

Who Is Using MSYS2?

- [RubyInstaller2](#) uses MSYS2 to build Ruby for Windows in CI and as build environment for gems with C extensions.
- [Gaphor](#) uses MSYS2 for its Windows releases and for CI
- [Git for Windows](#) is based on MSYS2
- [Quod Libet](#) uses MSYS2 for its Windows build and for CI
- [HDL/MINGW-packages](#) uses MSYS2 for building and testing open source Electronic Design Automation (EDA) tools.
- [ghdl/ghdl](#) uses MSYS2 for building, packaging and testing GHDL.
 - [ghdl/setup-ghdl-ci](#) uses setup-msys2 for users to run GHDL on GitHub Actions' Windows environments.
 - [ghdl/extended-tests](#) uses setup-msys2 and setup-ghdl-ci for testing third-party projects with GHDL on GitHub Actions' Windows environments.
- [gtkwave/gtkwave](#) uses MSYS2 for building and packaging GTKWave.
- [steveicarus/iverilog](#) uses MSYS2 for building, packaging and testing Icarus Verilog.
- [trabucayre/openFPGALoader](#) uses MSYS2 for building, packaging and testing openFPGALoader.
- [azonenberg/scopehal-apps](#) uses MSYS2 for building libscopehal, glscopeclient and other client applications for libscopehal.
- [Serial-Studio/Serial-Studio](#) uses MSYS2 for building and testing Serial Studio.
- [VUnit/vunit](#) uses MSYS2 for testing VUnit.
- [ImPPG](#) uses MSYS2 for its Windows releases.
- [Inkscape](#) uses MSYS2 for its Windows releases and for CI ([Documentation](#))
- [KeePassXC](#) uses MSYS2 for building and running KeePassXC password manager.
- [Media-autobuild_suite](#) uses MSYS2 for automatically building FFmpeg and other media related tools
- [Network UPS Tools](#) uses MSYS2/MinGW for "semi-native" builds of NUT for Windows (cross-builds on Linux+MinGW are also possible).
- [Nuwen's MinGW Build](#) uses MSYS2 to build the files.
- [OpenModelica](#) uses MSYS2 for building the OpenModelica tools and compiling the generated simulation code on Windows.
- [Paperwork](#) uses MSYS2 for its Windows releases and for CI ([Documentation](#))

- [The R Project](#) build system [rtools40](#) is based on MSYS2 icw/ a custom repository of [mingw packages](#) (all statically linked).
- [Spatial Model Editor](#) uses MSYS2 for its Windows releases and for CI
- [UrusStudio Installer](#) uses MSYS2 for building and running Urus Studio IDE and URUS System.
- [Webots](#) uses MSYS2 to build Webots on Windows and for CI.
- [Xournal++](#) uses MSYS2 for its Windows releases and for CI ([Documentation](#)).
- [Neovim](#) uses MSYS2 for its Windows building and running ([Documentation](#)).
- [darktable](#) uses MSYS2 for its Windows releases and for CI ([Documentation](#))
- [Mesh2HRTF](#) uses MSYS2 for its Windows NumCalc [binaries](#) ([Documentation](#)).
- [PVSnesLib](#) uses MSYS2 to build ROMs on Windows
- [Crown Engine](#) uses MSYS2 for its Windows releases and for CI.

Feel free to add your project to this list!
