

To mount mingw64 in MSYS2, you need to edit the `fstab` file located in

`C:\msys\etc\`. Add the line `C:/MinGW-w64/mingw64 /mingw` to mount the mingw64 directory, ensuring there is an empty line at the end of the file. **This allows MSYS2 to access the MinGW-w64 environment.** rperki.blogspot.com help.appveyor.com

Pre-built Toolchains - mingw-w64

Pre-built Toolchains While mingw-w64 provides the core Windows headers and libraries needed for Windows development, it's not very useful on its own. Most users should install a pre-built toolchain that combines mingw-w64 with a compiler (like GCC with binutils, or LLVM/Clang) and other essential build...

c++ - How to add MinGW to PATH? - Stack Overflow

I'm following this tutorial by vscode to install a C++ compiler on Windows. Right now, I'm trying to edit `C:\msys64\mingw64\bin` to environment variables and save MinGW to path. I clicked OK multiple times but seems like it can't save. I also entered `g++ --version` and `gdb --version` to check for installation.
