✦ AI Overview

Gitmo, or the Guantánamo Bay detention camp, is a United States military prison located within the Guantánamo Bay Naval Base in southeastern Cuba. Established in 2002 by the Bush administration, it has historically been used to hold suspected terrorists and enemy combatants captured overseas. ^W Wikipedia +2

The facility and its operations are characterized by the following details:

Current Detainee Population

- The prison population has steadily declined from its peak of nearly 800 prisoners, with approximately 30 individuals remaining.
- The remaining detainees are largely those considered too dangerous to release, while others face ongoing war crime charges in slow-moving military commissions (such as the cases regarding the September 11 attacks). ^{YouTube} YouTube · ^{ARTE.tv} ARTE.tv Documentary +2

Controversies

- The camp has been the subject of decades of worldwide controversy regarding accusations of torture, abusive treatment of detainees, and legal limbo. ^{Britannica} Britannica +1
- Because the facility was established outside of traditional U.S. borders and on a leased Cuban territory, detainees were held without formal charges or the standard legal means to challenge their detention, violating various international human rights laws. ^{Britannica} Britannica +2

Expanded Use and Migrant Operations [🔗]

- In recent years, the U.S. government has also expanded the usage of the naval base to house the [Guantanamo Migrant Operations Center](#), which was designated to handle and process undocumented migrants or individuals facing deportation. ^{The White House (.gov)} The White House (.gov) +1
