SDK Scanner

Enumerate the SDKs bundled in an APK so you can cross-check each against the Google Play SDK Index.

SDK Scanner is part of APKLint, an online toolkit for inspecting Android APK files. Enumerate the SDKs bundled in an APK so you can cross-check each against the Google Play SDK Index. Upload an APK in your browser to view the relevant details; results reflect what the file itself exposes.

ANALYZE · SDK SCANNER

DONE

Drop your file here

or click to choose from your device

Select file

Accepts: .APK · up to 1 GB

Official.Trump.2020.App_v2.3.0_apkpure.com.apk

29.6 MB

Analyze

Done.

SDK scan complete — nothing flagged.

INFO 8 third-party SDK(s) detected

- Branch (attribution)
- Facebook SDK (social/analytics)
- Firebase (core) (google/backend)
- Firebase Analytics (analytics)
- Firebase Cloud Messaging (push)
- Firebase Crashlytics (crash/analytics)
- Google DataTransport (telemetry)
- Google Location Services (location)

INFO Analytics / tracking present

Branch, Facebook SDK, Firebase Analytics, Firebase Crashlytics. Disclose this data collection in your privacy policy and Data Safety form.

INFO Google Play SDK Index

Cross-check the SDKs above against Google's Play SDK Index (play.google.com/sdks) for each SDK's data-safety and policy status. APKLint detects which SDKs are present; the Index shows their compliance notes.

Deleted after your scan. Files you upload are processed on our servers over an encrypted connection, then removed by the next hourly cleanup after analysis finishes (long scans are protected while they run). We never share them, and need no account.

About SDK Scanner

Enumerate the SDKs bundled in an APK so you can cross-check each against the Google Play SDK Index.

SDK Scanner is part of APKLint's security & malware toolkit — Find risky behavior, trackers, and suspicious patterns. It's free to use and needs no account.

Your privacy is the default: files you upload are processed on our servers over an

encrypted connection and permanently deleted by a scheduled hourly cleanup after analysis finishes, and never shared.

What SDK Scanner checks

- ✓ Enumerates SDKs bundled in the APK
- ✓ Names the network/vendor for each where known
- ✓ Gives you the list to cross-check against the Play SDK Index
- ✓ Highlights ad/analytics SDKs that carry policy weight

Good to know: This is a local SDK detector. It lists what's bundled so you can look each up — it doesn't query Google's Index live.

When to use SDK Scanner

Best for

Enumerating the SDKs bundled in an APK so you can cross-check each against the Google Play SDK Index yourself.

Not the right tool for

Not a live SDK Index query; it lists SDKs, you do the lookup.

What you get back

A list of detected SDKs to take to the Play SDK Index for policy/version status.

How it differs from related APKLint tools

It overlaps with the Tracker Detector but is framed for SDK Index cross-checking rather than ad/tracker focus.

Limitations

It does not pull live SDK Index data; verify each SDK's status on Google's site.

How to use SDK Scanner

- 1 Choose your APK file** — Drop an .apk file onto the page, or click to select it from your device.
- 2 Send securely** — The file is uploaded over an encrypted connection to our analysis servers.
- 3 Read your report** — APKLint unpacks and inspects the package and lays out the results on screen.
- 4 Your file is removed** — It's deleted by an hourly cleanup job after analysis finishes.

Why use APKLint

Always free

Every tool is free with no login and no paywall. Reasonable file and input limits keep the free service stable.

No on-page ad banners

A clean, focused interface with no third-party ad banners cluttering your results.

Privacy-first

Files you upload are deleted by a scheduled hourly cleanup after analysis finishes, and never shared.

Open-source engines

Uses androguard DEX, class, and string inspection to detect SDK and API references.

No sign-up

Start immediately — no account, login, or email required.

Works anywhere

Runs in any modern browser, on desktop or mobile.

Frequently asked questions

What does SDK Scanner do?

Enumerate the SDKs bundled in an APK so you can cross-check each against the Google Play SDK Index.

Does it check the Play SDK Index automatically?

No. It produces the SDK list locally; you cross-check each against Google's Play SDK Index, which tracks version and policy notes.

Is it free to use?

Yes. Every tool on APKLint is completely free, with no sign-up and no account.

How is my data handled?

Your uploaded file and its result are processed on our servers over an encrypted connection, then removed by the next hourly cleanup after analysis finishes. We never share them.

What files can I send?

An Android APK — a .apk file — up to 1 GB.
