What time zone is area code 505?

The 505 area code is located in the Mountain timezone. The Mountain time zone is also known as America/Denver. As of the last time this page was loaded, the current time is 10:24pm.

History

Creation: Area code 505 was put into service in 1947 and was one of the original 86 area codes, and it originally served the entire state of New Mexico. 505 was split in 2007 creating the need to update some of the phone numbers to area code 575 (/575). It was the 1st area code in the state of New Mexico. New Mexico currently has 2 area codes.

Middle digit: Until 1953, the middle digit was restricted to either a 0 or a 1 where a zero indicated that the area code covered the entire state while a 1 indicated that the area code served only a portion of a state.

Because the middle digit of the 505 area code is 0 and it was created prior to 1953, we can tell area code 505 originally served the entire state of New Mexico. However, it not longer does.

Pulses: Because area code 505 was created before the 1960s when touch tone dialing became more common, the number of pulses required on a rotary phone was still important. Area codes that required fewer pulses were faster to dial and were commonly prioritized for more populated areas. The 505 area code requires $5 + 10 + 5 = 20$ pulses to dial. The 90 area codes created in the 5 years prior or the 5 years after area code 505 averaged 14.1 pulses indicating 505 was prioritized less than other area codes created about the same time. The 480 currently active area codes require pulses that range from 5 to 29 and average 16.3.
