Memento "Time Travel for the Web" - Guide

[RFC 7089](#) is the authoritative technical specification of the Memento protocol. But the following resources provide a more accessible overview:

- [Introduction](#) to Memento.
- [Resource Versioning and Memento](#), describes how wikis, content management systems, and software versioning systems that use a common versioning pattern can support the Memento protocol.
- [Determining Resource Type](#) details how clients can recognize a Memento (a historic version of a web resource), a TimeGate, and an Original Resource.
- [JSON TimeMaps](#) specifies an application/json serialization for TimeMaps that may be supported in addition to the application/link-format serialization specified by the Memento protocol.
- The [Memento 101](#) tutorial slides.
