

To find bug reports on an Android Go device using USB file transfer, connect your device to a PC, enable USB file transfer mode, and navigate to the 'Download' folder where the bug reports are typically saved. You can also check the 'Bug reports' folder in the file manager on your device. 🌐 support.zebra.com 🌐 developer.android.com

Accessing Bug Reports on Android Go via USB

To locate bug reports on an Android Go device using USB file transfer, follow these steps:

Step-by-Step Instructions

1. **Connect Your Device**
 - Use a USB cable to connect your Android Go device to your PC.
2. **Enable USB File Transfer Mode**
 - On your device, swipe down to access the notification panel.
 - Tap on the USB options and select **File Transfer**.
3. **Navigate to Bug Reports**
 - Open **File Explorer** on your PC.
 - Look for your device under **This PC**.
 - Navigate to the **Download** folder, where bug reports are typically saved.
 - Alternatively, check the **Bug reports** folder if available in the file manager on your device.

Additional Tips

- Ensure that your device is unlocked while connected to the PC to access files.
- If you do not see the bug reports in the expected folders, you may need to generate a new bug report from the Developer Options on your device.

By following these steps, you should be able to find and transfer bug reports from your Android Go device to your PC easily.
