History

Creation: Area code 314 was put into service in 1947 and was one of the original 86 area codes, and it originally served eastern Missouri including St. Louis. 314 was split in 1996 creating the need to update some of the phone numbers to [area code 573 \(/573\)](#), and again in 1999 to create [area code 636 \(/636\)](#). In 2022, [area code 557 \(/557\)](#) was created and is currently an overlay to 314. It was the 1st area code in the state of Missouri. Missouri currently has 9 area codes.

New/recent overlays: [Area code 557 \(/557\)](#) was recently added as an overlay to the 314 area code on August

12, 2022.

Middle digit: Until 1953, the middle digit was restricted to either a 0 or a 1 where a zero indicated that the area code covered the entire state while a 1 indicated that the area code served only a portion of a state. Because the middle digit of the 314 area code is 1 and it was created prior to 1953, we can tell area code 314 never served the entire state of Missouri.

Pulses: Because area code 314 was created before the 1960s when touch tone dialing became more common, the number of pulses required on a rotary phone was still important. Area codes that required fewer pulses were faster to dial and were commonly prioritized for more populated areas. The 314 area code requires $3 + 1 + 4 = 8$ pulses to dial. The 90 area codes created in the 5 years prior or the 5 years after area code 314 averaged 14.1 pulses indicating 314 was prioritized more than other area codes created about the same time. The 480 currently active area codes require pulses that range from 5 to 29 and average 16.3. Only 10 area codes require fewer pulses (212 (/212), 213 (/213), 312 (/312), 231 (/231), 321 (/321), 214 (/214), 313 (/313), 412 (/412), 331 (/331), and 223 (/223)) than area code 314.
