RPC failures and http.postBuffer - Azure Repos | Microsoft Learn

Oct 27, 2025 · **RPC failures and http.postBuffer** If you're using a terrible proxy that's buggy or doesn't support chunked encoding, you'll see **errors** for larger pushes. The same thing can happen if you put on-prem TFS behind a misconfigured load balancer. If the same **push** succeeds when bypassing the proxy,...

Git push failing HTTP 500 curl 22

[https://stackoverflow.com/...](https://stackoverflow.com/questions/44780221/git-push-failing-http-500-curl-22-the-requested-url-returned-error-500)

Increase the global **Git** buffer size to the largest individual file size:

```
git config --global http.postBuffer 157286400
```

Or just for your repo:

```
cd your_repo
git config http.postBuffer 157286400
```
