AI Overview

To read the beginning of a file using `dd`, specify the block size (`bs`) and the number of blocks (`count`) to read. [Unix & Linux Stack Exchange](#)

bash

```
dd if=input.txt bs=1M count=10
```

- `if=input.txt` : Specifies the source file.
- `bs=1M` : Sets the block size (here, 1 megabyte).
- `count=10` : Tells `dd` to copy exactly 10 blocks of the specified size. [YouTube · MichaelsTech...](#) +2

For a human-readable file (like text), the `head` command is usually a better choice than `dd`. [IBM](#) +2

bash

```
head -n 20 input.txt
```

- `-n 20` : Displays the first 20 lines. [Ask Ubuntu](#) +2
