

Google Open Source

We bring all the value of open source to Google and all the resources of Google to open source.

Everyone benefits

Google believes open source solves real-world problems for everyone. Google's Open Source Programs Office supports open source innovation, collaboration, and sustainability through our programs and services.

Use

Open source is at the core of the products we build.

Release

We continue to release code under open source licenses for all to use.

Support

We foster inclusive environments to support healthy ecosystems.

Google Open Source programs

Google Open Source programs support open source projects through enabling new contributors, building mentorship, and supporting documentation.

Google Summer of Code

(<https://developers.google.com/open-source/gsoc/timeline>)

Google Summer of Code is a global, online program focused on bringing new contributors into open source software development. GSoC Contributors work with an open source organization on a 12+ week programming project under the guidance of mentors.
