What time zone is area code 513?

The 513 area code is located in the Eastern timezone. The Eastern time zone is also known as America/New_York. As of the last time this page was loaded, the current time is 12:17am.

History

Creation: Area code 513 was put into service in 1947 and was one of the original 86 area codes, and it originally served southwest Ohio including Cincinnati. 513 was split in 1996 creating the need to update some of the phone numbers to [area code 937 \(/937\)](#). In 2023, [area code 283 \(/283\)](#) was created and is currently an overlay to 513. It was the 1st area code in the state of Ohio. Ohio currently has 15 area codes.

New/recent overlays: [Area code 283 \(/283\)](#) was recently added as an overlay to the 513 area code on April 28, 2023.

Middle digit: Until 1953, the middle digit was restricted to either a 0 or a 1 where a zero indicated that the area code covered the entire state while a 1 indicated that the area code served only a portion of a state. Because the middle digit of the 513 area code is 1 and it was created prior to 1953, we can tell area code 513 never served the entire state of Ohio.

Pulses: Because area code 513 was created before the 1960s when touch tone dialing became more common, the number of pulses required on a rotary phone was still important. Area codes that required fewer pulses were faster to dial and were commonly prioritized for more populated areas. The 513 area code requires $5 + 1 + 3 = 9$ pulses to dial. The 90 area codes created in the 5 years prior or the 5 years after area code 513 averaged 14.1 pulses indicating 513 was prioritized more than other area codes created about the same time. The 480 currently active area codes require pulses that range from 5 to 29 and average 16.3. Only 22 area codes require fewer pulses than area code 513.
