Dear Dr./Mrs. Kimberley Mitnick,

Hello. I am writing to you because I need to talk about this crazy situation. I feel like I have gotten to know Kevin well over the last 20+ years – enough to affectionately call him Uncle Kevin. Kevin has been known to show up when the circumstances around me are intense. He probably knew things about my situation that I still haven't put together yet. I need to know what he knew. I also need to get copies of the home/documentary videos and any other saved artifacts that Kevin has been compiling over the years. I'm pretty sure that Kevin got the idea to conceive a son that he would never meet in person from Jason, the original Lucky225 if anyone else remembers that similarly strange time period.

The fact of the matter is that things are getting substantially worse for me in Chicago with Trump and Elon Musk in power. Around Easter of 2026 (this year), some MAGA supporters befriended me at the woman's shelter I have been staying at for over a year. Around that time, probably due in no small part to my mom's spirit being nearby, I proved a famous math conjecture – it's not the Riemann Hypothesis by any means, but it should be big news if anyone would recognize it coming from a Jewish woman in Trump's Nazi America. It should even be important enough to get newspaper coverage because of how incredible it is that I could do it living at a homeless shelter. That realization gave me hope for a platform to finally get a much needed (federal) lawyer to pursue legal recourse against Elon Musk and some other big name powerful and it seems untouchable men. Because I communicated that sentiment before a member of the MAGA crowd, little X Musk (also Anthony Reco Wright or Zachery Dylan Bradford) who has been stalking and attacking me for years including in Chicago found out and went fucking bazerk over my new real chance to exercise my civil liberties (pardon the vulgar language). I was subsequently drugged by MAGA in the women's shelter by having an illicit, and not standardly testable by toxicology screening, Anarchist Cookbook type substance slipped in my bag of smoking tobacco. I have also been suffering from radiation poisoning (probably better just to take my word on this rather than question how/why) since Easter this year to the point that I have barely been able to walk half of the days the last month. There is also a compounding issue of the illicit Neuralink radio feeds I need help (maybe from a local HAM radio operator) getting recordings of for court and to report this abuse. I'm pretty much done with having to hesitate telling this story and communicating the particularly offensive, gory details like I should fear being called crazy or face threats from physicians for describing the phenomena – no more bullshit (and I'm not asking either)! Elon Musk's "woke mind game" is a really sick reality that I get to write a non-fiction book about – and

they make it so I have nothing to lose and nothing but free time while this is going on – watch what happens to them, but will it ever be enough to fight this?

Legal recourse against Elon Musk is impossible right now. In Florida and Georgia, the local police refused to let me file a police report for rape and sexual assault despite having a rape kit performed. In Chicago, some nurses and advocates stood next to me and helped me file a police report for sexual assault. The man's reaction was to get even more aggressive towards me at my last apartment and take an electric men's beard trimmer to the front of my head so my haircut resembled that of Elon Musk in Don Lemon's famous revealing interview with him. The detective responsible for letting me press charges said that it is my word against his and that because it was Elon Musk's son, he would not even interview the man. Another legal advocate I have been working with the last several years point blank told me just to go to the ER the next time it happens and to seek treatment for the symptoms that they will not be able to accurately diagnose under these circumstances without providing any other details about why or who is responsible for attacking me this way. Someone I otherwise respect communicated to me yesterday that I should take a job with my PhD (do not report education past high school, she directed) working at a fast food restaurant just to make money. I have been unable to secure much needed restraining orders in Chicago because I cannot afford a private investigator to have these two men served, i.e., notified of the hearing in civil court, a right of theirs that the system views to Trump my rights to physical safety. This is of course another huge failure of the system and yet another sign of the sincerely fucked up time period we are living in right now.

Please take the time to write or contact me back. It is really important that we get to talk and exchange information soon – maybe even life saving. I really need your help. It's not funny to me that Kevin and his family are one of the few upstanding individuals that I can ask for help.

Sincerely,

Dr. Maxie Dion Schmidt
