Firebase Config Scanner

Detect Firebase and Play Integrity / App Check components bundled in an APK.
(Detection only — it can't prove server-side enforcement.)

Firebase Config Scanner is part of APKLint, an online toolkit for inspecting Android APK files. Detect Firebase and Play Integrity / App Check components bundled in an APK. (Detection only — it can't prove server-side enforcement.). Upload an APK in your browser to view the relevant details; results reflect what the file itself exposes.

ANALYZE · FIREBASE CONFIG SCANNER

DONE

Drop your file here

or click to choose from your device

Select file

Accepts: .APK · up to 1 GB

Official.Trump.2020.App_v2.3.0_apkpure.com.apk

29.6 MB

Analyze

Done.

Firebase scan complete — 1 to review.

WARN

Firebase without App Check

Firebase is present but no Firebase App Check / Play Integrity was detected. Without attestation, your Firebase backend can be called by unofficial clients. Consider adding App Check.

INFO

Firebase / integrity components

- Firebase (core)
- Firebase Analytics
- Firebase Cloud Messaging
- Firebase Crashlytics

Deleted after your scan. Files you upload are processed on our servers over an encrypted connection, then removed by the next hourly cleanup after analysis finishes (long scans are protected while they run). We never share them, and need no account.

About Firebase Config Scanner

Detect Firebase and Play Integrity / App Check components bundled in an APK. (Detection only — it can't prove server-side enforcement.)

Firebase Config Scanner is part of APKLint's security & malware toolkit — Find risky behavior, trackers, and suspicious patterns. It's free to use and needs no account.

Your privacy is the default: files you upload are processed on our servers over an encrypted connection and permanently deleted by a scheduled hourly cleanup after analysis finishes, and never shared.

What Firebase Config Scanner checks

- ✓ Firebase SDK components present in the APK
- ✓ Play Integrity / App Check components
- ✓ Other Firebase services (Messaging, Crashlytics, Analytics)
- ✓ Whether attestation libraries are bundled

Good to know: Detection only. Bundled App Check libraries don't prove the backend actually enforces attestation.

When to use Firebase Config Scanner

Best for

Detecting Firebase and Play Integrity / App Check components bundled in an APK.

Not the right tool for

Not a configuration validator or a backend check; detection only.

What you get back

Which Firebase and App Check / Play Integrity components are present in the app.

How it differs from related APKLint tools

It is a focused presence detector, unlike the broad analyzers that inventory everything.

Limitations

Detection on the client side only; it cannot verify server-side enforcement.

How to use Firebase Config Scanner

- 1 **Choose your APK file** — Drop an .apk file onto the page, or click to select it from your device.

- 2 **Send securely** — The file is uploaded over an encrypted connection to our analysis servers.
- 3 **Read your report** — APKLint unpacks and inspects the package and lays out the results on screen.
- 4 **Your file is removed** — It's deleted by an hourly cleanup job after analysis finishes.

Why use APKLint

Always free

Every tool is free with no login and no paywall. Reasonable file and input limits keep the free service stable.

No on-page ad banners

A clean, focused interface with no third-party ad banners cluttering your results.

Privacy-first

Files you upload are deleted by a scheduled hourly cleanup after analysis finishes, and never shared.

Open-source engines

Uses androguard DEX, class, and string inspection to detect SDK and API references.

No sign-up

Start immediately — no account, login, or email required.

Works anywhere

Runs in any modern browser, on desktop or mobile.

Frequently asked questions

What does Firebase Config Scanner do?

Detect Firebase and Play Integrity / App Check components bundled in an APK. (Detection only — it can't prove server-side enforcement.)

Can it confirm App Check is enforced?

No. It can confirm the components are bundled in the app, but enforcement happens server-side and can't be verified from the APK.

Is it free to use?

Yes. Every tool on APKLint is completely free, with no sign-up and no account.

How is my data handled?

Your uploaded file and its result are processed on our servers over an encrypted connection, then removed by the next hourly cleanup after analysis finishes. We never share them.

What files can I send?

An Android APK — a .apk file — up to 1 GB.
