

Understand your YouTube content performance

Beginning August 24, 2026, views are counted the moment a video starts to play across all formats, including Shorts, long-form videos (VOD), and live streams.

This update won't impact your YouTube Partner Program (YPP) earnings or eligibility. YPP earnings will still be based on "engaged Shorts views" and "engaged watch hours". YPP eligibility will still be based on "qualified Shorts views" and "qualified watch hours."

The Content tab in YouTube Analytics gives you an overview of how your audience finds your content, what your audience is watching, and how they interact with your content. The Content tab is only available at the channel level. Learn more about [how engagement metrics are counted](#).

Check out the following video from the [YouTube Creators channel](#) to learn more about your content reach and engagement.

View your reach and engagement reports

[Computer](#) [Android](#) [iPhone & iPad](#)

1. Sign in to [YouTube Studio](#).
2. In the left Menu, select **Analytics**.
3. From the top menu, select **Content**.

Note: You can click SEE MORE or ADVANCED MODE to view an [expanded analytics report](#) to get specific data, compare performance, and export data.

All

New viewers

This reports viewers who watched something on your channel for the first time in the selected time period.

Casual viewers

Casual viewers are viewers who have watched your channel occasionally for a while. Casual viewers have watched your channel at least once per month for one to 5 months in the past year.

Regular viewers

Regular viewers are viewers who have been watching consistently for a long time. Regular viewers have watched your channel at least once per month for more than 6 months in the past year.

Unique reach

Estimated total number of individual people who saw your video or channel. This accounts for shared viewing on devices like YouTube TV and the main YouTube app on TV.

- **Example:** If 3 people watch your video together on one TV, it counts as one view but the video's unique reach will increase by 3.

Views (Co-viewed)

Estimated total view count including multiple people watching together.

- **Example:** If a family of 3 watches your video together twice, that counts as 6 Views (Co-viewed).

Subscribers

This report shows the number of subscribers that you gained from each content type: videos, Shorts, live streams, posts, and others. "Others" include subscriptions from YouTube search and your channel page. This info helps you understand what content performs best at turning viewers into subscribers.

Views

This report shows you the number of legitimate views on your content for Shorts, videos, and live streams.

Views are counted the moment a video starts to play across all formats.

Impressions and how they led to watch time

This report shows you how many times a thumbnail was shown to viewers on YouTube (impressions), how frequently those thumbnails resulted in a view (click-through rate), and how those views ultimately led to watch time. Learn more tips for using [impressions and CTR data](#).

Published content

This report shows the number of videos, Shorts, live streams, and posts you've published on YouTube.

Viewers across formats

This report shows the breakdown and overlap of viewers consuming your content by format (videos, Shorts, and live).

How viewers found your content

This report shows you how your viewers found your content within browse features, Shorts feed, suggested videos, YouTube search, channel pages, and others.

Top remixed

This report shows a visual overview of your remix views, total remixes, and top remixed content.

Videos

Key metrics card

This gives you a visual overview of your views, average view duration, impressions, and impressions click-through rate.

Key moments for audience retention

This report shows how well different moments of your video held viewers' attention. You can also use typical retention to compare your 10 latest videos of similar length.

How viewers find your videos

This report shows you how your viewers found your videos within YouTube search, browse features, suggested videos, external, channel pages, and others.

Top videos

This report highlights your most popular videos.

Shorts

Key metrics card

This gives you a visual overview of your views, likes, and subscribers.

How viewers find your Shorts

This report shows you how your viewers found your Shorts within Shorts feed, YouTube search, channel pages, browse features, external, and others.

How viewers engaged

The percentage of times viewers stayed to watch past the initial seconds of a Short.

Top Shorts

This report highlights your most popular Shorts.

Top remixed

This report shows a visual overview of your remix views, total remixes, and top remixed content.

Live

Key metrics card

This gives you a visual overview of your views, average view duration, impressions, and impressions click-through rate.

How viewers find your live streams

This report shows you how your viewers found your live streams within browse features, YouTube search, suggested videos, direct or unknown, channel pages, and others.

Top live streams

This report highlights your most popular live streams. You can use the [expanded analytics report](#) to view more metrics, like views and impressions.

Concurrent viewers

This report shows you your peak and average concurrent viewers on a given live stream.

Posts

Impressions

This report shows you how many times your post was shown to viewers.

Likes

This report shows how many times viewers liked your posts.

Subscribers

This report shows the number of subscribers that you gained from posts.

Top posts

This report highlights your most popular posts based on likes or votes.

Playlists

Top playlists card

This report highlights your most popular playlists and helps you compare them. From here, you can access each playlist's analytics. [Learn how to access your playlist analytics.](#)

This report highlights your most popular podcasts and helps you compare them. [Learn more about your podcast's performance.](#)

Understand types of traffic

Traffic to your videos can come from either within YouTube, or from external sources. You can view both on the How viewers find your content (or videos, Shorts, Live) report.

Organic & paid traffic

Traffic from within YouTube

Traffic from external sources

Metrics to know

Thumbnail impressions	How many times your thumbnails were shown to viewers on YouTube through registered thumbnail impressions.
Thumbnail impressions click-through-rate	How often viewers watched a video after seeing a thumbnail.
Engaged views	How many times viewers stayed to watch past the initial seconds, not including any loops.
Stayed to watch	The percentage of times viewers stayed to watch past the initial seconds of a Short.
Unique viewers	Estimated number of viewers that watched your content within the selected date range.
Unique reach	Estimated total number of individual people who saw your video or channel. This accounts for shared viewing on devices like YouTube TV and the main YouTube app on TV.

Views (Co-viewed)	Estimated total number of views, including multiple people watching together. This accounts for shared viewing on devices like YouTube TV and the main YouTube app on TV.
Average view duration	Average minutes watched among those who stayed to watch. This is calculated from engaged views and their corresponding watch time.
Average percentage viewed	Average percentage of a video watched among those who stayed to watch. This is calculated from engaged views and their corresponding watch time.
Watch time (hours)	The amount of time viewers have watched your video.
Post likes	The amount of likes your post received.
Post like rate	The percentage of viewers that liked your post.
Views from playlist	Video views from viewers watching the playlist itself. This is the same metric available externally on the public playlist page.
Total views	Total views of all the videos in the playlist, regardless of whether they're from the playlist or elsewhere. This is only computed for videos that you owned in the playlist.
Follow-on Views	Organic views you get when someone watches your videos after seeing your promoted content .
