◆ AI Overview

If you've forgotten your Mac login password, you can regain access by trying to **log in three times, which may display a password reset option**. Alternatively, you can use the Recovery Assistant or reset options directly from the login window, provided your Mac is connected to the internet. YouTube · Daniel About Tech +2

Option 1: Reset Using the Login Window

1. On the login screen, click the question mark next to the password field if it appears, or enter your password incorrectly three times.
2. If a reset message (e.g., "Reset it using your Apple Account" or "Restart and show password reset options") appears, click it.
3. Follow the onscreen instructions to sign in with your Apple Account.
4. Enter the verification code sent to your other devices, then select the user account you want to reset.
5. Create a new password and restart your Mac. Apple Support +1

Option 2: Reset Using macOS Recovery

If the login window doesn't give you a reset option, you can use Recovery mode. Apple Support

For Apple Silicon (M1, M2, M3, M4 chips) or Macs with Touch ID:

1. Turn off your Mac completely.
2. Press and hold the **Power Button** until you see "Loading startup options".
3. Click **Options** (gear icon), then click **Continue**. YouTube · Worth it Repairs

For Intel-Based Macs:

1. Restart your Mac and immediately hold down **Command (⌘) + R**.
2. Release the keys when you see the Apple logo or a spinning globe. YouTube · Indigo Software +1

Once in Recovery Mode:

1. Click **Utilities** in the top menu bar, then select **Terminal**.
2. Type `resetpassword` and press **Return**.

2. Type **Reset Password** and press **Return**.

3. A Reset Password assistant will open. Click **Forgot all passwords?** or **My password doesn't work when logging in**.
4. Follow the prompts to sign into your Apple Account, enter your verification code, and select your user account.
5. Enter a new password, verify it, create a hint, and click **Next**.
6. Click **Restart** and log into your Mac with your new password.  Apple Support +2
