How to Install XAPK / APK File on Android

What is XAPK File?

XAPK file was originally created by APKPure. It is a file extension that contains separate APKs or package OBB cache assets files to save the data size so developers can upload their Android apps to Play Store within the maximum size limit 100 MB. APKPure APP is one of the most reliable sources to download and install safe XAPK files on Android.

Add APK Downloader Chrome Extension

Download free APK/XAPK files from Google Play Store without a login account.

Install Now

PK files on your phone through default installer. And
and manage APK / XAPK file directly on Android with one

FAQ:

What is APK File?

APK (Android Package) is a standard package file format most widely used on Android to distribute and install mobile applications and middleware. APK file is officially recognized by Google and can be installed on Android device by default installer.

What is XAPK File?

XAPK file is similar but more complicated than APK as this standard zip format contains Android app bundles of separate APK packages, or OBB file and graphics data in a different package.

Simply speaking, there are two types of XAPK files:

XAPK = Android App Bundle (base APK file + Split APKs files)

Add APK Downloader Chrome Extension

Accept All

Only Necessary Cookies

Android App Bundle is a new Android app format to generate more optimized APKs that are served to users, such as the base APK, dynamic feature APKs, configuration APKs, and (for devices that do not support split APKs) multi-APKs.

What is OBB File and How does it Work?

Google Play requires that the compressed APK be no more than 100 MB. Each time you upload an APK using the Google Play Console, you have the option to add one or two expansion .obb files to the APK which can be any format you choose (ZIP, PDF, MP4, etc.) with size up to 2 GB. This XAPK file format ensures users to download without corruption.

OBB file Storage Location & File Name Format

```
<shared-storage>/Android/obb/<package-name>/[main|patch].<expansion-version>.<package-name>.obb
```

How to Enable the "Unknown Sources" Setting?

1. Homescreen > Settings > More.
2. Go to Security > Device administration.
3. Check "Unknown Sources".

You may need to adjust this according to your Android models.
