Reddit (<https://www.reddit.com/submit?url=https%3A%2F%2Fwww.androidusbdrivers.com%2Fsky-limo-x2-usb-drivers%2F>)

Facing trouble connecting Sky Limo X2 to a computer using a USB cable? Computer not recognizing USB when Sky Limo X2 is connected to PC? It might be because of the missing **Sky Limo X2 USB drivers** or bad or corrupted drivers. To fix the Sky Limo X2 not showing up on the computer, **download Sky Limo X2 USB Drivers** and install them on your Windows computer.

Most computers don't have proper Google Android USB Drivers installed, so it is required to download Sky USB Drivers (<https://www.androidusbdrivers.com/device/sky/>) and install them on your computer. Once the Sky drivers (<https://www.androidusbdrivers.com/device/sky/>) are installed, we can adequately connect Sky Limo X2 to the Computer or Laptop using a USB data cable. You can download **official USB Drivers for Sky Limo X2** along with ADB interface drivers and fastboot drivers on this page.

With **Sky Limo X2 Android USB Drivers** installed, we can establish a secure connection between a computer and a smartphone. It helps transfer files and data like images, videos, and documents between the computer and the mobile phone through MTP (Media Transfer Protocol).

With the **Sky Limo X2 ADB driver and Fastboot driver**, we can pass ADB commands and Fastboot commands to the phone from the computer via Command Prompt (CMD) and perform certain operations.

Download Sky Limo X2 USB Driver

The Sky Mobile Phone drivers (<https://www.androidusbdrivers.com/device/sky/>) provided here can be used to flash stock firmware, stock recovery, TWRP recovery, CWM recovery, Unlocking Bootloader, etc. They can also be used for common purposes like transferring media, files, and documents to and from phone to computer.

How to Install Sky Limo X2 USB Drivers Manually

1. Download and extract the latest **Android USB Driver (latest_usb_driver_windows.zip)** file to Desktop on your computer.

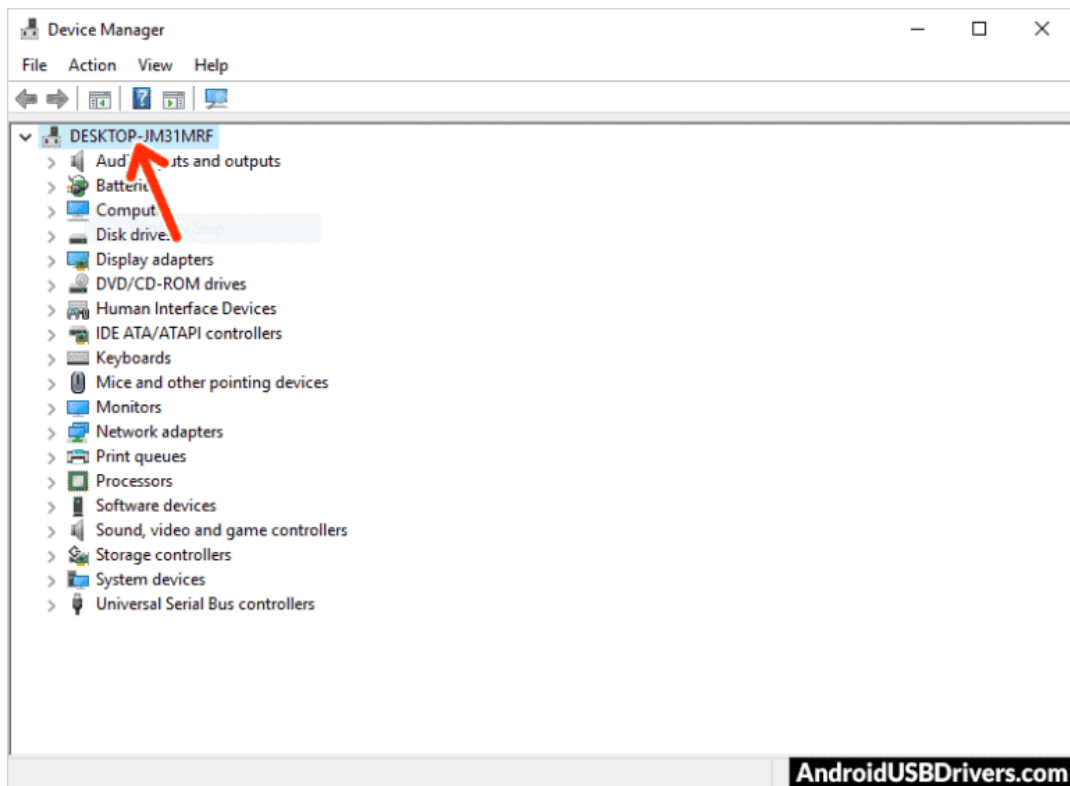

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Google-Android-USB-Driver-extracted.png>)

2. Now **open the Device Manager** on your computer by right-clicking **Windows Start Button** and selecting **Device Manager**.

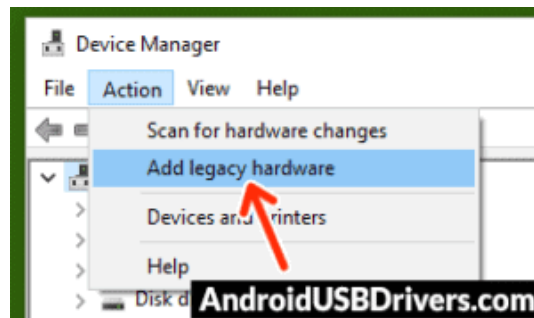

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Windows-Start-Button-Device-Manager.png>)

3. Now click on your **Computer name** in the Device Manager window.

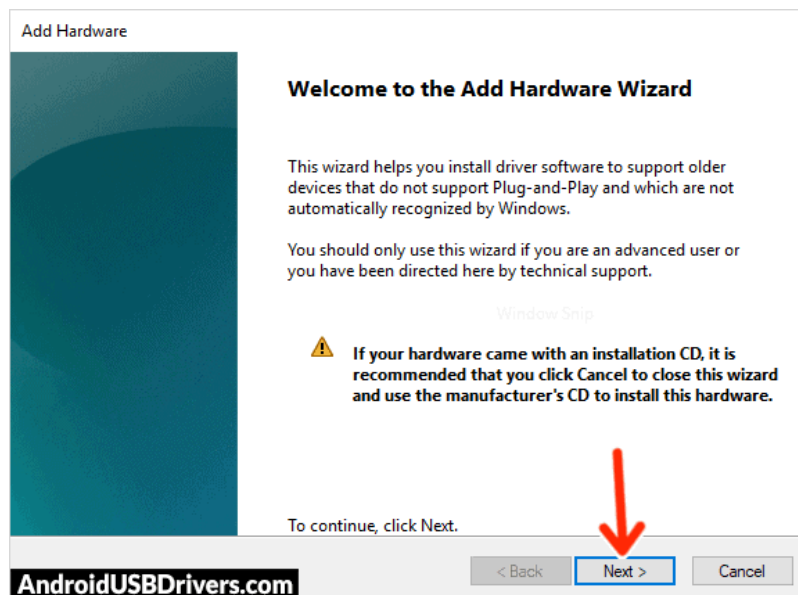

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Device-Manager-Computer-Name.png>)

4. Now click on **Action** and then click on **Add legacy hardware**.

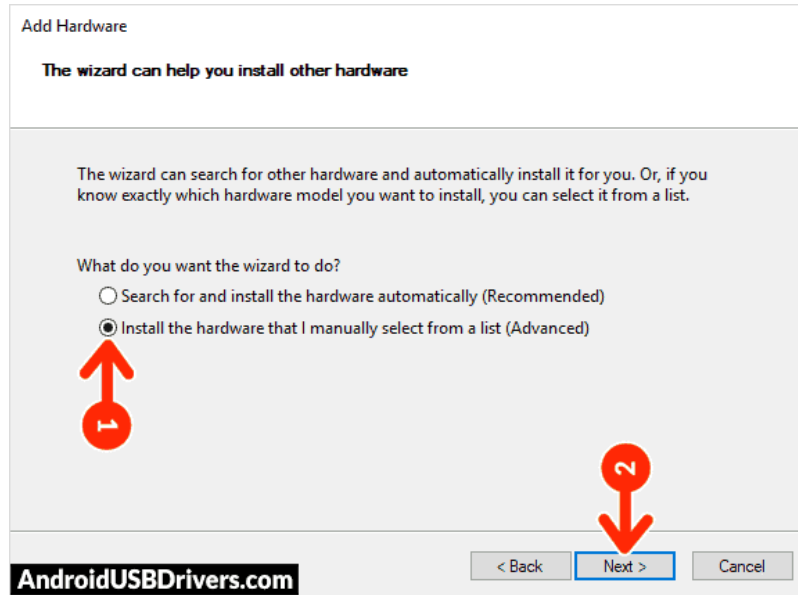

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Device-Manager-Add-legacy-hardware.png>)

5. Now **Add Hardware Wizard** window should open. Click on **Next** to continue.

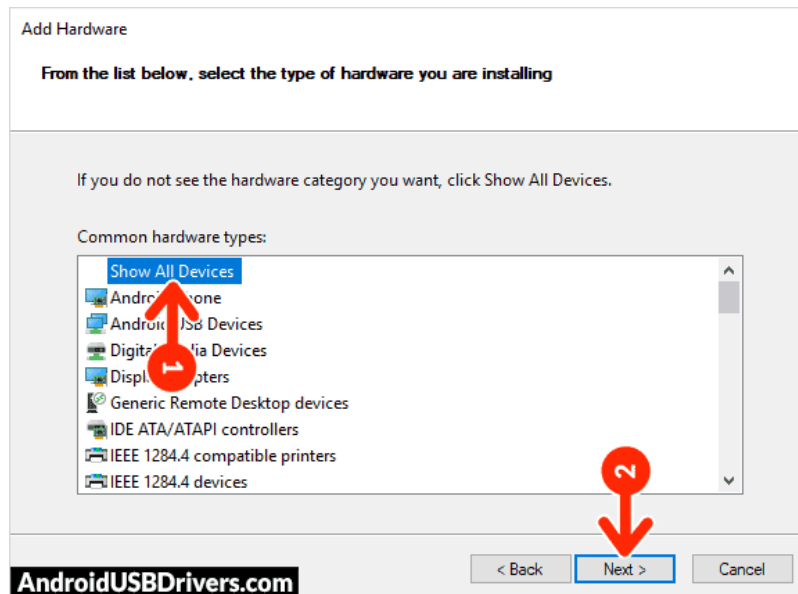

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Add-Hardware-Wizard.png>)

6. Select **Install the hardware that I manually select from a list (Advanced)** option and click on **Next**.

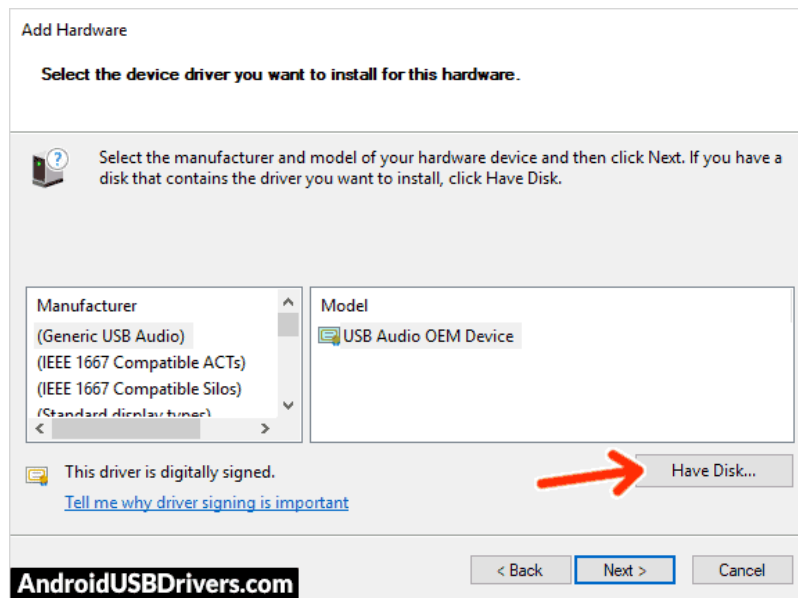

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Install-Hardware-Manually.png>)

7. Select **Show All Devices** from the list and click on **Next**.

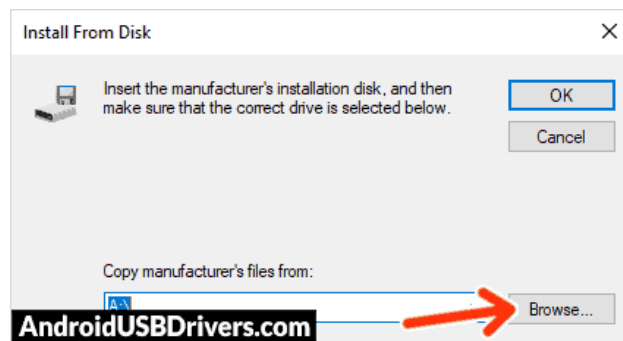

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Show-all-Hardware-Devices.png>)

8. In the next screen, click on **Have Disk...** to open the **Install From Disk** window.

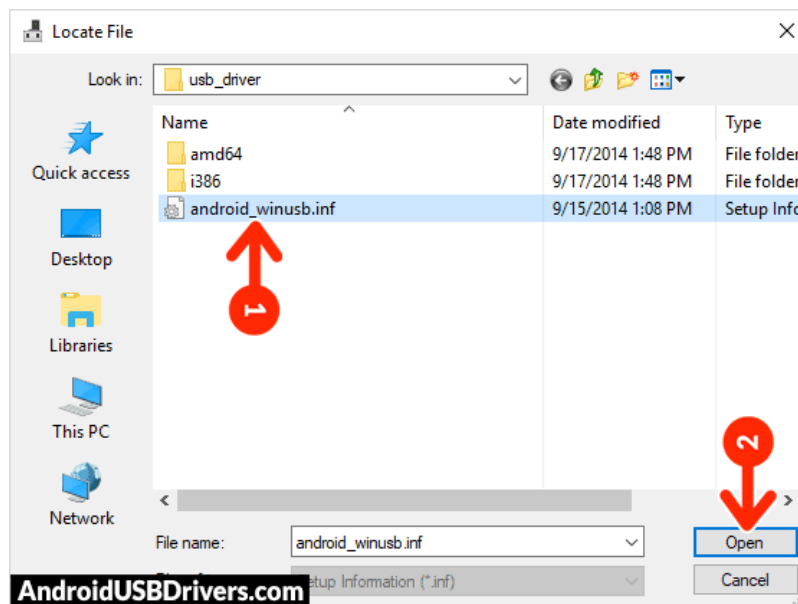

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Add-Hardware-Have-Disk.png>)

9. In the Install From Disk window, click on **Browse...** and navigate to the folder where you have extracted the drivers in **Step #1**.

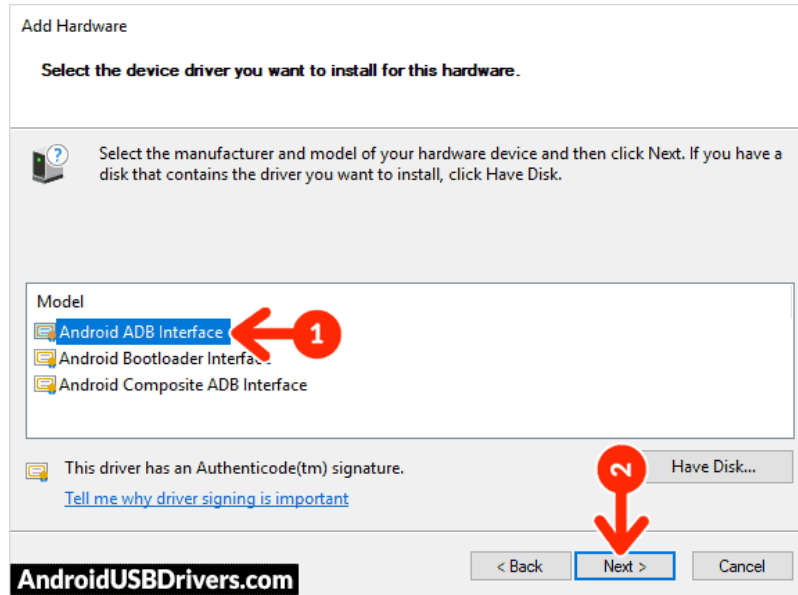

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Install-From-Disk-Browse.png>)

10. Now select **android_winusb.inf** driver file and click on **Open** and then on **OK**.

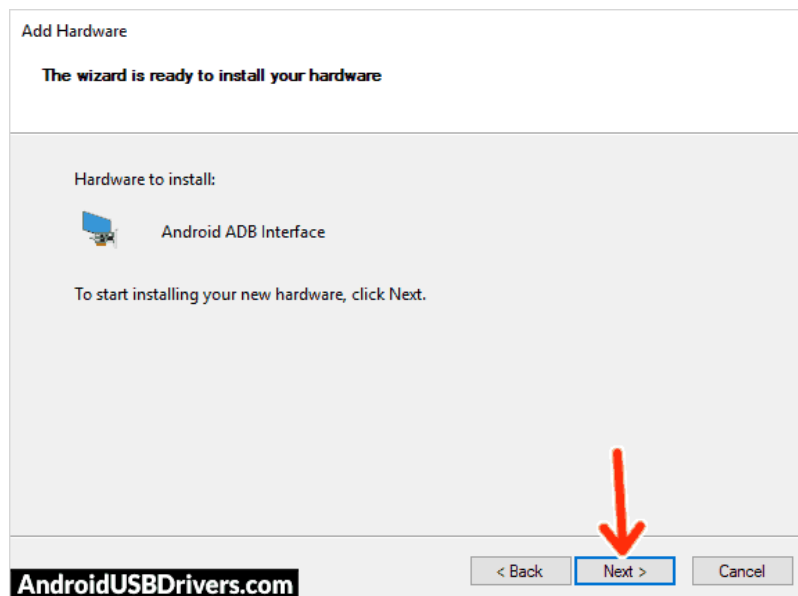

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Google-Android-USB-Driver-inf.png>)

11. Now select the **Android ADB Interface** driver from the list and click on **Next**.

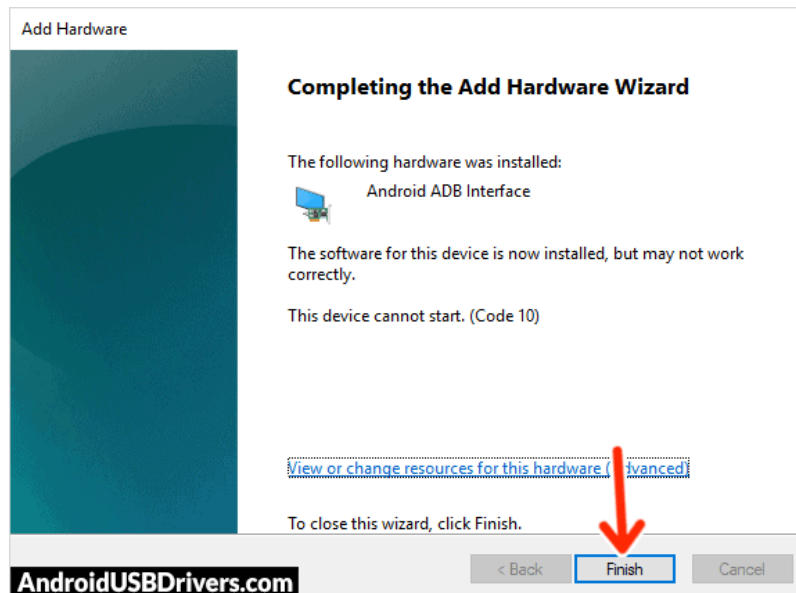

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Install-Android-ADB-Interface-Driver.png>)

12. Confirm the Hardware driver to install and click on **Next** to begin the installation process.

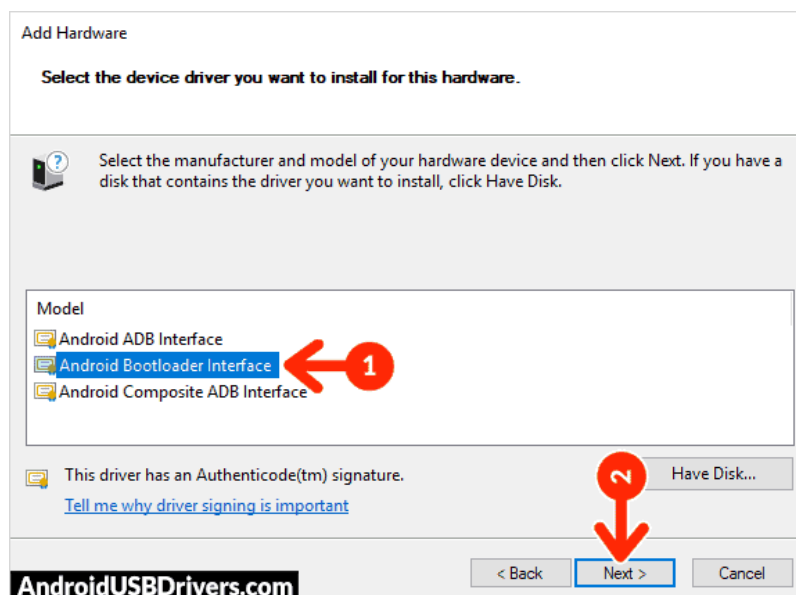

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Android-ADB-Interface-Driver-Install.png>)

13. Once installed, click on **Finish**.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Android-ADB-Interface-Driver-Installed.png>)

14. Follow **Steps #3 to #13** again and install the **Android Bootloader Interface** driver and **Android Composite ADB Interface** driver.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Install-Android-Bootloader-Interface-Driver.png>)

15. Once all the listed drivers are installed, **reboot** your computer.

How to Install Sky Limo X2 ADB and Fastboot Drivers

1. Download and extract the **15 Seconds ADB installer** zip file on your computer. Once extracted, you'll find the **ADB driver installer** setup file.

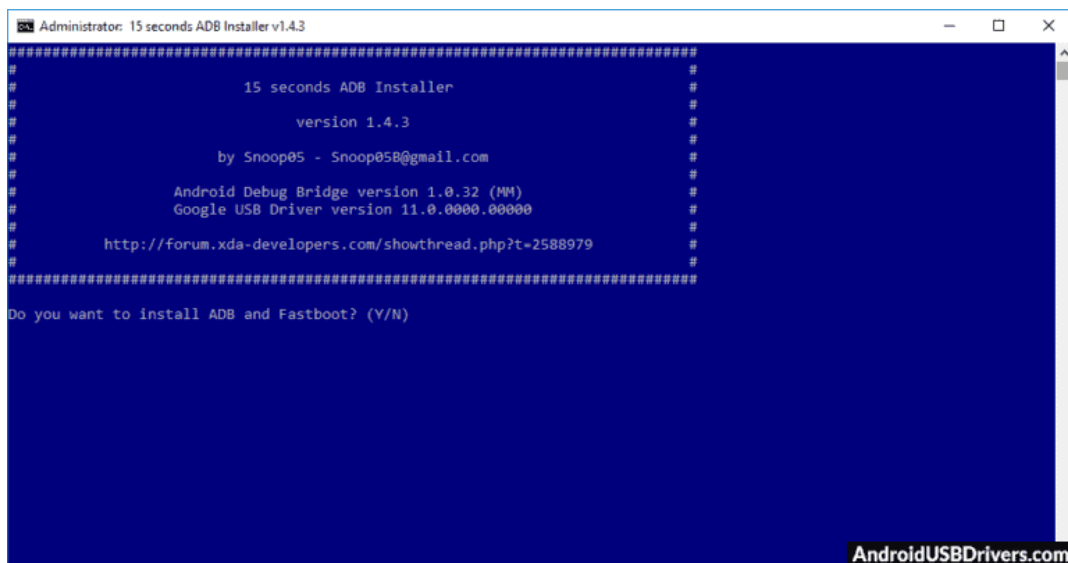

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/15-Seconds-ADB-Installer.png>)

2. Right-click on the **ADB installer** setup file and select **Run as administrator**.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/Open-ADB-and-Fastboot-Installer.png>)

3. Now 15 seconds ADB driver installer **command prompt** window should open on your computer.

(<https://www.androidusbdrivers.com/wp-content/uploads/2021/01/ADB-and-Fastboot-installer.png>)

4. It should ask whether you want to **install the ADB driver and Fastboot driver**. Press the **Y** key and then press **Enter**.
