Image Resizer

Upload a **PNG**, **JPG**, **WebP**, or other browser-supported image and set exact **width** and **height** in pixels. Use **aspect-ratio lock** when you change one dimension, pick a **quick scale** (25%–200%), then export as **PNG** (keeps transparency), **JPEG** (white matte behind transparent areas), or **WebP** when your browser supports it. Your file never leaves this tab — nothing is uploaded to DroidXP.
