About Apk Analyzer 3.0.5

Apk Analyzer is the **most downloaded apk analysis app** on Google Play. It provides detailed report of installed apps and also about not installed .apk files from your device storage. 📱

It's **open source** and completely **ad free**.

Advertisement

Remove ads, dark theme, and more with  Premium (/premium)

App report contains:

- App naming and version data
- Target and minimal Android versions
- Install and update dates
- Certificate and app sign data

No ads, dark mode,
and more with
APKMirror Premium
\$10/quarter

- Used permissions with description
- Activities with launch option
- Services, Broadcast Receivers and Content Providers
- Required and optional hardware features
- Full version of AndroidManifest.xml with save option
- And much more 😊

Installed **apps can be saved to device storage and shared**. App icon can be saved as well! App decodes the main metadata file AndroidManifest and saves it as a readable xml to an external storage.

Apk Analyzer shows you an app report even before installing from APK file.

Permissions

- List all permissions requested by apps on your device
- Find out the most commonly used permissions and apps which request them
- List apps requesting permission and explore which apps has been given it.
- Explore the protection level

Statistics

- Interested in statistics data of your app collection?
- Find out the distribution of Android versions among apps on your device or app signing used
- Find out the average number of activities, permissions, or distribution of Android and certificate versions.

Application doesn't require rooted device.
Open source, licensed under GNU General Public License v3.
