

Order of protection - Stalking no contact - Chicago

Extra notes

Dr. Maxie Dion Schmidt

Last revised: June 25, 2025

1 Introduction

1.1 Prior OP attempts

I view my first OP request getting denied as a failure of the system. ARW/ZB/X raped me because of a lack of restraining order in November of 2023. Case #23OP76293 was dropped because of my inability to obtain a current address (in Illinois) for him to be served papers to appear in court for the hearing. This is disheartening because his right to be notified formally about the court hearing, in spite his in-person stalking of me in Chicago and history online stalking that, are apparently more important than my rights to physical and personal safety as a victim of him and his associates. ARW/ZB/XMusk and Andre are using fake IDs and aliases to disguise their identities.

Both can be arrested when they are served. ARW/ZB/XMusk has a warrant out for his arrest on sexual assault and Andre Torres is a sex offender out of state who has not registered in Illinois and was living across from an elementary school at my previous apartment. My employer, Chicago Public Schools, have security personnel who are committed to getting both of them served. Many of the dates where I am attacked more viciously corresponds to online activity on Github or Youtube (online stalking). They are both connected in the sense of organized crime. I am filing for orders of protection against both of these men who are frequently together, or near each other, in these incidents.

The (sexual) abuse from these men is very calculated. Online references about dating violence show that their tactics hit on every point as though they have had training on how to abuse and manipulate a victim. Similarly, AT has tried to make me internalize the three suicidal characteristics from the well-cited Erika's Lighthouse program. He misses that the victim must express those, not him. I conclude that he would lie to make my death seem like suicide after persecution from his inner-circle. There have also been 3-5 recent (11-12/2024) pronounced violent incidents where I narrowly escaped by bystander help over my outspoken nature on what they did to me and my family, on Trump and on Elon Musk. I will not be intimidated into silence nor into fear of using my right to free speech, free expression nor my perceptions of tragic and traumatic life events these men caused me. This is a big cause for concern moving forward as Trump encourages violence towards otherwise peaceful unapologetic intellectuals who do not support him.

1.2 Things the judge needs to know about the respondents

Anthony Reco Wright / Zach Bradford / X Musk:

- Has stalked me in Chicago out of uniform in a CPD marked car;
- He can be arrested for criminal sexual assault when he is served (JH146416);

Andre Torres:

- Has concealed handgun permits in Florida. He has stalked me in a marked Pensacola Sheriff vehicle out of uniform. The FDLE and Pensacola Sheriff office refused to do anything to stop him.

- He is a sex offender from out of state. I do not believe that he has registered in Illinois. He was living across the street from an elementary school when he attacked me in Chicago. He can be arrested when he is served;

Phone numbers:

- 229-300-3231 or 404-992-2568 (Anthony Reco Wright / Zach Bradford / X Musk)
- 440-361-5021 (Liz / Y Musk)
- 607-644-3624 (Andre Torres)

2 Incidents - in roughly chronological order - not comprehensive

- **Date:** 2018
Location: Atlanta, Georgia on the Georgia Tech campus outside of my apartment building at graduate and family housing
Description: *I began to see another resident at my new apartment building in Chicago frequently when I left my locked unit. I realized that I recognized him from a memorable encounter from 2018 on campus at Georgia Tech. In that incident, an apparently drunk undergraduate approached me from above the steps I was sitting on while smoking and crying after an assault that had happened in my apartment. He mimicked a voice I knew from my past (that of husband, Jason Zych) and was wearing a black leather jacket that resembled that of the original source of the distinctive voice from my first years as a college freshmen in Urbana, Illinois. In hindsight, I reflected and wrote down to mention that this man resembled the physical form of Andre Torres in disguise, an artifact of encounters with him and Zach Bradford where he used makeup and/or theater costume paint to approach me without raising immediate concern at the interaction.*
- **Date:** 2021
Location: On-campus apartment at Georgia Tech in Atlanta
Description: *The man broke into my apartment to break a sex toy after I used it pleurably. Misogyny and toxic masculinity are a problem with these men.*
- **Date:** 2021 (estimated)
Location: Atlanta, Georgia
Description: *There was a GA state drivers license taken out illegally in my name. I found this out through Chase bank's online site in late 2022. I have not seen the photo to ID on it. ARW/ZB/X put his Nationwide car insurance bill on my credit report living down the corridor from me at graduate housing where he was an unmarried undergraduate. Identity theft takes on a very dark interpretation when you see that he tried to murder me multiple times and wanted to have someone else assume my credentials and take my place in society afterwards.*
- **Date:** 11/2022
Location: Casper WY Super 8 motel
Description: *I booked another hotel after he and my sister's ex-lover, Andre Torres, had checked in and paid for their room at the same motel. For trying to leave, Zach Bradford (ZB) threw me outside my car on the ice leading to a badly fractured right elbow.*
- **Date:** Late January 2023
Location: Pensacola, Florida
Description: *AT dressed as my father (who has green eyes like mine) with black glassy meth eyes ranting telling me not to "tell on him" (juvenile language). This was after my flight back to Pensacola from outside the country where he and ARW/ZB/X had viciously attacked me. Very recognizable (VH1 Mob Wives) mafia associates tied to John Gotti continued to attack me in Florida until I left on a flight into UNICEF/Tel Aviv.*

- **Date:** April, 2023
Location: Varied (Tel Aviv, Chicago)
Description: *Older stalking incidents (AT): In UNICEF area of airport after (Space Force) flight to leave Florida in a shamrock green Raiders hoodie; on Subway coming into Chicago (got on same line and went car to car before sitting near me and smoking on the train while I was disoriented).*
- **Date:** 07/04/2023
Location: Under Wilson train station (CTA Red Line subway) on N Broadway in Chicago
Description: *ZB rode down the street near my current residence, which he should not know, on a skateboard. He came back on foot a few minutes later to make aggressive gestures at me. There is significance to this date from another incident in Atlanta (ride in a Tesla car on the holiday). Police report: JG348851.*
- **Date:** 07/14/2023 (approximate/estimated)
Location: Chicago Public Library (Bazazian branch)
Description: *I was listening to music on my tablet using library WIFI sitting outside on the sidewalk. The WIFI froze and both AT and ZB drove by across the street in a van that was blasting the song at the same point where my tablet froze. He got out to glare at me before leaving with another driver. Police report: JG348851.*
- **Date:** Week of August 13, 2023 (new apartment move-in)
Location: Chicago apartment (zipcode: 60649)
Description: *On the afternoon/night of the move-in date to my new apartment (Wednesday, 08/16/2023), someone was able to enter the locked / gated apartment building and pick the lock to my apartment which was dead bolted and locked at the lower door handle. The theft of two beer cans from my refrigerator has small monetary value, but the incident is indicative and significant as it marks continued efforts by multi-year, long-term stalkers to follow me not after I fled from Florida to Chicago in 04/2023 many months after I waited to sign my apartment lease. There is video from two surveillance cameras in the hall outside my apartment and along the exterior of the building to capture the break-in. In spite of police report #JG387311 to document unauthorized entry into my locked apartment, no detective has followed up with me to have me identify the burglar after the responding officers that took the initial report assured me that they would be in contact to assure my safety.*
The following incidents happened around the time of the police report while waiting for a follow-up contact call from the detective assigned to my case:
 - *Metal shavings of the suddenly loosened new (originally very tight) deadbolt lock on my door were observed on the floor of my apartment near the entrance.*
 - *The closet door in my bedroom was punched in, off its railing in an apparent rage by the burglar after I drafted notes about stalking events in private in the apartment. This was reported to the officers that took the details for police report #JG387311.*
 - *The printed papers for a technical interview study guide I was reading were left out on my end table. The printouts of the section I was currently reading were unusually, suddenly shuffled in order and page orientation as though in attempt to confuse or delay my progress in preparing for the task. This type of overt aggression towards me to micro-managerially dominate and control all aspects of my life, up to and including the minutia of my daily routine, reflect how disturbed the individuals acting out this way toward me have openly become.*
 - *Over Labor Day weekend, I was drugged to the point that I was disoriented, abnormally sick and slept through Sunday and all day on Monday unable to get out of bed. This marks the second year in a row on this holiday when I was brutally attacked. I believe I was drugged through an open bottle of alcohol that I had left in a closet in my locked apartment. I sent a private email on my (hacked) cell phone with a reference to recent events related to this with a pointed reference to red hair. The next morning, a man I recognized as Zach Bradford (or X Musk) blocked my entry to the building back entrance by slowly moving down the stairway. He had hair that was obviously recently dyed reddish in color and blue-colored contact lenses in his eyes (recurring satanic gesture).*

The repeated entries into my apartment the first few weeks after I moved into the building would have taken place with me a short distance away from my unit when I left to walk outside for breaks at the front of the building.

- **Date:** Wednesday, September 13, 2023

Location: Communicated on a phone call to contact a detective about report #JG387311 after the second continuation of the order of protection (stalking/no-contact) case #23OP76293 – outside of the 555 W Harrison Domestic Violence courthouse

Description: *The responding officers that took the initial information for report #JG387311 stated that a detective assigned to my case would call me to follow-up and have me identify the burglar from the camera footage in the building. When I called nearly a month after the report was made (on 09/13/2023), the detective that took my call informed me that the police report stated that there was NO VIDEO of the illegal entry (as opposed to wording like officers were unable to identify the suspect). The men that stalk me are not bright/smart individuals which is reflected in the change of wording to state the negative of what they learned is incriminating evidence to document their actions. The detective also remarked that the police report had not been assigned any detective to it because it had been marked with a SUSPENDED status. The detective called the property managers to leave voicemail messages requesting the video footage nearly one month after the incidents occurred.*

One of these men (Zach Bradford) is savvy with computer hacking and would have easily been able to obtain illegal access to the report on the police servers and then modify its contents (and status flag) to cover up for himself getting caught breaking into my apartment on camera. This fact is corroborated in police report #JG348851 which documents online fraud activities on my bank accounts around the time I arrived in Chicago in April of 2023. These activities to illegally gain access to computer systems and their data are, in general, very hard to trace for anyone but the most expert computer security professionals. Moreover, records of the original data (police report contents, logs of changes to its status, etc.; original bank ledger contents and modification timestamps) are never accurately preserved.

Note: *I fled from Florida at the end of 03/2023 amidst very dangerous riots over the first set of indictments against Donald Trump in Mahattan (New York) into the custody of UNICEF workers in a wheelchair from my first flight out of Pensacola. I had approximately \$1400/USD in my checking account before I purchased the ticket for the flight to leave Florida with my life. The actions of the perpetrator (I believe it was Zach Bradford) to hack my bank account records led to me being left close to that positive (pre-escape figure from Florida) amount in debt after sudden reversals to fraud claims approved a month before. The key entry, which was insubstantial to the debt total, that signifies who was responsible and what the actions were in retaliation for was found in the reversal of a granted fraud claim that had reimbursed me for the bill at a Casper WY motel that I was unfairly forced to leave from by Debbie Fox, a Pensacola, Florida city council member who had come to Yellowstone National Park to pose as the motel manager, and which I had checked into the day these men (Zach Bradford and Andre Torres) had shattered my right elbow in rage at me leaving the first motel location.*

- **Date:** September 14 or 15, 2023

Location: Chicago Public Library, South Shore branch

Description: *These men called in a bomb threat to the library with threats at me and a cut headphone cable to prevent me from making a phone call to a lawyer for civil suits. I recall a voice that sounded like Andre's shouting at me that they are going to prevent me from "lawyering up". I believe that the cyber-attacks on 07/19/2024 are related to similar attempts to prevent me from getting a lawyer and filing this OP by shutting down computer systems.*

- **Date:** 09/2023

Location: Alone inside my locked apartment

Description: *Working on my badly hacked AndroidGo/BLU cell phone. References to 5/13 (father; Friday, May 13, 2022) and other prime integer sequence related references after I wrote a suspicion about that privately in my notebook (watched me do this). These are irreverent gestures to taunt me and flaunt that he can do it to me even after I discovered clear evidence of hacking and tampering with the phone. This is about power over me for him/them.*

- **Date:** Late 09/2023

Location: In or nearby my apartment building

Description: *The smoke detectors installed in my apartment are only located in the bedroom and bathroom areas (not near the kitchen where heat sources are located) are components of a wireless home automation system with battery backups to ensure that they are always online. I discovered this fact and began to inspect the units closely after I saw marked Illinois state Fire Marshall vehicles passing on the street as I sat at a nearby bus stop to adjust my hacked cell phone that had been the source of some memorable online posts about its installed-by-default software (such as: satellite GPS controls and modification software, international GSM operator modes and lists of the usages thereof, engineer mode application with very permissive configurations of internal phone / network settings, strange tests in the validation tools suite including darkweb square-thingy-bluetooth-grid-type location barcodes, frequency tuning and screen light source generators). When I returned to my apartment building down the street, I found the smoke detector device packaging with complete user manuals in the entrance space – obvious gesture as a hint left for me without explicit verbal communication (style that is unfortunately the norm given political controversy and active investigations surrounding big indictments this year). The packaging advertises high frequency ‘chirp’ schedulers to wake targets throughout the night, such as at the time of 2:25AM (another anti-Semitic number reference from past history with these stalkers). When I started to take down the smoke detectors and lighting to inspect them as instructed, I counted more than five encounters at precisely the same times I left my apartment with the man from the neighboring apartment with him agitated having body language aimed at intimidating me for my private activities. The Kidde home automation devices (misleadingly labeled as carbon monoxide detectors) had obvious cameras covered by plastic grated vents. After I covered the camera windows with opaque foil material, the encounters with the man every time I left my apartment to go outside – no coincidence. Hours later that night, the disassembled light in my bedroom had a plug that flashed with a blue LED light – a gesture suggesting that despite my efforts to remove the illicit surveillance, the stalkers still had the ability to watch me and install more devices to replace them from the apartment unit upstairs directly above mine. Note that I have photographs documenting that infrared (misleadingly labelled as a heat detector) and other illicit video surveillance devices were installed in my apartment at Georgia Tech in Atlanta when Zach Bradford was living in the unit next door.*

- **Date:** 08/2023 through 09/2023

Location: Chicago travel destinations by CTA

Description: *The stalking activities include accosting and/or suddenly surrounding me when I walk or use public transit outside of the confines of my apartment by Tesla vehicles and speeding luxury cars barreling recklessly down the street when I am attempting to cross at an otherwise safe intersection (a reference to the identity of Zach Bradford as X Musk, a son of Elon Musk, who owns Tesla).*

- (1) *I traveled to a pharmacy in Uptown Chicago to fill a prescription for a stimulant medication in august of 2023. Zach Bradford repeatedly stole this medication from my locked apartment while living in Atlanta, GA. I recall hearing audibly from a neighboring apartment after my telehealth phone cal with the prescribing doctor that ‘he (Zach) wants your [medication name] prescription’. When I arrived in the parking lot of the pharmacy to pick up the medication, not one (the usual) but three Tesla cars surrounded me suddenly before I entered the business. I walked to another store nearby after I put the prescription in my purse. A man I recognized as being affiliated with Donald Trump was aggressive standing next to me at a crosswalk where he uncomfortably violated my personal space and gestured to reach into my purse (as though to steal the medication, which was thwarted by my having covered the medication bag up with another garment for safety). The message here is that these men (Trump, Musk and their close associates) can do whatever they please to me with no fear of repercussions – in effect, as though they are above the law in their aggressive and often violent stalking actions.*
- (2) *I had written some notes privately in my apartment about longer-term connections and unusual incidents with high school classmates and faculty and possible civil recourse over the ties to traumatic events. This action was apparently covertly viewed by the stalkers in nearby apartment locations. This is evidenced by an encounter at a public CTA bus stop where I was accosted with*

flagrant, irreverent and very obnoxious gestures from a passing Tesla vehicle with a high school classmate (Tammy Redding, EHS) in the passenger seat taking video.

- **Date:** 08/2023 and 09/2023
Location: Weekly therapy (on-on-one grief and trauma counseling) sessions in Chicago
Description: *After the first meeting with the psychologist, his behavior became increasingly more hostile and passively aggressive towards me as a patient, at times trying to manipulate my intense emotional state to abuse the relationship based on trust with the provider to recover from past traumatic events. Actions to buy-off or corrupt physician or mental health provider relationships with malice towards me is a behavior pattern that is long standing with the group of stalkers I have been victimized by for many years. I believe that the behavior of this therapist is yet another of such actions to corrupt the trust of would-be allies in my life. The therapist made clear references to my prior living situation in Chicago (Guatemala travel: how will you feel?), used language I recognized from encounters with Zach Bradford in Atlanta (like "buddy"), and made judgmental references to recent activities I had engaged in privately alone in my apartment like the consumption of alcohol or written entries in my diary (notebook).*
- **Date:** 09/2023–10/2024
Location: Southshore Chicago apartment
Description: *Drill marks (holes) on my front teeth that now require dental procedures to repair.*
- **Date:** 10/2023
Location: Alone inside my locked apartment
Description: *Increasingly frequent and aggressive gestures over the last few weeks writing this down. Gestures made from the apartment unit directly above mine on the second floor include shouting and noises and stomping. Able to know where I am located in my apartment and what I am doing doing like middle of night notes reading so they can disturb my quiet time.*
- **Date:** 10/19/2023
Location: Alone inside my locked apartment
Description: *The name Trump screamed. Online stalking by shouting recent email references above my bedroom. Names include: Bruce, Andre, Margaret and Cinda.*
- **Date:** Fall 2023 – Summer 2024
Location: Southshore Chicago apartment
Description: *Facial scars from being hit (two of them: left eyebrow and left upper lip).*
- **Date:** November 12–14, 2023
Location: South Shore of Chicago
Description: *Police report for criminal sexual assault here: JH146416. Andre Torres was on a CTA bus with glassy eyes bragging in front of a packed group of people that he was going to kill me with rat poison. The sexual assault happened after I was jumped by X/ZB/ARW waiting for me in my locked apartment after I went into the local utility room. I took pictures there with my phone and ipad of many things including insects, a UPS box addressed just to Anthony, and instructions for how to clean up after burying me underneath my bathtub (scrubbing bubbles, not bleach). He apparently lost it and raped me. There is more to that night's story available on Youtube and Github. Some good people from Howard Brown Health helped me file the police report for rape in early 2024 after I had to get STD tests and a pregnancy test done there in early 2024 over spotty and missed periods.*
- **Date:** Winter 2023
Location: South Shore of Chicago
Description: *A link card balance of approximately one month of food stamps was stolen from my card (incomplete receipts verify). These men wrote down all of the things they wanted to do to me before they murder me at age 42 - the meaning of life from the scifi book The Hitchhiker's Guide to the Galaxy. My mom, knowing that, told me before she died that these men (cockroaches) will rip you off on food stamps to foreshadow recent events. The list includes plans to put me in dentures (coming from IV methamphetamine addicts) by the time I am 40 years old - one half of my life, in neo-nazi 3%*

spirit. They drilled on my front teeth (leading to the need for root canals and crowns) and shaved off the front of my hair to penalize me for filing the criminal sexual assault police report.

- **Date:** Winter 2023–Summer 2024
Location: My South Shore apartment
Description: *These men clogged up my shower/tub and had a bowel movement in it. These Satanists expected me to bathe in their feces. The letter X was scraped on the side which coincides with ARW/ZB/X's name and Elon Musk's Twitter re-branding.*
- **Date:** Early 2024
Location: Southshore Chicago
Description: *Litter thrown down usual paths (clean before I started taking the routes) to taunt, like a Taco Bell bag in my path after I mentioned in my apartment that I do not like Taco Bell or items stolen from my trash before they were taken out.*
- **Date:** 2024
Location: Southshore Chicago Public Library
Description: *RNC (as in the Republicans), Heritage Psychiatric (Project 2025; Elon Musk) and Bernie book with NPR (as in the radio station) car emblems on vans stalking me near the South Shore Chicago Public Library.*
- **Date:** February, 2024
Location: Apartment in Southshore Chicago
Description: *Shaved front of my head with a men's beard razor trimmer (most likely in a rage the days before I filed the police report for criminal sexual assault, though my memory was impaired at the time over drugs he/they had slipped me against my will).*
- **Date:** February 2024
Location: My South Shore, Chicago apartment
Description: *AT shaved off the front of my hair with a men's beard trimmer (man bangs) for filing the police report about criminal sexual assault. He is violent, vengeful and has no remorse. He feels like he can control every situation by threats and intimidation.*
- **Date:** Spring of 2024
Location: Online stalking (hacked ipad)
Description: *I took a screen recording of an Amicus podcast suggesting that Trump is like John Gotti. My father was involved in Gotti going to prison after he murdered a close federal agent. There was an entry I did not add in the Notes app on my hacked darkweb ipad I purchased outside the country with a photo of the podcast title. Whatever it was about that, more so than other topics, really set these men connected to organized crime off.*
- **Date:** July of 2024
Location: CTA bus and Red Line trains
Description: *Death threat from a visibly intoxicated ARW/ZB/X. A black man high on crack was threatening to shoot me. Before it happened I saw his friend I knew as an acquaintance from Atlanta and a man that looked like a concerned Mike Pence on the subway.*
- **Date:** Mid 2024
Location: Bezazian Chicago Public Library
Description: *Both AT and ARW/ZB/X stalked me at a public library location over a Youtube post about offensive rhetoric by Florida Governor, on DeSantis.*
- **Date:** Summer 2024
Location:
Description: *I was stuck with an IV needle in a space/sea mask after very brief comments about ARW/X/ZB's father's ketamine use being intravenously administered. This use of the drug was communicated to me from health practitioners I see. I had to take PEP (full HIV positive treatment; not*

PrEP) for a month which is what nurses take when they get a patient needle stick as a HIV preventative. Elon Musk's ketamine usage is public knowledge, for example, as discussed in the Don Lemon Show interview with him. That interview is deeply personal for me as almost every other comment he made was a personal dig/sleight at me including a reference to my late mother's (father murdered) doctoral dissertation.

- **Date:** Summer 2024

Location: Outside of work on the Southside of Chicago

Description: *Stalking at my new job as a math tutor at Chicago Public Schools by AT (in person). He was waiting for me out by my bus stop in a parked car the first day. They destroyed the belt I was wearing on my first day of work in my South Shore apartment the day after I changed and left those nice dress clothes there. Within a week of starting work, the route I walk to get to school from my bus stop was littered with trash (including denture paste boxes), tobacco products and wine, as though I would be penalized at work for him leaving that there. The trashing out of my spaces also happened along the path I walked from my South Shore apartment to the local public library shortly after I started taking that route.*

- **Date:** Summer of 2024

Location: South Shore, Chicago apartment

Description: *After observing a text message and phone call with a Howard Brown (HBH) provider illegally, these men placed a fake phone call to my cell asking me for my birthdate first pretending to be a nurse responder from HBH. They insultingly taunted me (with no income at the time) that I could not get an extra strength Tylenol script filled with medicaid because the medication is available over the counter (not the first such incident). This reflects their irreverence towards me being able to live my life like a normal person would because I cannot afford it (to live). The response from HBH providers was to write me 90 (rather than the requested 30) days of the medication which was filled that month.*

- **Date:** 7/2/2024 (morning)

Location: 69th and Jeffery bus stop (near my apartment)

Description: *Andre Torres in white car + graphics with pained look on his face (visibly intoxicated, not having slept) staring at me going to work after a suggestion made aloud in my apartment to record his shortwave/transistor radio broadcasts. Also, mentioning aloud that he had not registered as a sex offender living across the street from an elementary school in Chicago. The technology he/they are using is a cell phone jammer and affects the function of my kidneys.*

- **Date:** 7/2/2024

Location: Outside the HS where I work on the Southside of Chicago

Description: *Around noon near my therapist check-in, Andre Torres was down the street calling my name in an obnoxious voice. After work, there were cigars and a wine bottle left along my walking path. He thinks that leaving that out in front of the minors I work with will get me in trouble. The man is like dealing with a toddler high on methamphetamine.*

- **Date:** 7/2/2024 @ 4:30PM

Location: South Shore Chicago apartment

Description: *A call from an imposter Howard Brown nurse after a text they evesdropped on my phone through illicit surveillance. They wanted to make me feel as though I could not afford the extra strength Tylenol (acetomenaphen) prescribed to me by my provider. Someone communicated this to Walgreens. Days later, they filled 3X the script size I requested (90 days). Police report: JH335803.*

- **Date:** Week of 7/6/2024

Location: South Shore apartment

Description: *White toxic spray that burned to the touch was put on my clothing and chair in the apartment while I was out.*

- **Date:** Wed 7/10/2024

Location: South Shore Chicago apartment

Description: *Left salad dressing (Goddess) in fridge; I was poisoned so bad the next day after eating it that I had to miss work the following day.*

- **Date:** 7/12/2024

Location: Outside work on the Southside of Chicago

Description: *Fingerprints on a cigar package 'gift' (possibly drugged) left outside with a lot of trash.*

- **Date:** 7/13/2024 at approximately 3:16PM/CST

Location: South Shore apartment

Description: *Shouting men in the apartment above me. There was remote (abnormal) clicking of my gas burners which had happened in the weeks before when these men were angry that I could use my gas burner to light tobacco while I was unable to afford a cigarette lighter. This was the day President elect Trump was nearly assassinated. It's not a coincidence. They knew hours before the shooting and wanted me to be panicked and screaming when it went down. These men are crazy. NPR reported that the FBI took the allegations seriously. They should take them more seriously - it was staged.*

- **Date:** 07/19/2024

Location: South Shore Chicago apartment

Description: *I wanted to have sex with a black man just to piss them off watching me in that apartment. While having sexual intercourse with my date, the man (watching the events reveal) rang the front doorbell nearly 15-20 times. My date said he is a 'psycho', but refused to acknowledge that he is connected to Trump. Typical (both ways) of Trump's base (not supporters which is an interesting choice of words). This documents that he was watching me with spy cameras in the apartment - this illegal stalking has been going on for at least a decade.*

- **Date:** 07/23/24

Location: Southshore Chicago apartment

Description: *Loud shouting and violence leading to radiation burns from the apartment above. What apparently triggered this outburst was me liking the smell of Sweet Dreams tea because it reminded me of my late mom.*

- **Date:** 07/24/24

Location: (near) Southshore Chicago apartment

Description: *Fire alarm threats as I left the apartment coming from the remote controllable Kidde home automation device he installed for illegal surveillance on me. I saw Andre in a car coming from the alternate (unusual for me) road I took to the #15 Jeffrey/70th stop turn to drive right in front of me at 6:15AM after I left the apartment to go to work anyway. Another instance where I have been very viciously attacked for trying to leave this abusive situation.*

- **Date:** 07/25/24

Location:

Description: *Harassment from strangers connected to the stalking on busses to and from work (comments about my cats out of context - recently, childless cat ladies and threats to execute my kittens at a presidential debate).*

- **Date:** August 2023 – September 2024

Location: South Shore, Chicago apartment

Description: *Phrases shouted at me from the apartment above with or without the window open are very hateful and concerning. For example, the tenants above (these men) shouted "Heil Hitler" at me. They also were ranting while high on methamphetamine (characteristic of that drug) "Piggly Wiggly when you were four years old" (what you don't remember me). That was Andre in Northern California at the time at age eleven bragging about injecting meth and being a part of a gang initiation ritual. Another shocking thing shouted at me was: "Hold on, I'm fucking; you're not fucking". These men apparently believe I'm their sex slave - human trafficking methods.*

- **Date:** August 2023 – September 2024

Location: South Shore, Chicago apartment

Description: *These men had access to the apartment above mine. They used that physical proximity to attack me very viciously. This includes radiation exposure to the point where I had sunburn staying indoors during the winter. They also used intense pulsation to torture me and my cats which I believe was a modified ground penetrating radar source. There were many baking soda bombs to overflow my toilet from above (anti-Semitic Mario plumber reference) on select key dates including the birthdays of late/murdered family, Thanksgiving, Christmas, Memorial Day (Daddy was a draft dodger). On Wednesday 8/7/24, there was a notable incident where their broadcasts/radar were so intense that it jammed the cell signal (typical at the most violent of moments) and caused me a severe headache and vomiting. These men did not hesitate to systematically destroy all of my belongings left in the apartment and punch holes through the sheetrock with their fists. They just keyed in the front door like the apartment was theirs.*

- **Date:** 09/04/2024

Location: Police station on the westside of Chicago

Description: *At approximately 03:19AM the phone reboots to revert me from having an alarm to work. This type of activity is apparent to me as a sign of online stalking. When the phone came back up (I should have been asleep), the phone network on boot was the usual with the suffix '-2' (abnormal). After the reboot, developer options had obviously been installed on the phone (again, abnormal) – the screen doesn't turn off to drain the battery to prevent my alarm and substantial battery drain after the reboot.*

- **Date:** 09/04/2024

Location: My South Shore Chicago apartment

Description: *My phone reboots out of nowhere - no alarm to work - obvious sign of stalking. The new network for the phone was different with suffix '2'. The screen hangs on until dismissed - a sign that developer options on the phone were turned on without me clicking through the usual sequence. This has been going on since Albuquerque (2022) where these men try to keep me awake until my first goes off. I do not know what it is about being normal and keeping a job that sets them off.*

- **Date:** 09/05/2024

Location: Area 4 (district 11) police station

Description: *A prisoner release accosted me, spit on a friend's belongings, then left. The police refused to do anything about the incident. The previous night my headphones were stolen while I was sleeping listening to a favorite pro-Harris radio show. When I got up to use the bathroom, my spot on the pavement was taken with the man who did it making aggressive gestures towards me.*

- **Date:** 09/05/2024

Location: Area 4 (district 11) police station

Description: *Denied basic services I was allowed to use the day before and afterwards. This made me have to miss work. The officer that told me I was not allowed to use the bathroom used the term (#)NoMeansNo meaning that she referenced YouTube community posts I had made that would have set these men off. This incident occurred after I gave an officer the information to track down ARW for criminal sexual assault. He showed up one night at the police station making references to illicit surveillance of me and friends where I am staying.*

- **Date:** Fall (09/10) 2024

Location: District 11 Chicago Police Headquarters

Description: *ARW/X/ZB showed up in the middle of the night outside of the police station where I have had to sleep with friends to escape sexual abuse from him in an apartment setting. He ranted, obviously intoxicated on methamphetamine, out of context quotes from conversations I have had with friends there to try to intimidate me by his illicit surveillance and stalking of me there. He would only leave after we told him we would get an officer to arrest him for the warrant out for his arrest for criminal sexual assault. He tried to give me food (likely poisoned or drugged) and convince me to get an apartment where he could continue to abuse me.*

- **Date:** 10/18/2024

Location: Southshore Chicago Public Library

Description: *Phone call to the Illinois state bar association. They told me I was unable to sue Donald Trump nor Elon Musk in Illinois civil court. I believe the phone call was intercepted by these men in attempt to prevent me from getting a lawyer.*

- **Date:** 10/18/2024

Location: South Shore Chicago Public Library

Description: *A call to the Illinois state bar association was intercepted. They (falsely) told me that I cannot sue Elon Musk nor Donald Trump from civil court in Illinois.*

- **Date:** November, 6, 2024

Location: Subway restaurant on the Southside where I work

Description: *I was poisoned, most likely with rat poison, over Youtube posts made on election day. Andre Torres, close associate of AT/X/ZB – probably involved, has previously bragged in front of me on a packed CTA bus about killing me with rat poison.*

- **Date:** November 12–14, 2024

Location: My South Shore apartment

Description: *AT has bragged on a packed CTA bus about murdering me with rat poison. The plan was apparently to bury my body underneath the bathtub of my South Shore, Chicago apartment. I found and photographed instructions for how to do that and clean with scrubbing bubbles (not bleach) in the utility room of my apartment building where these men were also staying. That discovery led to me being jumped and raped in my apartment by ARW/X/ZB. The same night he put human bone remains on a xylophone and told me that these were the remains of my late father who was murdered (in mafia movie style) on Friday, May 13, 2022 after eulogizing my mother. The police report was filed in early 2024 with help from very kind and supportive case managers at Howard Brown Health. Filing the report led to AT shaving off the front of my hair (man bangles) with a men's beard trimmer and new facial scars on my forehead / nose and on my upper lip from blunt force trauma and getting beat up by them.*

- **Date:** November 12, 2024

Location: Walking to #15 bus stop from work on the South Side of Chicago

Description: *Andre Torres cat calling me walking down the street to the bus stop from work. After I ignored him, he followed me for more than 45 minutes and pulled up next to my bus visibly intoxicated. This was a short distance from the Walgreens where I regularly purchase goods. I view it as another attempt by both of them to intimidate me with a threat to poison me.*

- **Date:** 12/02/2024

Location: Chicago, Illinois, USA, North America, Earth

Description: *My phone data was used up completely in 2–3 days. While this was going on, my phone battery life was used up extraordinarily quickly. Once the data was turned off, my phone battery usage went back to expected normal. This means that these men continue to hack my phone with permissive and resource intensive spyware to surveil me illegally and stalk me online.*

- **Date:** 2023 and 2024

Location: Varied

Description: *Chicago police reports: JG348851, JG387311, JH146416 (criminal sexual assault), JH217280, JH323936, JH335508, JH354463, and JH356172; Also: JH356172, JH430603 and JH442999; These police reports include topics of bank account fraud coming into Chicago, drugging / tampering with prescriptions in my apartment, several break-ins to my apartment and theft of my first paycheck after stalking at work. The report I filed in August of 2023 for theft was closed without me being contacted and was obviously tampered with.*

- **Date:** 01/10/2025–01/11/2025

Location: Chicago, Illinois, USA, North America, Earth

Description: *My bank called me with a declined fraudulent transaction indicating these men know my bank account (debit card) information. This is the day I was set to e-file for a restraining order against them both. The day before (Friday), AT was shouting at me near a bus stop from my new women's*

shelter. There were no stalking incidents in the weeks prior to me returning to work this Monday. After Monday, he followed me from there to my new secure location. The man is crazy.

Longer term history with respondent

Notes for case #23OP76293

Document created by Dr. Maxie Dion Schmidt

Updated on October 20, 2023

1 Introduction

The judge for my initial court hearing to obtain an order of protection encouraged me to come to this hearing in person to give more details to the long term history of the case to justify obtaining this order in Chicago. These are the notes I have prepared for the second judge. She told me at my court hearing in August (now continued into September) that she would read these notes after I was able to locate an active address for the respondent to be served papers notifying him that he may appear at the hearing.

2 Incidents since the first court hearing

- Police report #JG387311 filed after I moved to my new apartment on August 16, 2023. I communicated to the officers that I suspect that the respondent was responsible for keying into my apartment multiple times. I had oddities with my cell phone service provider being reported as a strange 'AT&T...1' instead of the usual service provider. My phone was on with the abnormal service provider during the travel to my new residence. I believe this is how he tracked me there. How he got into my building with locked gates and locked doors is something I do not understand.

The same day I requested that my apartment building manager pull the video waiting for a detective to be assigned to send to the police, there was a man outside my apartment snickering at me. He proceeded to call the phone number for leasing posted outside of my building to complain about cameras outside given that there is a school across the street. I believe the respondent is responsible for this. It reflects his attitude which is to continue his behavior and make attempts to prevent himself from getting caught entering the apartment building. It can also be construed as being actively aggressive towards me as the victim of all this.

- I recognized Andre Torres (known associate of the respondent) in a white minivan about a block from my previous residence. This was about two weeks before I moved.

- At my old residence, I would frequently visit the beach bike trails in Lincoln Park. The week I saw Andre in the minivan, I had an encounter with some strangers shouting at me in the park sitting at a bench in front of yacht (boat) parking. They told me that there was a man with a phone looking at me awkwardly. They urged me to leave. When I returned to the park later that afternoon there were oddities like street lights on during the daylight on my street route.
- There was an exchange over email with someone using my sister's email address since the first court date. The language and writing style was disorganized and not characteristic of her short messages prior to that including berating me for a number of things and with details about my life events this and last year that I had not disclosed to my sister. This was an apparent reaction to my long email preceding that message where I gave many details of some of the unusual events I have experienced the last year and a half including accounts of the verbal exchange with former president Donald Trump and two of his sons in Lincoln Park in Chicago on Juneteenth of this year (more details of the exchange can be provided if requested for the court hearing). The unusual email message used the wording 'disheartening' which is not usual for my sister's vocabulary as a community college student in her mid thirties. The wording of 'disheartening' is also striking to me because it is how I described the feeling of not having the emergency order of protection granted at my first hearing to a confidant in the group home I was living at. Apparently, someone overheard the conversation and reported my wording back to whomever had sent that email (most likely, Andre Torres, using her phone). This is another example of the type of non-in-person stalking that I have to endure connected to the respondent and his known associates.
- Since moving to my new apartment, my neighborhood along the routes to destinations I printed at the public library near my last residence were papered / graffit-ed with items intended to intimidate me, or otherwise let me know that these men were around and aware of the second court hearing in August of 2023. A few of them included copy shop print outs of handwritten messages stating the following: 'Kim Foxx is a child abusing crook'. After the second court date on the second floor of the domestic violence courthouse at 555 W Harrison, I recognized the name of the state attorney, Kimberly Foxx, on her office door while sitting outside of the courtroom waiting to check in for the hearing.

This is typical of the men connected to Trump and Musk (see the next background sections). That is, to run a smear campaign as though real life (NOT a game) were a high school popularity contest or a vicious political campaign for public office. I interpret the 'child' reference in the quote as meaning 'kid', which is the way that satanic adults refer to themselves, i.e., as children or kids of the devil. By allowing me to petition for the order of protection, the respondent and his friends view the courthouse

officials as being harsh (even abusive) towards them by not allowing them to act out towards me in their stalking episodes.

3 More related background

3.1 Longer term background

- Antisemitism is a major factor in the stalking, violence and traumatic events I have had to go through because these men were in close proximity to me. These men are neo-nazis and are satanic. Having been exposed to members of a hateful satanic cult should go very far to justify what I have had to go through with them around me and why I need to have them as far away from me as possible by law. These people will do me more harm if this continues.
- My cousin started dating one of Donald Trump's sons by a mistress (extra-marital affair) in approximately 2012–2013. This is when my family and I started being attacked on a frequent basis. I have been very severely drugged against my will and raped countless times (including by him, McDonald Provosty) since he came into the picture. I had neighbors from Argentina living on my floor at Georgia Tech my last year there completing my doctorate, who like Zach, were not graduate students. According to McDonald, Argentina is where Hitler escaped to after WWII.
- The respondent, Zack Bradford, introduced himself to me at one point as X Musk, one of the billionaire Elon Musk's children. This was in Atlanta in 2020. I was introduced to him by that name in the room with his sister, Y Musk. The single letter names, X and Y, are a reference to chromosomes. I have inside knowledge that their father believes he is the devil. The names signify that humans (women in particular) are kids of the devil.
- The inner circles of men with these type of billionaire funds lets them do things and pay people off to get away with nearly any sick thing they want to do to someone else, like me. These men really believe that they can do anything to anyone they feel like with the expectation that no harsh consequences will ever come to them for their actions. They believe they are above the law and untouchable in this way. My experience with men like the respondent and McDonald is that they have never understood the meaning of the word 'No' the way normal people learn the concept early on. Moreover, it is impossible to penalize these people in civil court with anything close to their monetary worth when they would literally take everything from me, up to and including attempts on my own life. This bolsters their attitude.
- Since moving to Albuquerque for my first job out of graduate school with Sandia National Labs, where I was very brutally targeted and attacked by

these men, I have met many famous and powerful people. This includes members of the US congress, including members of the January 6th committee. I also met Sean Penn in Bogota and saw him on my bus coming into Chicago through Gary, Indiana. My husband was murdered in front of me in 2006 with a large bullet wound and a swastika drawn on his chest. My mother communicated to me before she died that Trump was responsible for organizing the violence my family has experienced for decades. My Uber driver to the airport in Colombia (after meeting Sean) was someone I recognized as a CNN affiliate. He asked me if I had a husband. With in a month of going back to Pensacola, Florida after having been kidnapped and brutally assaulted while there, Fareed Zakaria made a reference on air to one of my dead husband's favorite lecture hall sayings: 'Let's get started' (with a very warm smile).

3.2 Background since the respondent moved next door in Atlanta (approximately January 2020)

- I have first hand knowledge that the respondent is savvy with paying for things (effectively anything he wants) with bitcoins on the darkweb. This includes drugs and illicit black market technology. Please refer to the first police report I gave on the paperwork for my first Illinois civil court date: #JG348851.
- The respondent made a snide comment to me about him thinking something about me and repossession of a (Tesla) car in Atlanta. This was an apparent reference to what I went through buying a new car in Albuquerque. The legal wording in the documents I was provided for the car purchase and also in my apartment lease has clear signs that they viewed me as property (a human trafficking victim). I stopped breathing from carbon monoxide and nitrous gas poisoning after having to drive that car through Yellowstone National Park, which I got badly trapped / lost in with GPS directions on a hacked cell phone that had malware installed on it. My cat and I were tortured driving in that car for weeks there.
- I was severely drugged by the respondent, who lived down the hall from me in Atlanta and would not have hesitated to just key into my apartment to steal my prescription medications like Adderall or drug me by slipping something into my open containers. Within a month of him moving in at the beginning of 2020, I was in the emergency room for signs of a stroke. I ended up in the ER in Atlanta several times over the drugging and for severe UTI symptoms that were abnormal for me up to that point. Most people I tried to appeal to stop Zack from this covered for him by denying he could get into my locked apartment or not taking the repeated abnormal medical symptoms seriously.
- In conversation with the respondent in Atlanta, before my mother told me to cut off all contact with him after she talked to the Georgia Tech dean

of students following a severe drugging incident, he communicated that he had been living on the border of Florida and Georgia, near Pensacola where my immediate family were living at the time. The last known phone number I have for the respondent (229-300-3231) has an area code that puts him near where my immediate family lived in Northern Florida. I believe that that geographic connection is why men like him and Andre Torres came into our life and caused my family and I harm. One of the GTPD officers responding at my door in Atlanta after I reported on of 2–3 incidents of theft of my prescription medications was someone I recognized as being affiliated with the Pensacola Sheriff’s office.

There was another incident in my on-campus apartment in Atlanta in 2020 where someone had broken into (keyed in, or picked the lock) my apartment. A laptop I had in my second bedroom office had the case broken, as though done hastily in a rage, and had an internal SATA hard drive removed from it (stolen from my locked personal residence). To remove the stolen hard drive, it should usually require removing multiple screws around the laptop case (time consuming) and removing other internal parts of the computer that were on top of it. I believe that the action was retaliation for my posting files archived on that laptop (a secondary computer that I used only occasionally, and that he may not have known about) providing images, screenshots and binary files documenting malware that I had recovered from an old cell phone to a GitHub repository. I believe it was the respondent that is guilty of the bold and angry action. He was living a short distance from my front door at the time and would have been one of the few people in a sparsely populated building during the pandemic with access to do that in a ten minute or so time period when I left my apartment to smoke a cigarette outside of the building. Some of the data in the files could have identified him if a savvy security expert analyzed them, and hence, the reason for his apparent rage in taking the rest of my archived files on the laptop out of my possession by the theft.

There were obvious fingerprints on the dusty inside of the laptop case that would not have been mine as I opened the remains of the broken computer case in front of the GTPD (campus police) that responded at my apartment to take the police report. The campus police refused to analyze the fingerprints inside of the laptop because some of them could have been mine. This is the type of excuse enabling the respondent’s inappropriate behavior that I have had to put up with from out-of-state authorities that should be willing to protect me and act on my behalf to stop him. I hesitate to mention that there may have been undertones of a threat at ME, as in MY fingerprints were also on the stolen property in MY apartment, but that attitude has so far been very common in people that cover for the respondent’s actions and aggression towards me. The laptop case with the missing / stolen internal hard drive and fingerprint evidence is, to the best of my knowledge, still in storage in an evidence

locker with the Georgia Tech Police Department (GTPD).

- The respondent made comments in front of me in Atlanta about everyone who lives down the hall from him ends up hating him as a preview for what he would put me through. He also made allusion to him having lived down the hall from me in 2014–2015 in Seattle, Washington where I was severely drugged in my apartment (building bought out by new management the week I moved in) and brutally raped.
- The respondent tried to get me to take all sorts of illegal controlled substances he was in possession of. This includes offering me Molly / MDMA the night before I had to teach calculus as instructor of record for the first time (I declined). The man is an unstable hard drug addict. He showed a copy of a print book of how to make street drugs at home. I told some people at the time that I believed it was a copy of the drug section of the infamous banned book, the Anarchist Cookbook. He wanted me to touch the book which I would not do.
- I am in the process of getting an attorney to deal with the financial fraud I experienced over the respondent living in close proximity to me. In Atlanta, this includes his unpaid Nationwide car insurance bill being put on my credit report. I learned in Albuquerque that someone else had taken out a Georgia state driver's license in my name. I am unable to get a picture of the photo on that ID without going through a lawyer from Chicago. There is much more to the history of me and my bank accounts being fraudulently ripped off. This includes Bank of America credit card late fees that were abnormally high at \$225 a month my last year in Atlanta. That number is significant to the history with the respondent.
- I have experienced illicit electronic surveillance for years. I believe this is due to illegal actions by the respondent. This includes malware and remote surveillance tools being installed on my computers, tablets and cell phones for him to stalk me and gain access to my sensitive personal information. I used Google LENS to recognize that a 'heat detector' in my apartment was actually an IR camera. The GTPD and housing people at Georgia Tech refused to let me take it down claiming it was an essential component of their fire safety systems. I had a campus police officer show up at my door in Atlanta to force me to put the device back up. How would they have known an illicit camera device had been taken down in my closed apartment?

I have met a lot of famous and powerful people since last summer when I moved to Albuquerque to take my first job out of graduate school with Sandia National Labs. To the best of my knowledge this was the location of the famous Area51 (Argentina; sun port). This post is a follow up to the last post in this thread from last year. There is a lot more to all this that I cannot or for a number of reasons will not yet write here. I have been encouraged to eventually write a book. I also want to make sure that my archived records are eventually public domain so they will stick to the historical record and will not end up classified into obscurity or deleted entirely.

I want to go through a lawyer to make sure that Nancy Pelosi has complete copies of SMS/text sessions that were exchanged the day her husband was tragically murdered. This was the afternoon Elon Musk bought Twitter. I am certain that I was chatting with Liz Cheney, a member of the January 6th congressional committee, using an alias following the previous post. I'm also considering going through a lawyer to see if I can take up part of the state department's bounty for 2016 election fraud (mentioned/linked above). I have documentation of strange timezone data on a phone I purchased elsewhere that suggest gerrymandering of countries and continents (in effect to suggest double and triple counting of USA territories) with extra timezones from Indiana, Kentucky, Antarctica and many other non-standard oddities.

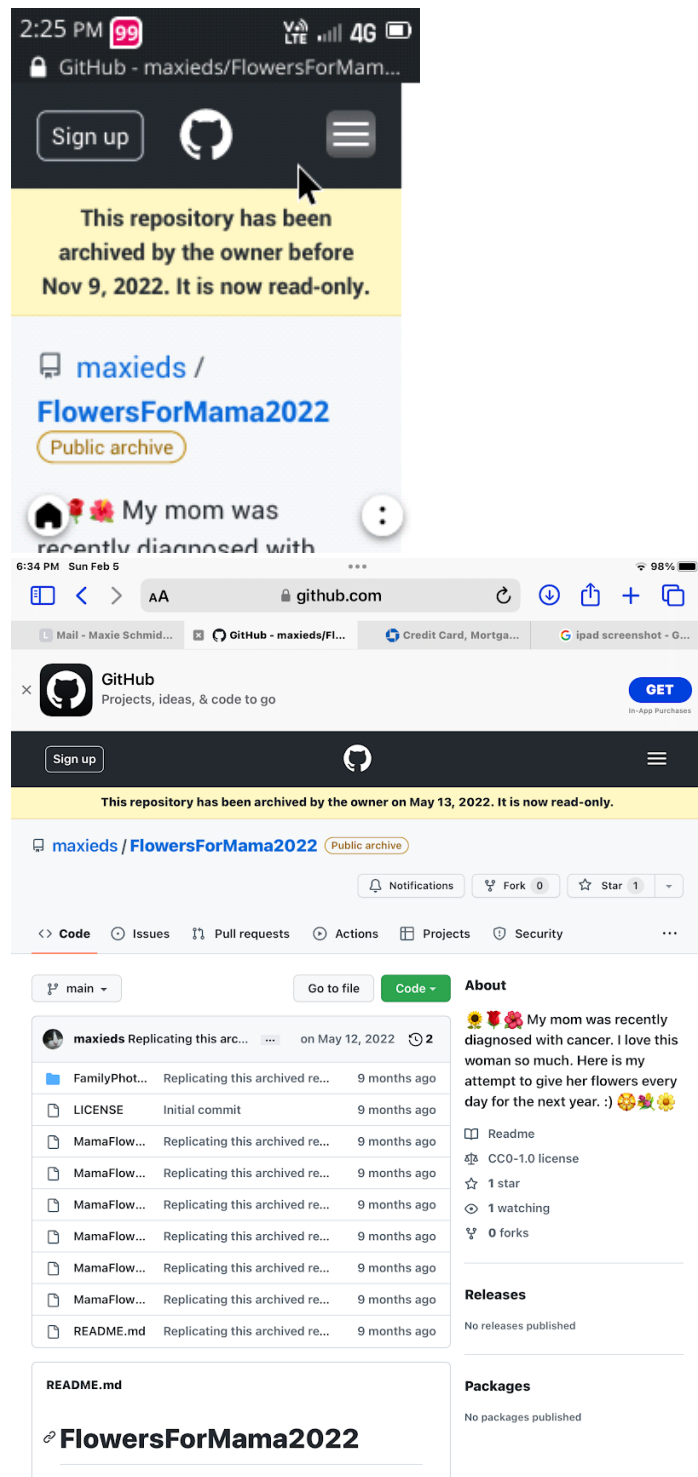

I briefly met Jim Jordan (Ohio representative) unexpectedly at a bus stop in Florida. He was polite to me that day. This is an apparent reference to the then private repository (link: <https://github.com/maxieds/InMemoryOfCrazyPrePandemicFlorida>) having been examined following the FBI tip report that I created it to accompany. One detail that I recall being in one of those documents was about a private Twitter feed by a young red haired snowboarder named Jason Zych with approximately 3.3M private followers. Days after I had submitted a tip report containing that detail, Adam Kinsinger (Illinois representative), also on the January 6th committee, clarified its meaning without context on CNN. He said it was the number of active duty USA military available to deploy to the capitol on January 6, 2021. That means that the organizers of the capitol violence intended to take power and control of Washington D.C. by force in an apparent fascist coup. The capitol riots that started on January 6, 2021 at President Biden's inauguration were a bloody siege on Washington that took (depending on which news report) nearly a week to quell. CNN has termed these events 'The Insurrection'. I have heard that China backs Biden should we need them to maintain control of the country.

I left Florida on a flight through Atlanta earlier this year (2023). I got off the first leg of my flight into the custody of UNICEF in a wheelchair. I spent nearly five days having to stay awake in an international airport while Donald Trump's first indictment in Manhattan went through the news. Governor of Florida, Ron DeSantis, was apparently too busy talking to Fox News about blocking the extradition of Trump from his Mar A Lago golf course resort to face charges out of state in New York with the National Guard even (I recall) to notice the VR/AR game free for all that was happening in Northern Florida. There was an exotic Porsche 911 sports car on the highest level of the airport parking deck that I saw having to go up there to get air from lower levels on the night of 3/31/2023 to 4/1/2023 (April Fools Day). One of the nights I had to spend inside the airport had a startling ROKO television broadcast (surely CG). It was of Trump burning his way through the Southern USA then burning his way up the notorious 'Bridge to Nowhere' before swan diving off the abrupt end into the safety of the seas of Jupiter (cf. Miranda Lambert's 'Kerosene' music video). This is an apparent reference to Sherman's March from the American Civil War (first apparent American civil war) of the 1800's.

The newspaper photo above features a quote that my late mother was fond of repeating. I do not believe that this is a coincidence. She taught at the University of North Carolina Greensboro when I was a child and has many friends there. Notice that the newspaper features a price of FREE, not OPEN like Trump's OpenWall with Mexico campaign promise from 2015. Did the security personnel, or roughly speaking the

American Hacker Corps (and the best around at that frankly speaking), from Uncle Kevin's HackHaus on Broadway stick it to that evil MF-er this time (this decade) or what: *Trumpy, Trumpy, Trumpy, Trumpy put the light saber back in its holster before someone (not somebody) gets hurt (note four T's rather than three biblically)?* I have predicted for years living around all this political madness that Kevin should eventually be a witness for the prosecution. Will he take the job? They would have had something (with the FBI) to do with routing the (almost surely) darkweb traffic Trump assumed was so covert through New York followed by Chicago based on visual traceroute maps while I was in Florida. The issue was about jurisdiction if the DOJ would not step in to charge him at the federal level. This is what we did to F-CK TRUMP this year. My reaction is: *Oh, oh no, he's unhappy; he doesn't LIKE that.* Too bad stats devil. Enjoy prison, as-hole (NY accent)! After I tried to get GitHub support to let me pay off my Pro account bill for five years to make sure the Florida documents repo would be there if something happened to me (it did), they changed the site to include free private repositories and a successor to be named to take over administration of the account in the event of the original account holder's death. I named Jared / Lucky225 (the real Jason's twin) as my successor. This means the hackers are responsible for ensuring the freedom of all my information.

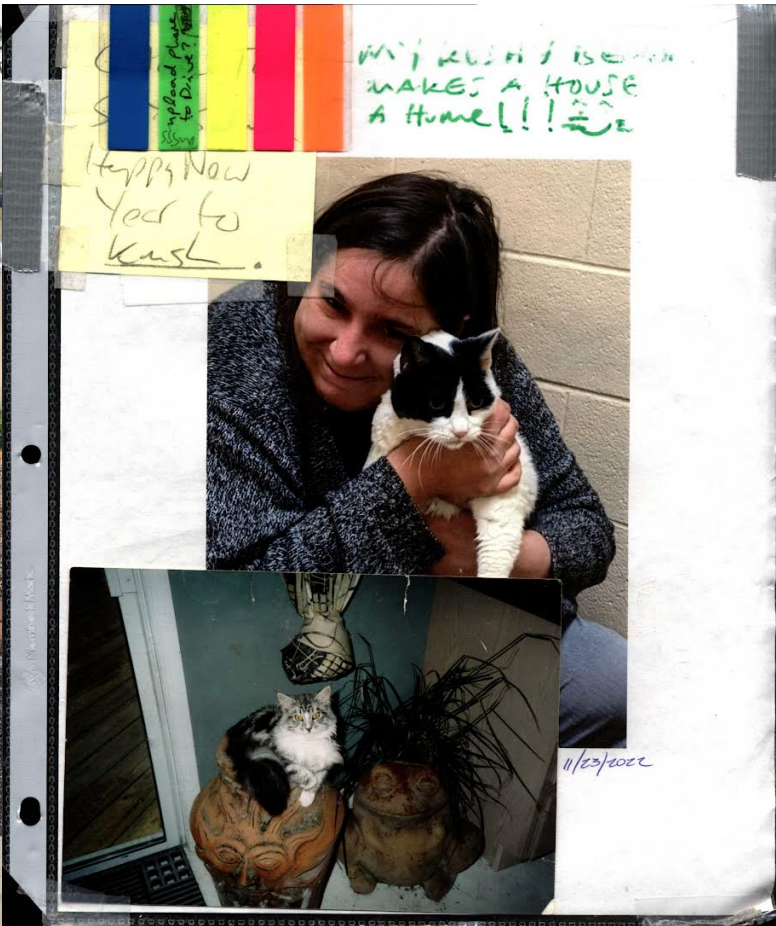

Since fleeing Florida for Illinois this year, I had an encounter with Trump in person on Juneteenth (cf. this link: <https://github.com/maxieds/ChameleonMiniDESFireStack/releases>). He came by me with two of his sons through marriages on a bike trail in Lincoln Park across from a grassy knoll. He arranged for actors/models that looked like cartoon versions of my parents to sit on the hill opposite from me wearing white sun glasses with stupid grins in the style of the Twenty One Pilot's 'Ride' music video (these men are satanic). The man wanted to taunt me with having to get a job as a parttime insurance salesman to make ends meet within a year of getting my doctorate. To which I started back: 'Daddy

was a draft dodger' (USS John McCain and reference to Cher's 'If I could turn back time' music video). This is typical of the man. He wanted to know if I was God and presumably if I had come to Earth to destroy him? Keep in mind that the man has a Hassidic rabbi light on the side of his tower that he displayed when he had to appear in court with Marjorie Taylor Greene for the charges in Manhattan this year. The light has text that reads: 'The messiah is in'. We can interpret this to mean that he views him being indicted for a small fraction of representative charges of all the misdeeds he is guilty of as a sign that God has come to Earth. Again, this is typical of the attitude of him being effectively untouchable. I flicked him off with my left (sinister) middle finger and used my right hand to walk scissors over to the left. Janet Jackson had just toured through our TOWN (not LAND). This must have been the reason for my reply: 'Miss Clinton if you're nasty' (i.e., Hillary Rodham is God, and she will cut t off your body before you die)! He gave me the middle finger before leaving with Barron and Don Junior through the parking lot. Some of his recent charges are about bribery and extortion to silence Stormy Danel from speaking openly about the mark of the beast on his penis while running for reelection. What does it look like? News reports in this country unfortunately omit that telling detail (very, very bad news).

I am going to end this post with photos of my family who were the most important thing to me in this life. Check out the links on the side panel of my GitHub profile (this one: <https://youtu.be/UvjeWcaDliM>; see the liner notes). The first is of a family portrait of my mom, sister and I when we were children. She is doing her best Snow White / Evil Queen pucker with the kids. The next one is of my dad giving the eulogy at my mother's funeral in their yard in Florida on Friday May 13, 2022 wearing his favorite Georgia Tech mathematics shirt. Was this a mafia reference to some of the other attendees that may never be charged in Florida? My father would not let me attend. I watched the ceremony live on Zoom from my graduate school apartment in Atlanta instead. The last one is of me and my cat Kush (dad term: the Kushinator) in Casper, Wyoming on my mom's first birthday since she passed when we were trapped in Yellowstone National Park last year. There is a repository I have created in memory of my mother: <https://github.com/maxieds/FlowersForMama2022> (and here: <https://github.com/maxieds/FlowersForMama2022-Original>). The dedication of my doctoral thesis at Georgia Tech is in her memory (see the first few pages): <https://arxiv.org/abs/2209.12287>. A favorite saying of my dad was 'live and let live'. This lyric can be found in the Traveling Wilbury's 'End of the line' song. He was also fond of complaining about Regan's classification of ketchup as a national vegetable for Americans at the poverty level on food stamps. I was prepped/briefed by my father for a special operations mission down to the land where search engines index the darkweb. I remember him saying 'there's nothing they can do to you that they haven't already done' and 'my kid will end up alive' (here Bidy, Bidy, Bidy to the tune of here kitty - thanks for the adrenaline shot in Casper, bro). The cat was with me the whole time (up until Florida). My dad requested that I 'kill Trump when you see him' before my mother died knowing the reasons she had been attacked brutally by members of the far right in this country (for speaking freely and submitting FBI tip reports). I hope this is good enough to make the old man happy wherever he is now.

Order of Protection - Address Search Results

Dr. Maxie Dion Schmidt <maxieds@gmail.com>

Sun, Aug 27, 2023 at 3:18 PM

To: MDS <maxieds@gmail.com>, maxieds-hackercat@outlook.com, maxieds85v3@gmail.com

Here are some documents about the potential locations of Zach Bradford. His and sister's phone numbers in Atlanta are:

- Zach: 229-300-3231
- Liz: 440-361-5021

Draft of email to555/DV Court:

Hello. I am following up on case #23OP76293 which was continued into September for a hearing by the judge last week. She said that she needs more information about his address to serve him papers. The situation is very serious for me. You can see this by reading through the attached PDF of notes that the judge said she will read and consider after the respondent is able to be notified of his right to appear at the hearing. The office may also take interest and/or be alarmed by the details about the second floor state attorney, Kimberly Foxx, that are detailed in the first section about incidents since my first hearing when I filed the initial petition paperwork.

I have phone numbers as contact points that were given to me by him in Atlanta. One is for Zach and the other is for his sister/girlfriend who was using the first name, Liz:

- Zach Bradford: 229-300-3231.
- Liz: 440-361-5021.

I think that Zach Bradford is an alias he uses that is not his legal name. Please note that upon checking my records, his first name was spelled "Zach" (not "Zack"). There are a number of entries on one search site that have entries for that first/surname combination living in states with the area codes of those two phone numbers. The first entry for another search site shows that he may be living in Bloomington, IL. A third search site has information about him with an age (of 23) that he gave in Atlanta:

I am not able to afford a private investigator right now as I am searching for a job. The information I have about the respondent (name, phone numbers) does not give consistent information. Can you use the phone numbers, or have the police/sheriff do it, to try to get his court appearance papers served? If he is living in Bloomington, IL, can they help contact him?

Please get back to me about options.

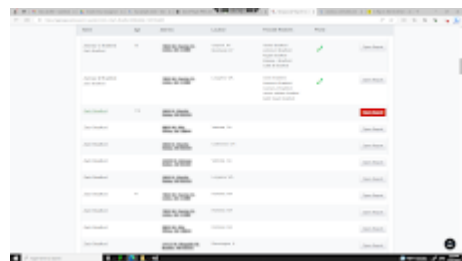

Thank you,

Dr. Maxie Dion Schmidt
