To: MDS <maxieds@gmail.com>, maxieds-hackercat@outlook.com, maxieds85v3@gmail.com

Antisemitism and conspiracy involving powerful people are at the root of my traumatic life experiences. This includes the loss (murder) of my immediate family and assault, rape and stalking I have survived. All this has intensified in the last few years for reasons that include the currently abnormally volatile political climate in the USA and my role as an informant about current events. I am contacting the ACLU in Chicago to obtain legal assistance (representation) for civil suits to recover from what happened to me as a Chicago, Illinois resident. My anger over the experience that many individuals have played a role in what happened to me and my family, or that many chose looked the other way while all this happened, leaves me wanting to test the limits of civil penalties in USA court for damages in the event of a large conspiracy to commit and perpetrate hate crimes.

My cousin started dating one of Trump's sons through a mistress (product of an extramarital affair) in approximately 2013. They were married in 2015 with a divorce pending when I spoke to my aunt after my mother's eulogy last year (2022). The time period over which he first entered my extended family's lives marks when my traumatic life experiences intensified substantially. This is no coincidence. His intense far-right political ideology, his attitude about being untouchable above the law (just like daddy), the fact that he and his inner circle are satanic neo-Nazis, and the intrusion of his friends and associates into our lives caused the trauma and significant loss in my life. Stalking events by these men and women continue even now that I have relocated to Chicago from Florida and Georgia. It is at the point where I am seeking an order of protection to mandate distance and safety from one of Elon Musk's sons.

==== Minimal list of legal issues I require assistance handling:

(1) Civil suit against my former employer, Sandia National Labs (SNL), in Albuquerque. The damages are about their intentional role in what happened to me as a victim of human trafficking and violence. I only spent two days working for them that were not paid sick leave due to my being viciously targeted and attacked there. I was apparently terminated while receiving 70% of my salary on disability leave due to their malice and ill will towards me after the hiring manager had private conversations with someone (Andre Torres) who had perpetrated this violence towards me - in effect, to penalize me for surviving, or living, and prevent me from having the financial resources to escape as a victim. The organization (SNL) even had the audacity to send me a bill of about \$8K/USD for my early termination within a year of starting work as a researcher for them with threats of referral to the (USA) Department of Justice if not repaid in full soon. With the fraud and identity theft I have experienced as a direct result of all this, the bill is an cold gesture to try to prevent me from recovering or having any resources to get back on my feet after losing my parents given my inability to quickly recover their assets/estate in Florida valued at approximately \$1.5M/USD. There is a lot more to this story (please ask). I have a substantial amount of data and photographs of legal records to corroborate the heinous conspiracy they played a role in the horror show that happened to us the last few years (acting in conspiracy with Trump, his sons and Musk's inner circle). The early termination email, which I would have only been able to read within the last few weeks of 2023 following delays recovering my Gmail account, was dated within two weeks of an event in 'Casper WY' (near Bogota, Colombia) where I stopped breathing in a Tesla car from poisonous gas inhalation (a combination of carbon monoxide and nitrous gasses pumped into the car). I have phone screenshots to document hidden Google analytics logs that show I had been tracked (stalked) from Albuquerque to Denver, COL (Bogota) by Lindsay Graham, Elon Musk, Warren Buffet, Mark Zuckerberg, and the Alabama Tide football team, among many others. I ended up eventually getting connected with Sean Penn following attempts to murder me, a US federal employee at the time, on Federal Boulevard in Colombia.

(2) Civil suit against the Georgia Institute of Technology (Georgia Tech). This is where the worst of the events leading up to this year started. Actionable interactions by faculty and administration, and their intent to let or make this happen while taking a blind eye to repeated warnings and reports, allowed me to be kidnapped as a human trafficking victim after graduating with my PhD from Georgia Tech in August of 2022. There is much more to this, including admissions of knowledge by some faculty of the plot to commit the murder of my parents in Florida, the weekend before my mother died. There is much more to this that I can discuss (again, please ask).

(3) Recovery of the estate/assets of my dead parents in Florida. Also, civil suits against several parties for damages over wrongful death. Their murders were premeditated. The father of the man (Pensacola Sheriff deputy) who murdered my father after he gave the eulogy at my mother's funeral on Friday, May 13, 2022 (apparent mafia movie reference) made a nasty comment in front of me months before targeted at political liberals, and their will to prevent NRA/concealed-carry permit carrying members of the right from murder: Make sure to shoot him center mass when he comes into your house

(with a sinister sneer). I want a civil attorney to force attention to criminal charges over all this in the politically volatile state of Florida. The connections of the men who plotted and carried out the murders of my parents have not faced any penalty over their connections to Florida law enforcement, and powerful men like Donald Trump and Elon Musk. This is a horror story! After the unjust termination of my disability pay from my last employer and the loss of my parents, I had to live in a homeless shelter for four months before getting rental assistance to survive in Chicago within a year of graduating with my PhD. One of the linked documents below (Github post draft) retells my encounter with Donald Trump and his sons, Don Junior and Barron Trump, in Lincoln Park in Uptown Chicago on the Juneteenth holiday of 2023. In the exchange, he not only took credit for the conspiracies to murder my immediate family, but made snide comments about my having to take a job as a part-time insurance salesman to make ends meet within a year of the usual peak life event of obtaining my doctorate. The irreverence is typical of someone whose attitude problem in life is one with authority on the order of God herself.

(4) Response to a citation in Greensboro, North Carolina from April of 2023. Civil suits against men connected to the NASCAR sport. I flew into Greensboro after fleeing Florida into the custody of UNICEF in the Atlanta airport following riots/lynching/martial law invocation in the state about news of Donald Trump's indictments in Manhattan. I narrowly survived Florida with my life after threats and intimidation from individuals connected with the New York mafia. In Greensboro, several pro-Trump NASCAR celebrities, including one of Dale Earnhardt Jr's cousins and a crew chief of Kyle Busch with his wife in tow, dressed in airport police uniforms to impersonate authorities. They arrested me and searched my locked belongings at the airport hotel over allegations of defrauding an innkeeper over a bill for my hotel room that my bank records show had been paid in full. Jeffery Earnhardt handcuffed me and drove me into a secluded airport parking garage area with an AK assault rifle in the front of his marked police SUV to detain me for hours with these men in the room. I was handcuffed with my hands behind my back while severely dehydrated and disoriented while they consulted online course slides on criminal justice to figure out how to write the citation. They eventually wrote a ticket to appear in court with an address handwritten by them within a month of the unlawful detainment. I left for Chicago on a bus a few days later with all good sense in mind.

(5) Assistance in recovery from financial fraud and identity theft. I need a good lawyer to help me with these tasks. More details upon request.

(6) I want to claim part of the State Department's \$10M/USD bounty for information documenting fraud in the 2016 election. I need to go through an attorney cautiously because of malice and the usual line of ill will towards technically savvy intellectuals who know too much reflected by actions of Trump and the conservative (far right) Republicans in this country (for example, refer to the cases of Kevin Mitnick and Virgil Griffith).

(7) I was texting with Liz Cheney (using a SNL alias) the afternoon Elon Musk bought Twitter in October of 2022 while living in Albuquerque. Nancy Pelosi's husband was murdered while that SMS chat was being illicitly observed on my hacked cell phone. I want to make sure that she has complete transcripts of the text message session for completeness. I saw her (met her without exchanging conversation) on a public train since moving to Chicago. I take this as a supportive gesture from the good people in this country. The woman is very warm and similarly deserves to have all sources of information about why that tragically happened to her family.

==== More information about my request for legal assistance (please read):

(1) Court notes providing background history for my ongoing petition for an order of protection against Zach Bradford (X Musk) in Chicago.

LINK (PDF): <https://drive.google.com/file/d/1rikILSL3M5UuvWYOfVO5NEAhX95VbDef/view?usp=sharing>

(2) A draft of a post I am delaying posting publicly in the Github/maxieds/ChameleonMiniLiveDebugger/issue26 thread as a follow up to my last post from Albuquerque last year (2022).

LINK (PDF): https://drive.google.com/file/d/1V6w3dWS3qmunluCrSPWRSN_cqXGHfnTf/view?usp=sharing

(3) The post that led to me meeting/talking with Liz Cheney after moving to Albuquerque last year. Barack Obama made reference to an earlier post I made after events on CPAC/2021 in his first podcast with Bruce Springsteen.

LINK (WEB): <https://github.com/maxieds/ChameleonMiniLiveDebugger/issues/26#issuecomment-1267903486>

(4) A Github repository created to archive Google Drive shared files that were referenced in FBI tip reports I filed while living in Atlanta (2019-2022). I was forced to do this because after being watched drafting a tip report about the organization of the insurrection (violent riots at President Biden's inauguration), I received a notification on my Android phone that all Google Drive shared links would be removed except to users who had previously accessed a shared file previously available to everyone with the link text within a few weeks. One of the commit messages to the repository referenced Jim Jordan over my disdain for his conduct towards Hillary Clinton in the congressional committee in 2015 about her infamous email server inquisition. I later met him at a public transit bus stop in Pensacola, Florida in March of 2023. I interpret this to mean that after the role my experiences played in helping get Trump indicted, the FBI tip reports I submitted were indeed examined as the polite encounter happened before I made the repository contents available publicly. An important document to my story is provided below.
