

Certificate info

This free online tool shows **x509 certificate** information. You can use it to dump information about **Android APK** or bundle signatures.

Drop file here or click to select files

Official.Trump.2020.App_v2.3.0_apkpure.com.apk (29.6MB)

Signing Certificate SHA256 Fingerprint:

DC:16:9:6C:BE:2F:8E:BF:2C:EC:2B:25:F8:54:FB:F9:86:C4:77:88:5E:C5:6D:35:9F:2C:E8:D6:6B

Signing Certificate MD5 Fingerprint:

67:48:C9:BC:10:6C:D5:C8:EA:D5:55:68:25:9A:80:FC

Data:

Version: 3 (0x2)

Serial Number: 701847467 (0x29d557ab)

Signature Algorithm: sha256WithRSAEncryption

Issuer: ST=DC, OU=uCampaign, C=US, L=Washington, O=Social Political Media, CN=Thoma
Validity

Not Before: Apr 15 04:32:08 2015 GMT

Not After : Aug 31 04:32:08 2042 GMT

Subject: ST=DC, OU=uCampaign, C=US, L=Washington, O=Social Political Media, CN=Thom

```

Note: This tool is completely client-based and all processing is done on your device. That means **your files are not transferred to the server**.

If you you're an Android enthusiast that likes to learn more about Android internals, I highly recommend to check out the [Bugjaeger app](#). It allows you to connect 2 Android devices through USB OTG and perform many of the tasks that are normally only accessible from a developer machine via ADB directly from Android phone/tablet.

What Certificate Information Can You Find

Currently you can dump various information from certificate stored in **DER binary format/ PKCS7 standard** (used by Android APK files).

This tool should show the following APK/cert information

- Signing certificate SHA256/MD5 fingerprint that can be used for verification

- Encryption algorithm
- Signature algorithm
- RSA Public-Key length
- Other stuff

If you're an Android developer, this tool will help you to find out if APK was signed with **debug** or **release certificate**.

You Want Other Information or Something Is Not Working

In case something wasn't working, or you would like to use other certificate formats (e.g. PEM), or you would additionally like to verify if APK signature is correct, write directly to my email **roman@sisik.eu**.

I'll try to fix bugs and add requested features if possible.

Other Useful Tools

If you want to get detailed information about Android's **APK** files, check out my [APK Analyzer tool](#).

Additionally, if you you're an **Android enthusiast** that likes to learn more about **Android internals**, I highly recommend to check out the [Bugjaeger app](#). It allows you to connect 2 Android devices through USB OTG and perform many of the tasks that are normally only accessible from a developer machine via ADB directly from Android phone/tablet.
