.ly/2pg3MWZ) (<http://bit.ly/2pg3MWZ>) before proceeding to Hard Reset SKY Black.

Hard Reset is performed at the time of selling the device to others or during software issues and slowness. Soft Reset is performed to clear the RAM, and to clear the temporary cache, this frees the device from the sluggishness and offers the device a quick performance boost.

So, without any further ado, let's proceed to the instructions on how to Soft Reset and Factory Hard Reset SKY Black.
